Issues in Software Engineering Education Richard Fairley, Peter Freeman, 2012-12-06 This volume combines the proceedings of the 1987 SEI Conference on Software Engineering Education, held in Monroeville, Pennsylvania on April 30 and May 1, 1987, with the set of papers that formed the basis for that conference. The conference was sponsored by the Software Engineering Institute (SEI) of Carnegie-Mellon University. SEI is a federally-funded research and development center established

by the United States Department of Defense to improve the state of software technology. The Education Division of SEI is charged with improving the state of software engineering education. This is the third volume on software engineering education to be published by Springer-Verlag. The first (Software Engineering Education: Needs and Objectives, edited by Tony Wasserman and Peter Freeman) was published in 1976. That volume documented a workshop in which educators and industrialists explored needs and objectives in software engineering education. The second volume (Software Engineering Education: The Educational Needs of the Software Community, edited by Norm Gibbs and Richard Fairley) was published in 1986. The 1986 volume contained the proceedings of a limited attendance workshop held at SEI and sponsored by SEI and Wang Institute. In contrast to the 1986 Workshop, which was limited in attendance to 35 participants, the 1987 Conference attracted approximately 180 participants.

Saving Bletchley Park Sue Black, Stevyn Colgan, 2016-03-10
Imagine a Britain where the most important sites of historical significance are replaced with housing estates and supermarkets... Imagine a Britain without Bletchley Park, where Alan Turing and a team of code breakers changed the course of World War II and where thousands of women inspired future generations with their work in the fields of computing and technology... Now imagine a group of extraordinary people, who - seventy years after the birth of the modern computer at Bletchley Park - used technology to spark a social media campaign that helped secure its future and transform it into the world-class heritage and education centre it deserves to be. This is a story about saving Bletchley Park. But it is also the story of the hundreds of people who dedicated twenty years of hard work and determination to the campaign that saved it. It is a testament to the remarkable and mysterious work during World War II that made it a place worth saving. It is a book about campaigners, veterans, enthusiasts, computer geeks, technology, Twitter, trees and Stephen Fry stuck in a lift. And finally, it is a story about preserving the past for the generations of tomorrow.

Death to the BCS Dan Wetzel, Josh Peter, Jeff Passan, 2010-10-14 A team of award-winning sports reporters takes down the Great Satan of college sports: the Bowl Championship Series. Every college sport picks its champion by a postseason tournament, except for one: Division I-A football. Instead of a tournament, fans are subjected to the Bowl Championship Series, an arcane mix of polling and mathematical rankings that results in just two teams playing for the championship. It is, without a doubt, the most hated institution in all of sports. A recent Sports Illustrated poll found that more than 90 percent of sports fans oppose the BCS, yet this system has remained in place for more than a decade. Built upon top-notch investigative reporting, *Death to the BCS* at last reveals the truth about this monstrous entity and offers a simple solution for fixing it. *Death to the BCS* includes findings from interviews with power players, as well as research into federal tax records, Congressional testimony, and private contracts, revealing: ?The

truth behind the Cartel-the anonymous suits who run the BCS and who profit handsomely by protecting it ?The flawed math and corruption that determine which teams participate in the national championship ?How the system hurts competition by perpetuating cupcake schedules ?How mid-major teams are systematically denied a chance to play for the championship ?How a comprehensive sixteen-team playoff plan can solve the problem while enhancing profitability The first book to lay out the unseemly inner workings of the BCS in full detail, Death to the BCS is a rousing manifesto for bringing fairness back to one of our most beloved sports.

The Microfinance Impact Ranjula Bali Swain, 2013-08-15
Financial inclusion through microfinance has become a powerful force in improving the living conditions of poor farmers, rural non-farm enterprises and other vulnerable groups. In its unique ability to link the existing extensive network of India's rural bank branches with the Self Help Groups (SHG), the National Bank of Agriculture and Rural Development (NABARD) has covered up to 97 million poor households by March 2010 under its Self Help Group Bank Linkage Programme. Policy-makers have proclaimed SHGs as "the most potent initiative ... for delivering financial services to the poor in a sustainable manner. This book presents a comprehensive scientific assessment of the impact of the Self Help Group Bank Linkage Programme (SBLP) on the member households. The book discusses wide-ranging topics, including the rural financial sector in India, the history and structure of the SBLP, the impact methodologies, the economic and social impact of microfinance, its role in building assets while reducing poverty and vulnerability, the role of women and their empowerment, training and accumulation of human capital and policy implications of lessons learned. The empirical results show that vulnerability of the more mature SHG members declines significantly. Vulnerability also falls for villages with better infrastructure and for SHGs that are formed by NGOs and linked by banks. The results strongly demonstrate that on average, there is a significant increase in the empowerment of the female participants. The economic impact of SBLP is found to be the most empowering. Greater autonomy and changes in social attitudes also lead to female empowerment. The investigation further reveals that training (especially business training) has a definite positive impact on assets but not on income. The impact

of training can be improved through better infrastructure (as in paved roads), linkage model type, and the training organiser. Bridging the gap in the existing literature and between academics and practitioners, this book moves beyond the usual theoretical issues in the impact assessment literature and draws on new developments in methodology. It will be of interest to academics, development practitioners and students of economics, political science, sociology, public policy and development studies.
