Biofuels and Bioenergy John Love, John A.
Bryant, 2017-02-28 With increased public and
scientific attention driven by factors such as oil
price spikes, the need for increased energy
security, and concerns over greenhouse gas
emissions from fossil fuels, the production of
fuels by biological systems is becoming
increasingly important as the world seeks to move
towards renewable, sustainable energy sources.
Biofuels and Bioenergy presents a broad, wide-
ranging and informative treatment of biofuels. The
book covers historical, economic, industrial,
sociological and ecological/environmental
perspectives as well as dealing with all the major
scientific issues associated with this important
topic. With contributions from a range of leading
experts covering key aspects, including: •
Conventional biofuels. • Basic biology,
biochemistry and chemistry of different types and
classes of biofuel. • Current research in
synthetic biology and GM in the development and

exploitation of new biofuel sources. • Aspects relating to ecology and land use, including the fuel v food dilemma. • Sustainability of different types of biofuel. • Ethical aspects of biofuel production. Biofuels and Bioenergy provides students and researchers in biology, chemistry, biochemistry and chemical engineering with an accessible review of this increasingly important subject.

A systematic revision of *Operclipygus* Marseul (Coleoptera, Histeridae, Exosternini) Michael Stephen Caterino, Alexey K. Tishechkin, 2013-02-20
This monograph presents a comprehensive taxonomic revision of the hyperdiverse Neotropical beetle genus *Operclipygus* Marseul. *Operclipygus* occurs almost throughout the Americas, but there are few species that extend beyond the diverse tropical regions. The genus was originally defined very narrowly, for just a single unusual species (the type species *O. sulcistrius*). However, evolutionary considerations have led to a much broader conception of the genus, and it is now one of the largest in the entire family Histeridae, containing 177 species. In this paper 138 species are described as new. Identification keys are presented to allow identification of all the species, and most species are illustrated by color photographs and drawings of diagnostic characteristics. Natural history details for species of *Operclipygus* are scant, as most specimens have been collected through the use of passive flight interception traps. They are known to be predaceous, and many are probably generally associated with decaying vegetation and leaf

litter, where they prey on small arthropods. But a small proportion are known to be inquilines, living in symbiotic relationships with social insects such as ants and termites, and also with some burrowing mammals, such as Tuco-tucos.

A systematic revision of Baconia Lewis (Coleoptera, Histeridae, Exosternini) Michael S. Caterino, Alexey K. Tishechkin, 2013-10-15 This monograph presents a comprehensive taxonomic revision of the genus *Baconia* Lewis (Histeridae: Histerinae: Exosternini). Previously, *Baconia* contained 27 species. We move four species into *Baconia* from other genera, and describe 85 species as new, bringing the total to 116 species. Identification keys are presented to allow identification of all the species, and most species are illustrated by color photographs and drawings of diagnostic characteristics. The

species mainly occur in the Neotropical region. But several species are known from the U.S., and there are even species occurring in eastern and southeastern Asia. Many of the species of *Baconia* exhibit brilliant metallic coloration, a feature of as yet unknown significance. Many are also strongly flat-tened, an adaptation for a life under the bark of dead trees, where they are believed mainly to prey on bark beetles and their larvae.

Gerenciamento de serviços de TI na prática Ivan Luiz Magalhães, Walfrido Brito Pinheiro, 2007 Com o crescente aumento da dependência das organizações em relação à Tecnologia da Informação (TI), a importância do Gerenciamento de Serviços de TI torna-se maior a cada dia. É uma excelente oportunidade para a TI demonstrar seu valor e competência no sentido de alavancar e levar inovação aos processos de negócio. Mas não é uma tarefa simples. Demanda clareza de foco e muita atenção da área de TI. A industrialização de TI permite obter, de forma mais estruturada, os incrementos de produtividade e os níveis de serviços desejados, associados à redução de custos nos Serviços de TI. Para suportar esta proposta, os autores adotaram as melhores práticas da ITIL, as recomendações da ISO/IEC 20.000 e os fundamentos da IT Flex como guias para estabelecer a implementação deste conceito. Na opinião dos autores, a abordagem estruturada da ITIL, que reúne um conjunto de melhores práticas, provê um abrangente e consistente método para a identificação de processos-chave e o alinhamento dos Serviços de TI às necessidades da organização.

