

Battery Indicator

Richard R. Secunde

Mercury Electrochemical Coulometer as a Battery State-of-charge Indicator Richard R. Secunde,1970 Use of a mercury-column electrochemical coulometer is discussed as a means for indicating the state of charge of secondary-battery systems through ampere-hour integration. The general nonlinear charge-discharge characteristics of a battery were matched through the use of operational-amplifier techniques. Results of electrical and temperature tests demonstrate that a coulometer of this type is a feasible device around which a battery state-of-charge indicator might be built.
