On the Tour Thomas Porky McDonald,2017-09-25 The second volume of mini-travelogues by poet and writer Thomas Porky McDonald, *On the Tour: More City Walks*, picks up where *A Walk in the City: An Incomplete Tour* left off. This time, in addition to some previously unmentioned museums, a number of parks, historic houses, theaters and New York landmarks join in the mix. From Washington Square Park to the Old Town Bar & Restaurant to the Louis Armstrong House to the Queens, Bronx and Prospect Park Zoos, The City is well represented in McDonalds brief vignettes. Once again, a Walking Distance addendum is featured, in order to give the traveler an idea of the most possible sites one can see in a given day. Another useful and understated guide to the writers lifetime home.

The Beatles in Japan Carolyn S. Stevens,2017-11-22 Following their first tour to Japan in 1966, the Beatles would become an important part of Japan's postwar cultural development and its deepening relationship with the West. By the 1960s Japan's dramatic rise in prosperity and the self-confidence of the country's 'economic miracle' period were yet to come; it was not, at this stage, considered a fully-fledged partner of the West. All these potential developments were consolidating around the time of the 1966 tour. The Beatles' concerts in Tokyo contributed to the construction of a new Japanese national identity and introduced Japan as a new potential market to UK and US music producers, broadening the country's transnational cultural links. This book explores the Beatles' engagement with Japan within the larger context of the country's increased global connection and large-scale economic, social and cultural change. It describes the great impact of the Beatles' contentious 1966 tour, which took place amid public displays of both euphoric 'Beatlemania' and angry protests, and discusses the lasting impression of this tour on Japanese culture and identity to the present day. The Beatles' relationship with Japan did not end after their departure; this book also examines the Beatles' subsequent contacts with Japan, including John Lennon's marriage and artistic partnership with Yoko Ono, and Paul McCartney's later Japanese tours and the warm reception the ex Beatles and their musical legacy have received over the years.

Mediterranean Architectural Heritage AZROUR Mohamed,2024-04-15 The Mediterranean region is distinguished by an architectural heritage of great richness and diversity. This book focuses on the preservation and enhancement of this heritage. As the building and construction sector is one of the largest emitters of greenhouse gases, there is much effort to replace traditional materials with environmentally friendly materials. Great efforts are made to prioritize the use of eco-materials instead of conventional materials. There is a trend to use local materials, such as earth, stone or wood, due to their sustainability and highly favorable environmental footprint. Keywords: Tire-Based Anti-Seismic Fibers, Hydraulic Lime Concrete, Recycled Glass-Fiber Reinforced Cement, Recycled Construction and Demolition Waste, Local Clay Materials with Date Palm Fibers, Bio-Composite Building Material, Building Materials Stabilized with Gum Arabic, Seismic Vulnerability Assessment of a Building Aggregate, Soil Building Blocks, Earth Bricks Stabilized by Alkaline Solution and Reinforced with Natural Fibers, Preservation of Local Architectural Heritage, Seismic Resilience in Rammed Earth Construction, Thermal Insulation, Wall Paintings, Spectrometric Characterization, Raw Earthern Bricks, Bricks based on Clay and Stabilized with Reed Fibers, Traditional Earth Architecture, Geopolymers, Strengthening Rammed Earth, Improving Thermal Insulation, Removal of Organic Pollutants, Characterization of Stone Flooring, Fire Induced Microstructural Changes in Materials, White Marble, Limestone, Restoration and Digitalisation Strategies of Architectural Heritage, Laser Scanning, BIM for Heritage Management, Integrated Digital Survey Methodologies.

Ski Utah!

Bodyslams! Gary Michael Cappetta,2006-01-24 Popular wrestling compere Gary Cappetta weaves commentary on the business and its protagonists with tales of the road and personal insight, shedding light in the process on the dangerous games pro wrestlers and their corporate employers play in order to acquire fame, power and wealth. During the three decades he spent as ring announcer for America's two dominant wrestling promoters, Cappetta occupied the same locker rooms, hotels and vehicles as the athletes he was employed to introduce.

Black Campus Life Antar A. Tichavakunda,2021-12-01 An in-depth ethnography of Black engineering students at a historically White institution, *Black Campus Life* examines the intersection of two crises, up close: the limited number of college graduates in science, technology, engineering, and math (STEM) fields, and the state of race relations in higher education. Antar Tichavakunda takes readers across campus, from study groups to parties and beyond as these students work hard, have fun, skip class, fundraise, and, at times, find themselves in tense racialized encounters. By consistently centering their perspectives and demonstrating how different campus communities, or social worlds, shape their experiences, Tichavakunda challenges assumptions about not only Black STEM majors but also Black students and the "racial climate" on college campuses more generally. Most fundamentally, *Black Campus Life* argues that Black collegians are more than the racism they endure. By studying and appreciating the everyday richness and complexity of their experiences, we all-faculty, administrators, parents, policymakers, and the broader public-might learn how to better support them. This book is freely available in an open access edition thanks to TOME (Toward an Open Monograph Ecosystem)-a collaboration of the Association of American Universities, the Association of University Presses, and the Association of Research Libraries. Cricket in America, 1710-2000 P. David Sentance,2006-03-02 Cricket was played in Virginia in 1710 and was enjoyed on Georgia plantations in 1737. Teams representing New York and Philadelphia faced each other as early as 1838. By 1865, Philadelphia was considered the best cricket-playing city in the United States, competing against Canadian, English and Australian teams from 1890 to 1920. This 30 year span was essential to the formation of America's sports identity--and by its end, while the sport of baseball drew increasing attention, the game of cricket moved from being the game of America's aristocrats to a safe haven for America's nonwhite immigrants who were excluded from baseball because of Jim Crow laws. Here, the game's unique multi-ethnic, religious and cultural tradition in the United States is fully explored. The author explains cricket's ties to the beginnings of baseball and covers the ways in which the game continues to play an important role in America's inner cities.