Sua abordagem qualitativa para o uso econômico, efetivo, eficaz e eficiente da infra-estrutura de TI, prepara a organização para a redução de custos em função do aumento da eficiência na entrega e no suporte dos Serviços de TI, incrementando a capacidade de geração de receita e a concentração de esforços em novos projetos alinhados à estratégia de negócio da organização. Este livro apresenta uma abordagem prática para a implementação do Gerenciamento de Serviços de TI com base na ITIL (Information Technology Infrastructure Library), a partir da estruturação de um sistema de gerenciamento apoiado na visão de processos industriais, tanto para a fase do projeto de implantação quanto para a fase de operação dos processos e entrega dos resultados.

Medienmanagement Gerrit Brösel, Frank Keuper, 2015-03-10 Da die Medienwirtschaft zu den jüngeren Disziplinen der Wirtschaftswissenschaften gehört, existieren bisher nur wenige akademische Lehrbücher, in denen Studenten Aufgaben mit Lösungen oder Fallstudien finden. Die Herausgeber des Fallstudiensammelbandes Medienmanagement haben sich deshalb zum Ziel gesetzt, ,mit der Zusammenstellung geeigneter Übungsaufgaben und Lösungen die bestehende Lücke innerhalb der medienökonomischen Studien- und Übungsbücher zu schließen. Das Konzept des Buches stellt ein sinnvolles Instrument zur Unterstützung der Lehre an Hochschulen und zum Selbststudium in diesem Fachgebiet da. Den Herausgebern ist es gelungen, namhafte Autoren aus der Wissenschaft und Praxis zur Bearbeitung dieses komplexen und aktuellen Problemfeldes zu gewinnen. Sowohl Studierende, als auch Praktiker erhalten einen wertvollen Einblick in die Kernprobleme des Medienmanagements.

Renewable Energy: Problems and Prospects in Coachella Valley, California James B.

Pick, 2017-02-07 The book analyzes the problems and potential of renewable energy development for the Coachella Valley of California and provides a

useful case study for renewable energy feasibility assessments for other areas. A conceptual model, Integrated Policy Assessment Theory for Renewable Energy, is given and justified for renewable energy development in the Valley. Further, Central Place Theory, well known in urban geography, is discussed and it is seen to be very relevant to the understanding the Coachella Valley's city sizes and renewable energy markets, compared to the greater Los Angeles region. The book's research methods include geospatial mapping and analysis and interviews leaders in small innovative firms, government agencies, and nonprofits. The many findings of the book include evaluation of how the Valley's socioeconomic and transportation features influence renewable energy development, the scope of markets for solar and wind energy in the Valley, spatial confluences of renewable energy facilities with other features, and the future potential of ground-source heat pumps. Benchmark comparison of the Coachella Valley is done with two leading wind and solar regions elsewhere in the country, to assess the Valley's evolution and opportunities in renewable energy. The book concludes by evaluating the prospects and problems for the growth of renewable entrepreneurship, manufacturing, assembly, and operations in Coachella Valley. This leads to policy recommendations grounded in the book's research findings, which are intended for use by governments, businesses, and nonprofits. The hope is that many of the developmental experiences from the Coachella Valley will be helpful not only within the Valley but to other communities

nationwide and worldwide.

Sharing a border with its spiritual home, England is undoubtedly golf's exquisite front garden. "What really makes the book come alive is the

amount of research Michael has clearly put in. Only the most ardent golf historian wouldn't find out something new." –UKGolfGuy.com

Structural Motion Engineering Jerome

Connor, Simon Laflamme, 2014-06-26 This innovative volume provides a systematic treatment of the basic concepts and computational procedures for structural motion design and engineering for civil installations. The authors illustrate the application of motion control to a wide spectrum of buildings through many examples. Topics covered include optimal stiffness distributions for building-type structures, the role of damping in controlling motion, tuned mass dampers, base isolation systems, linear control, and nonlinear control. The book's primary objective the satisfaction of motion-related design requirements such as restrictions on displacement and acceleration and seeks the optimal deployment of material stiffness and motion control devices to achieve these design targets as well as satisfy constraints on strength. The book is ideal for practicing engineers and graduate students.
