Black Swan Start-ups Sami Mahroum,2016-05-11 This book explores startups that have thrived against the odds in places where startup success was deemed to be unlikely. Discussing a number of technology startups from around the world that have succeeded without state backing nor local venture and seed capital, *Black Swan Start Ups* provides unique insights into unsung models of success beyond the two dominant narratives of Asia's 'Tiger Economies' and America's Silicon Valley miracle. The author describes these stories of success as 'black swan events' and ascribes their achievements to the ability of entrepreneurs to leverage the 'place surplus' of their locations, while building connections to support networks outside their immediate geographies. Including case studies such as Skype in Estonia, SoundCloud in Germany and Bayt.Com in Dubai, this insightful book gives a holistic and wide-ranging view of how technology startups have, and can, succeed in less likely places.

Business and Social Media in the Middle East Nehme Azoury,Lindos Daou,2020-06-25 This book discusses the effectiveness of Western organizations' social media strategies in the Middle East. Social media has changed the rules of doing business, but the exact impacts vary across regions. In the context of Middle Eastern societies, social media is seen as a way for individuals and communities to communicate with each other and is generally not viewed as a means for brands to interact with individuals. Examining how the use of social media in the Middle East is shaped by the region's culture, authors discuss the factors that businesses need to consider when creating digital marketing strategies targeted there. Including case studies of Middle Eastern companies, this book provides a comprehensive analysis of the rise of social media in the MENA region and the often-neglected role of culture in research in this area. It will provide researchers and practitioners with a deeper understanding of conducting business in the Middle East through the effective and efficient use of social media.

Public Management Reform in the Gulf Cooperation Council and Beyond Mhamed Biygautane,2023-05-16 This book offers an understanding of the current state of public management in the Gulf Cooperation Council (GCC) region, highlighting the region's institutional and human capital constraints. Drawing on case studies from GCC states and beyond, the book provides a policy-oriented analysis of these challenges and a set of recommendations on how to address them. *Public Management Reform in the Gulf Cooperation Council and Beyond* utilizes several theoretical frameworks to explore three themes: first, how the quality of government and efficiency of its bureaucratic machinery can offer a business-friendly environment for the private sector; second, how public-private partnerships can foster stronger collaboration and exchange of knowledge and expertise between the public and private sectors; and finally, how the existing human capital constraints may be addressed through the effective implementation of talent management, knowledge management, and training programs. A comparative approach is taken throughout the book, contrasting the performance of GCC states with other Middle East and North Africa (MENA) countries or the Organization for Economic Cooperation and Development (OECD) member countries in key governance, public sector performance, and business competitiveness indicators to identify what the GCC states need to do to enhance the quality of government and the capacity to deliver services more efficiently. This book will appeal to academics, practitioners, policymakers and private sector consultants, as well as those interested more broadly in the Middle East and the Gulf region.

People, Care and Work in the Home Mohamed Gamal Abdelmonem, Antonio Argandoña, 2020-05-18 Introducing novel theoretical, empirical and practical investigations with case studies from UK, Europe, South America and South East Asia, the book offers a novel global outlook on how contemporary homes are facing genuine challenges from operational, economic, spatial, social and wellbeing perspectives. The changing demographics of our modern society have inevitably impacted the dynamics and relationships within the home from being personal and private to that of multiple work relationships; domestic work, care for older people, or supporting people with special needs. Whilst the home is a concept universally experienced, permeating every aspect of our lives, it remains an entity whose influence on health and wellbeing is poorly understood. This book brings together 17 different contributions from scholars, researchers and practitioners from different disciplinary and professional backgrounds including three feature articles by leading figures, such as Lord Best and Baroness Hollins. The chapters are organised within three parts that look at the triangle of people + work + care in the home. At a time when homes are increasingly becoming local hubs for care and wellbeing, this volume is a critical and useful addition to current literature in the social sciences, humanities, economics, culture, care and wellbeing in the domestic sphere.

Privileged Attack Vectors Morey J. Haber, 2020-06-13 See how privileges, insecure passwords, administrative rights, and remote access can be combined as an attack vector to breach any organization. Cyber attacks continue to increase in volume and sophistication. It is not a matter of if, but when, your organization will be breached. Threat actors target the path of least resistance: users and their privileges. In decades past, an entire enterprise might be sufficiently managed through just a handful of credentials. Today's environmental complexity has seen an explosion of privileged credentials for many different account types such as domain and local administrators, operating systems (Windows, Unix, Linux, macOS, etc.), directory services, databases, applications, cloud instances, networking hardware, Internet of Things (IoT), social media, and so many more. When unmanaged, these privileged credentials pose a significant threat from external hackers and insider threats. We are experiencing an expanding universe of privileged accounts almost everywhere. There is no one solution or strategy to provide the protection you need against all vectors and stages of an attack. And while some new and innovative products will help protect against or detect against a privilege attack, they are not guaranteed to stop 100% of malicious activity. The volume and frequency of privilege-based attacks continues to

increase and test the limits of existing security controls and solution implementations. Privileged Attack Vectors details the risks associated with poor privilege management, the techniques that threat actors leverage, and the defensive measures that organizations should adopt to protect against an incident, protect against lateral movement, and improve the ability to detect malicious activity due to the inappropriate usage of privileged credentials. This revised and expanded second edition covers new attack vectors, has updated definitions for privileged access management (PAM), new strategies for defense, tested empirical steps for a successful implementation, and includes new disciplines for least privilege endpoint management and privileged remote access. What You Will Learn Know how identities, accounts, credentials, passwords, and exploits can be leveraged to escalate privileges during an attack Implement defensive and monitoring strategies to mitigate privilege threats and risk Understand a 10-step universal privilege management implementation plan to guide you through a successful privilege access management journey Develop a comprehensive model for documenting risk, compliance, and reporting based on privilege session activity Who This Book Is For Security management professionals, new security professionals, and auditors looking to understand and solve privilege access management problems

Human Capital and the Future of the Gulf Carolyn Barnett, 2015-11-16

Extensive efforts to develop human capital are under way in the United Arab Emirates, Saudi Arabia, and elsewhere in the Gulf, and they are increasingly setting expectations for how people ought to behave socially and economically that are in tension with how they are expected to behave politically. The tensions created by governments' conflicting aims can produce frustration, a sense of entitlement, or apathy among young people entering the labor force, each of which poses different potential political challenges for governments. Navigating this tension—or finding ways to create space for genuine innovation and risk taking within that constrained political context—will be among the most important strategic challenges for the region's leaders and people in the next 10 years.