Queenslanders Rod Fisher,2016 In a single timely tome, Rod Fisher packs a lot of what's known about the history of the timbered house in Qld - the sum of research, writing and practice over 4 decades. While breaking new ground on its origin and development, the first 4 chapters concern several key themes: 1. the evolution of a Vernacular class of housing in the north of Australia: from aboriginal to modern day, comprising a series of styles and the means of identifying each one by era and attribute 2. the historical context to traditional housing: using census data and contemporary testimony to amplify its configuration which reflects cyclical condition, personal choice and social acceptance 3. the human dimension to the main varieties of habitat and its environment: specifically the pros and cons of observers and occupants of the day followed by resolution of their discrepancies 4 whether Brisbane was in any way different from the rest of the state: examining which varieties made the greatest imprint, from elite and multiple types to the predominant gabled, hipped, pyramidal and later multi-gabled dwellings of the Vernacular tradition The next couple of chapters are casestudies illustrating those aspects, particularly the evolution of traditional housing and the impact of historical change. Though set in Brisbane they reflect larger issues: 5. the early inner suburb of Petrie Terrace: which exhibits not only changes in timbered housing over time, but also the effect of road improvement, shopping centre diversion, stadium development, building renovation and gentrification more generally 6. a timbered dwelling of nearby Bowen Hills: which, being modified several

times in its lifetime and finally removed elsewhere, demonstrates change, as well as the influence of the locale and the impact of transportation improvements on housing and community. At the same time, this volume serves as a guide and reference, partly by information, advice and example, but more specifically by means of the handy classification of Vernacular styles in the 1st chapter, and ultimately by instructions for researching any house in Qld: 7. a step-by-step guide to historical investigation and exposition: using a dwelling in Annerley/Tarragindi as the example. That practical purpose is reinforced in the final 3 chapters by a Supplement of related material, Glossary of requisite terms and Bibliography of relevant sources on both the history and heritage of timbered housing – plus plentiful illustrations of course. As there hasn't been a work on this intriguing subject for a long time – nor anything ever like this one – it will serve general readers, professionals, researchers, writers and academics on the one hand, and owners, occupants, renovators, restorers and vendors on the other, whether in Brisbane, Qld or elsewhere in Australia. To all and sundry, its core message is conveyed by one of Joni Mitchell's bygone ballads: Don't it always seem to go That you don't know what you've got 'Till it's gone They paved paradise And put up a parking lot

Look Back in Hope Keith W. Clements, 2017-07-07 A child of China missionary parents, Keith Clements looks back on a life rich in diverse experiences in many parts of the world as pastor, theologian, writer, and servant of the ecumenical movement. In so doing he finds hope for the creation of true community in the world, of people among themselves, with God, and with creation. That is what the gospel of Christ is all about, what the church is about, and indeed what God who lives and loves as three-in-one is all about. He recalls instances of grace in which--even amid conflict and tragedy--people, churches, and communities discover the possibilities of new life together. It is both a very human story of personal faith, and an insider's account of ecumenical Christianity's quest for a more visibly united church and a world of peace and justice. Famous influences like Dietrich Bonhoeffer and present-day leaders such as Desmond Tutu figure prominently; but so do so-called ordinary people he has met over the years, whether in an English village, in communist East Germany, or in a South African squatter camp, who have shown by the way they live that another world--and another kind of church--is possible.

Remaking the American College Campus Jonathan Silverman, Meghan M. Sweeney, 2016-10-03 The built and landscaped spaces of colleges and universities radiate and absorb the values of the cultures in which they were created. As economic and political forces exert pressure on administrators and as our understanding of higher education shifts, these spaces can transform dramatically. Focusing on the utopian visions and the dystopian realities of American campus life, this collection of new essays examines campus spaces from the perspective of those who live and work there. Topics include disability, sustainability, first-year writing, underrepresented groups on campus, online education, adjunct labor, and the way profit-driven agendas have shaped colleges and universities.

