Mobile banking in the Ethiopian bank sector Dereje Tesfa, 2019-08-30 Seminar paper from the year 2019 in the subject Business economics - Banking, Stock Exchanges, Insurance, Accounting, grade: A, Wolkite University (College of Business and Economics), language: English, abstract: This article looks at how and why banking customers have begun to take advantage of mobile services for their banking requirements and why some of them are still hesitant to adopt mobile banking in Ethiopian banking sector. Also, this article throws light on some of the eminent challenges faced by the mobile banking service providers, which can be seen as opportunities for the financial institutions and the bankers. The internet and the mobile phone, the two technological advancements that have profoundly affected human behavior in the last decade have started to converge. Using a variety of platforms, services are being created to enable mobile devices to perform many activities of the traditional internet in a reduced format for mobile devices. One such area of activity is mobile banking. A cluster of dedicated and demanding mobile phone users (consumers) have multiplied

tremendously over the years, who expect real-time information and access and high levels of service.

Marketing and Mobile Financial Services Aijaz A.

Shaikh, Heikki Karjaluo, 2018-12-21 Mobile financial services (MFS) are of major interest and importance to both researchers and practitioners. The role played by nonbanking actors including telecoms and FinTech firms as well as other participants, such as PayPal and Amazon, in developing and deploying innovative financial and payment services is undeniable. Peer2peer (P2P) payments from nonbank services are becoming increasingly commonplace and will shortly be codified by EC (EU?) regulations requiring banks to provide access to consumer data for third-party app developers and service providers. Three major mobile financial systems—mobile banking, mobile payments, and branchless banking—currently dominate the electronic retail banking sector. Although interconnected and interrelated, their business models, regulatory frameworks, and target markets are distinct. This book provides a unified perspective on MFS and discusses its evolution, growth, and future, as well as identifying the frameworks, stakeholders, and technologies used in financial information systems in general and MFS in particular. Academics and researchers in digital and financial marketing will find this book an invaluable resource, as will bank executives, regulators, policy makers,

FinTech professionals, and anyone interested in how mobile technology, social media and financial services will increasingly intersect.

Genealogy of American Finance Robert E.

Wright, Richard Sylla, 2015-03-17 In this unique, well-illustrated book, readers learn how fifty financial corporations came to dominate the U.S. banking system and their impact on the nation's political, social, and economic growth. A story that spans more than two centuries of war, crisis, and opportunity, this account reminds readers that American banking was never a fixed enterprise but has evolved in tandem with the country. More than 225 years have passed since Alexander Hamilton created one of the nation's first commercial banks. Over time, these institutions have changed hands, names, and locations, reflecting a wave of mergers, acquisitions, and other restructuring efforts that echo changes in American finance. Some names, such as Bank of America and Wells Fargo, will be familiar to readers. The origins of others, including Zions Bancorporation, founded by Brigham Young and owned by the Mormon Church until 1960, are surprising. Exploring why some banks failed and others thrived, this book wonders, in light of the 2008 financial crisis, whether recent consolidations have reached or even exceeded economically rational limits. A key text for navigating the complex terrain of American finance, this volume draws a fascinating family tree for projecting the financial future of a nation.

Doing Digital: Lessons from Leaders Chris

Skinner, 2020-03-02 There has been lots of discussion of

digital and open banking, banking-as-a-service, banking platforms, FinTech and TechFin and more over the past decade. This all indicates that we are in a decade of rapid cycle change that presents huge challenges and huge opportunities. Billion dollar unicorns appear rapidly, whilst internet giants achieve global domination. How are banks dealing with these changes and are any banks showing leadership? Well yes, a few are. With all the gloom merchants saying that traditional banking is doomed, a few banks have made radical moves to adapt and survive. Chris Skinner, world-leading commentator on banking and technology, has selected five of those banks—JPMorgan Chase (USA), BBVA and ING (Europe), and DBS and CMB (Asia)—to share their experiences. In detailed interviews, and with wide-ranging commentary, he has discovered the secrets of how not just adapt and survive, but how to thrive in this sea change of finance and technology. Learn the lessons of the leaders, and learn how to become a successful digital bank, by Doing Digital.

Integrity in Mobile Phone Financial Services

Pierre-Laurent Chatain, Raul Hernandez-Coss, Kamil Borowik, Andrew Zerzan, 2008-06-10 Governments are challenged to make an innovation-friendly climate while simultaneously ensuring that business development remain sustainable. Criminal use of the technology terrorist financing and money laundering challenges long-run business viability via risk of massive investment flight and public distrust of new players entering the market. Sustainable business models are those that base regulation on a careful risk-based analysis. This study identifies the perceived risks and compares them with the actual level of risk for each category of mobile phone financial services. The comparison reveals that the perceptions do not weigh up to the reality. Based on fieldwork in seven locations

where the technology has taken off, this paper finds that providers apply measures that are consistent with international standards to combat money laundering and terrorist financing. It identifies the sometimes non-traditional means the industry uses that both mitigate the risks and are in line with good business practices. Acknowledging that mobile phone financial services are no riskier than other channels, governments are called to treat them as an opportunity to expand access to finance.

Bank 2.0 Brett King, 2010-06-05 BANK 2.0 reveals why customer behaviour is so rapidly changing, how branches will evolve, why cheques are disappearing, and why your mobile phone will replace your wallet—all within the next 10 years.

Banking 5.0 Bernardo Nicoletti, 2021-07-06 Bill Gates' quote, "Banking is necessary, but banks are not," showcases the opportunity for financial services digital transformation. The next transition from industry 4.0 to 5.0 will impact all sectors, including banking. It will combine information technology and automation, based on artificial intelligence, person-robot collaboration, and sustainability. It is time to analyze this transformation in banking deeply, so that the sector can adequately change to the 'New Normal' and a wholly modified banking model can be properly embedded in the business. This book presents a conceptual model of banking 5.0, detailing its implementation in processes, platforms, people, and partnerships of financial services organizations companies. The last part of the book is then dedicated to future developments. Of interest to academics, researchers, and professionals in banking, financial technology, and financial services, this book also includes business cases in financial services.

Digital Bank: Strategies to launch or become a digital

bank Chris Skinner, 2014-05-15 Digital Bank tracks the innovations in banking and how the mobile internet is changing the dynamics of consumer and corporate relationships with their banks. The implication is that banks must become digitised, and that is a challenge as becoming a Digital Bank demands new services focused upon 21st-century technologies. Digital Bank not only includes extensive guidance and background on the digital revolution in banking, but also in-depth analysis of the activities of incumbent banks such as Barclays in the UK and mBank in Poland, as well as new start-ups such as Metro Bank and disruptive new models of banking such as FIDOR Bank in Germany.
