Meat Illustrated America's Test Kitchen, 2020-10-27 2021 IACP Award Winner in the General Category Increase your meat counter confidence with this must-have companion for cooking beef, pork, lamb, and veal with more than 300 kitchen-tested recipes. Part cookbook, part handbook organized by animal and its primal cuts, Meat Illustrated is the go-to source on meat, providing essential information and techniques to empower you to explore options at the supermarket or butcher shop (affordable cuts like beef shanks instead of short ribs, lesser-known cuts like country-style ribs, leg of lamb instead of beef tenderloin for your holiday centerpiece), and recipes that make those cuts (72 in total) shine. Meat is a treat; we teach you the best methods for center-of-the-plate meats like satisfying Butter-Basted Rib Steaks (spooning on hot butter cooks the steaks from both sides so they come to temperature as they acquire a deep crust), meltingly tender Chinese Barbecued Roast Pork Shoulder (cook for 6 hours so the collagen melts to lubricate the meat), and the quintessential Crumb-Crusted Rack of Lamb. Also bring meat beyond centerpiece status with complete meals: Shake up surf and turf with Fried Brown Rice with Pork and Shrimp. Braise lamb shoulder chops in a Libyan-style chickpea and orzo soup called Sharba. Illustrated primal cut info at the start of each section covers shopping, storage, and prep pointers and techniques with

clearly written essays, step-by-step photos, break-out tutorials, and hundreds of hand-drawn illustrations that take the mystery out of meat prep (tie roasts without wilderness training; sharply cut crosshatches in the fat), so you'll execute dishes as reliably as the steakhouse. Learn tricks like soaking ground meat in baking soda before cooking to tenderize, or pre-roasting rather than searing fatty cuts before braising to avoid stovetop splatters. Even have fun with DIY curing projects.

Training Manual for Meat Cutting and Merchandising Thomas Fabbriante,1977

Advances in Meat Research A.M. Pearson,T.R. Dutson,2012-12-06 The Advances in Meat Research series has arisen from a perceived need for a comprehensive coverage of certain topics that are pertinent to meat and meat products. We, the editors, have made the decision to concentrate on a series of related topics that are deemed to be important to an understanding of meat, both fresh and processed. It is our sincere hope that by focusing upon areas related to meat science that researchers who contribute to this volume can not only update those involved in academia and industry but also promulgate facts that may lead to solutions of meat industry problems and aid in improving the efficiency of various associated industrial processes. We have chosen to devote Volume 1 to electrical stimulation in view of the widespread interest in its meat industry applications. Although the classical study by A. Harsham and Fred Deatherage was published in 1951, it was not accepted by the meat industry owing to a number of factors that are discussed in the text. These investigators did, however, lay the groundwork for modern electrical stimulation of carcasses by their detailed studies on the effects of varying current, voltage, frequency, wave forms, and

time. The basic information provided by these workers saved a great amount of experimentation by those who subsequently rediscovered electrical stimulation.

Inspired by a locally driven, nose-to-tail approach to butchery, this new wave of meat mavens is redefining the way we buy and cook our beef, pork, fowl, and game. The momentum of this revived butcher-love has created a carnivorous frenzy, pulling a new generation of home cooks straight into the kitchen—*Primal Cuts: Cooking with America's Best Butchers* is their modern meat bible. Marissa Guggiana, food activist, writer, and fourth generation meat purveyor, traveled the country to discover 50 of our most gifted butchers and share their favorite dishes, personal stories, and cooking techniques.