The Empire DC Moore, 2010-08-10 Patch you up, all nice like, splint, bandage your leg. All very civilized actually. But then. Then. We hand you over. Helmand in the height of summer. Gary, a British soldier, and Hafizullah, his Afghan colleague, guard an injured young prisoner, Zia, found in the heat of battle. Gary wants answers, Hafizullah just wants to make it through the day and Zia thinks there has been a big mistake. Surrounded by intense heat and violence, the characters' moral codes are tested to the limit. DC Moore's second play dissects the politics of occupation, home and abroad. With both painful and witty insight, he explores some of the lengths humanity is stretched to under the circumstances of war. The strong characterisation enjoys a healthy dose of humanity and the politically-charged subject is handled with subtlety and atypical nuances. The Empire is an amusing and sometime shocking insight into life in the Afghanistan war.

Quantitative Methods in Tourism Economics Álvaro Matias, Peter Nijkamp, Manuela Sarmento, 2012-12-13 Tourism economics is partly based on established principles from the economics discipline, but it also incorporates elements from sociology, psychology, organization theory and ecology. It has over the years turned into an appealing multi-disciplinary oriented approach to the understanding of the impacts of leisure time in a modern society, including cultural heritage, sustainable quality of life, and industrial organization of the hospitality industry. The increasing dynamics in the tourist industry and its worldwide effects will continue to attract the attention of both the research and the policy sector in the years to come. Rather than speculating on non-observed facts, there is a clear need for evidence-based research in order to map out the complex dynamics of the tourist industry. The present volume comprises novel studies – mainly of a quantitative-analytical nature – on the supply, demand and contextual aspects of modern tourism. It contains a sound mix of theory, methodology, policy and case studies on various tourism issues in different parts of the world.

The Impacts of Green Space on Student Experience at an Urban Community College Vanita Naidoo, 2022-07-19 This book presents a rich case study examining physical and spatial factors of urban campus design that influence student experience and wellbeing. The text details important historical context illustrating the foundational concepts and purpose of college sites in the United States and maps economic reforms and policies which have driven the development of today's inner-city campuses. Focusing on Bronx Community College, New York, and looking specifically at how the presence or absence of green space impacts students, the text then draws on diverse student voices to examine how students use open spaces, and how this influences their sense of belonging, stress reduction, and scholarly identities. The author's historical and qualitative research presents original insights and relies on a rich body of textual and on-site investigation. This book will be a valuable resource for researchers and academics with an interest in urban education and higher education. It will be of particular interest to those with a focus on multicultural education and education policy.

New York City Curiosities Lisa Montanarelli, 2011-01-11 The definitive collection of New York City's odd, wacky, and most offbeat people, places, and things, for New York City residents and anyone else who enjoys local humor and trivia with a twist. From Chinatown restaurants that make bubble tea to the Burger King peacock statue in Staten Island, this book will have it all.

Universal Design for Web Applications Wendy Chisholm, Matt May, 2008-11-14 Universal Design for Web Applications teaches you how to build websites that are more accessible to people with disabilities and explains why doing so

is good business. It takes more work up front, but the potential payoff is huge -- especially when mobile users need to access your sites. You'll discover how to use standards-based web technologies -- such as XHTML, CSS, and Ajax, along with video and Flash -- to develop applications for a wide range of users and a variety of devices, including the mobile Web. You'll also learn specifics about this target audience, especially the key over-50 age group, whose use of the Web is rapidly growing. With this book, you will: Learn the importance of metadata and how it affects images, headings, and other design elements Build forms that accommodate cell phones, screen readers, word prediction, and more Create designs using color and text that are effective in a variety of situations Construct tables that present information without spatial cues Design Ajax-driven social networking applications that people with disabilities can access Provide audio with transcriptions and video that includes captions and audio descriptions Discover assistive technology support for Rich Internet Application technologies such as Flash, Flex, and Silverlight Universal Design for Web Applications provides you with a roadmap to help you design easy-to-maintain web applications that benefit a larger audience.

Protest and Resistance in the Tourist City Claire Colomb,Johannes Novy,2016-07-01 Across the globe, from established tourist destinations such as Venice or Prague to less traditional destinations in both the global North and South, there is mounting evidence that points to an increasing politicization of the topic of urban tourism. In some cities, residents and other stakeholders take issue with the growth of tourism as such, as well as the negative impacts it has on their cities; while in others, particular forms and effects of tourism are contested or deplored. In numerous settings, contestations revolve less around tourism itself than around broader processes, policies and forces of urban change perceived to threaten the right to ‘stay put’, the quality of life or identity of existing urban populations. This book for the first time looks at urban tourism as a source of contention and dispute and analyses what type of conflicts and contestations have emerged around urban tourism in 16 cities across Europe, North America, South America and Asia. It explores the various ways in which community groups, residents and other actors have responded to – and challenged – tourism development in an international and multi-disciplinary perspective. The title links the largely discrete yet interconnected disciplines of ‘urban studies’ and ‘tourism studies’ and draws on approaches and debates from urban sociology; urban policy and politics; urban geography; urban anthropology; cultural studies; urban design and planning; tourism studies and tourism management. This ground breaking volume offers new insight into the conflicts and struggles generated by urban tourism and will be of interest to students, researchers and academics from the fields of tourism, geography, planning, urban studies, development studies, anthropology, politics and sociology.
