*Finnish Colonial Encounters* Raita Merivirta, Leila

Koivunen, Timo Särkkä, 2022-01-01 Breaking new ground in the study of European colonialism, this book focuses on a nation historically positioned between the Western and Eastern Empires of Europe - Finland. Although Finland never had overseas colonies, the authors argue that the country was undeniably involved in the colonial world, with Finns adopting ideologies and identities that cannot easily be disentangled from colonialism. This book explores the concepts of 'colonial complicity' and 'colonialism without colonies' in relation to Finland, a nation that was oppressed, but also itself complicit in colonialism. It offers insights into European colonialism on the margins of the continent and within a nation that has traditionally declared its innocence and exceptionalism. The book shows that Finns were active participants in various colonial contexts, including Southern Africa and Sápmi in the North. Demonstrating that colonialism was a common practice shared by all European nations, with or without formal colonies, this book provides essential reading for anyone interested in European colonial history. Chapters 1, 7 and 8 are available open access under a [link.springer.com](https://link.springer.com).>

The Urban Climatic Map Edward Ng,Chao Ren,2015-09-07  
Rapid urbanization, higher density and more compact cities have brought about a new science of urban climatology. An understanding of the mapping of this phenomenon is crucial for

urban planners. The book brings together experts in the field of Urban Climatic Mapping to provide the state of the art understanding on how urban climatic knowledge can be made available and utilized by urban planners. The book contains the technology, methodology, and various focuses and approaches of urban climatic map making. It illustrates this understanding with examples and case studies from around the world, and it explains how urban climatic information can be analysed, interpreted and applied in urban planning. The book attempts to bridge the gap between the science of urban climatology and the practice of urban planning. It provides a useful one-stop reference for postgraduates, academics and urban climatologists wishing to better understand the needs for urban climatic knowledge in city planning; and urban planners and policy makers interested in applying the knowledge to design future sustainable cities and quality urban spaces.

**The History of Cartography, Volume 4** Matthew H. Edney,Mary Sponberg Pedley,2020-05-15 Since its launch in 1987, the History of Cartography series has garnered critical acclaim and sparked a new generation of interdisciplinary scholarship. Cartography in the European Enlightenment, the highly anticipated fourth volume, offers a comprehensive overview of the cartographic practices of Europeans, Russians, and the Ottomans, both at home and in overseas territories, from 1650 to 1800. The social and intellectual changes that swept Enlightenment Europe also transformed many of its mapmaking practices. A new emphasis on geometric principles gave rise to improved tools for measuring and mapping the world, even as large-scale cartographic projects became possible under the aegis of powerful states. Yet older mapping practices persisted: Enlightenment cartography encompassed a wide variety of

processes for making, circulating, and using maps of different types. The volume's more than four hundred encyclopedic articles explore the era's mapping, covering topics both detailed—such as geodetic surveying, thematic mapping, and map collecting—and broad, such as women and cartography, cartography and the economy, and the art and design of maps. Copious bibliographical references and nearly one thousand full-color illustrations complement the detailed entries.

Raymond De Roover, 1999 A classic history of banking and trade in the medieval period, combining superb research and analysis with graceful writing. The Medici Bank was the most powerful banking house of the 15th century. Headquartered in Florence, Italy, it established branches in Rome, Venice, Geneva, Lyons, Bruges, London, and many other cities. The bank served as financial agent of the Church, extended credit to monarchs, and facilitated international trade in Western Europe. By their personal influence and the use of their profits, the owners and administrators of the bank contributed significantly to the development of Florence as the greatest center of the Renaissance.

**Architecture as a Performing Art** Marcia Feuerstein, Gray Read, 2016-04-15 How do buildings act with people and among people in the performances of life? This collection of essays reveals a deep alliance between architecture and the performing arts, uncovering its roots in ancient stories, and tracing a continuous tradition of thought that emerges in contemporary practice. With fresh insight, the authors ask how buildings perform with people as partners, rather than how they look as formal compositions. They focus on actions: the door that offers the possibility of making a dramatic entrance, the window that frames a scene, and the city street that is transformed in carnival. The essays also consider the design process as a performance improvised among many players and offer examples of recent practice that integrates theater and dance. This collection advances architectural theory, history, and criticism by proposing the lens of performance as a way to engage the multiple roles that buildings can play, without reducing them to functional categories. By casting architecture as spatial action rather than as static form, these essays open a promising avenue for future investigation. For architects, the essays propose integrating performance into design through playful explorations that can reveal intense relationships between people and place, and among people in place. Such practices develop an architectural imagination that intuitively asks, 'How might people play out their stories in this place?' and 'How might this place spark new stories?' Questions such as these reside in the heart of all of the

essays presented here. Together, they open a position in the intersection between everyday life and staged performance to rethink the role of architectural design.
