Integrative Statistics for the Social and Behavioral

Sciences Renee R. Ha,James C. Ha,2011-04-04 Designed to engage students and lower their fear factor, Integrative Statistics for the Social and Behavioral Sciences is a concise, user-friendly text that prepares students to use statistics in the real world. Providing depth and breadth of statistical tests, the text focuses on choosing the appropriate statistical analysis, and shows how to interpret the output and present the results. Basic descriptive statistics, hypothesis testing, and basic inferential statistics are covered along with more advanced topics such as correlation, regression, non-parametric statistics, multivariate statistics, and general linear modeling. The authors emphasize choosing the appropriate statistical test through conceptual material, assumptions, homework exercises, and a helpful choose-the-appropriate-test flowchart. They focus on the interpretation of results from both Excel and SPSS outputs, and also demonstrate how to do important calculations by hand to help students grasp the underlying concepts. The book includes end-of-chapter exercises that help students fully grasp the content of each chapter.

Political Economy and Information Capitalism in India G.

Parayil,2016-01-12 In this theoretically and empirically engaging volume, the contributors demonstrate that despite the dynamism of India's software industry and the rhetorical flourishes of industry leaders, at present, the benefits of the revolution in information and communication technologies (ICTs) touch only the hundreds of thousands with the right skills and access. India still needs to do more to bring the benefits of ICTs to the hundreds of millions of its citizens still living in acute poverty. The contributors take stock of the political economy implications of informational development in India.
