Mobile Wireless Middleware Jean-Marie Bonnin,2009-04-28 The advances in wireless communication technologies and the proliferation of mobile devices have enabled the realization of intelligent environments for people to com- nicate with each other, interact with information-processing devices, and receive a wide range of mobile wireless services through various types of networks and systems everywhere, anytime. This «Internet of Things» will dramatically modify our lives allowing progress in various domains such as health, security, and ITS (intelligent transportation systems). A key enabler of this pervasive and ubiquitous connectivity environment is the - vancement of software technology in various communication sectors, ranging from communication middleware and operating systems to networking protocols and app- cations. The international conference series on Mobile Wireless Middleware, Oper- ing Systems, and Applications (MOBILWARE) is dedicated to addressing emerging topics and challenges in various mobile wireless software-related areas. The scope of the conference includes the design, implementation, deployment, and evaluation of middleware, operating systems, and applications for computing and communications in mobile wireless systems. MOBILWARE 2009 was the second edition of this conference, which was made possible thanks to the sponsorship of ICST and Create-Net and most importantly the hard work of the TPC and reviewers.
