Beach Ball Classic, The: Premier High School Hoops on the Grand Strand Ian Guerin ,2016 The Beach Ball Classic began in 1981 as a modest avenue for coach Dan D'Antoni to attract the attention of college scouts. It blossomed into one of the premier prep basketball tournaments in the nation. From Kobe Bryant and Vince Carter to Roy Williams, some of the game's biggest stars and most colorful coaches have taken part. They also brought attention to an area generally overlooked in terms of high school sports. With calculated moves, a few risky decisions and nationwide sporting trends, the tournament continued to expand its influence. Author Ian Guerin recounts the famous faces, upcoming stars and business acumen that have made the Classic an iconic event for thirty-five years.

Full-3D Seismic Waveform Inversion Po Chen,En-Jui Lee,2015-09-10 This book introduces a methodology for solving the seismic inverse problem using purely numerical solutions built on 3D wave equations and which is free of the approximations or simplifications that are common in classical seismic inversion methodologies and therefore applicable to arbitrary 3D geological media and seismic source models. Source codes provided allow readers to experiment with the calculations demonstrated and also explore their own applications.

The Art and Inventions of Max Fleischer Ray Pointer,2017-06-09 The history of animated cartoons has for decades been dominated by the accomplishments of Walt Disney, giving the impression that he invented the medium. In reality, it was the work of several pioneers. Max Fleischer--inventor of the Rotoscope technique of tracing animation frame by frame over live-action footage--was one of the most prominent. By the 1930s, Fleischer and Disney were the leading producers of animated films but took opposite approaches. Where Disney reflected a Midwestern sentimentality, Fleischer presented a sophisticated urban attitude with elements of German Expressionism and organic progression. In contrast to Disney's naturalistic animation, Fleischer's violated physical laws, supporting his maxim: If it can be done in real life, it isn't animation. As a result, Fleischer's cartoons were rough rather than refined, commercial rather than consciously artistic--yet attained a distinctive artistry through Fleischer's innovations. This book covers his life and work and the history of the studio that bore his name, with previously unpublished artwork and photographs.

The Last Lecture Randy Pausch,2008-04-08 After being diagnosed with terminal cancer, a professor shares the lessons he's learned—about living in the present, building a legacy, and taking full advantage of the time you have—in this life-changing classic. We cannot change the cards we are dealt, just how we play the hand. —Randy Pausch A lot of professors give talks titled The Last Lecture. Professors are asked to consider their demise and to ruminate on what matters most to them. And while they speak, audiences can't help but mull over the same question: What wisdom would we impart to the world if we knew it was our last chance? If we had to vanish tomorrow, what would we want as our legacy? When Randy Pausch, a computer science professor at Carnegie

Mellon, was asked to give such a lecture, he didn't have to imagine it as his last, since he had recently been diagnosed with terminal cancer. But the lecture he gave—Really Achieving Your Childhood Dreams—wasn't about dying. It was about the importance of overcoming obstacles, of enabling the dreams of others, of seizing every moment (because time is all you have . . . and you may find one day that you have less than you think). It was a summation of everything Randy had come to believe. It was about living. In this book, Randy Pausch has combined the humor, inspiration and intelligence that made his lecture such a phenomenon and given it an indelible form. It is a book that will be shared for generations to come.

Animation in China Sean Macdonald, 2015-11-06 By the turn of the 21st century, animation production has grown to thousands of hours a year in the People's Republic of China (PRC). Despite this, and unlike American blockbuster productions and the diverse genres of Japanese anime, much animation from the PRC remains relatively unknown. This book is an historical and theoretical study of animation in the PRC. Although the Wan Brothers produced the first feature length animated film in 1941, the industry as we know it today truly began in the 1950s at the Shanghai Animation Film Studio (SAFS), which remained the sole animation studio until the 1980s. Considering animation in China as a convergence of the institutions of education, fine arts, literature, popular culture, and film, the book takes comparative approaches that link SAFS animation to contemporary cultural production including American and Japanese animation, Pop Art, and mass media theory. Through readings of classic films such as *Princess Iron Fan*, *Uproar in Heaven*, *Princess Peacock*, and *Nezha Conquers the Dragon King*, this study represents a revisionist history of animation in the PRC as a form of postmodernism with Chinese characteristics. As a theoretical exploration of animation in the People's Republic of China, this book will appeal greatly to students and scholars of animation, film studies, Chinese studies, cultural studies, political and cultural theory.

Enigmas Floyd Merrell, 2015-12-19 Four married couples from the southwest search for Spanish treasure in northern Mexico, guided by a peculiar map. They meet strange four-dimensional visitors from another world, Tarahumara people with a unique philosophy of life, local bandits roaming the area, narcos ready to kill any and all outsiders, and suspicious police and military personnel. Yet, they become enchanted by the vast Sierra Madre range, they find treasure that exceeds their wildest dreams, and unfortunately they begin squabbling over the take, until the alien visitors sequester most of it. Back home, they make amends, but soon realize their adventure, bizarre to the extreme, will continue haunting them to the end.

Visualizing Mathematics with 3D Printing Henry Segerman, 2016-10-04 The first book to explain mathematics using 3D printed models. Winner of the Technical Text of the Washington Publishers Wouldn't it be great to experience three-dimensional ideas in three dimensions? In this book—the first of its

kind—mathematician and mathematical artist Henry Segerman takes readers on a fascinating tour of two-, three-, and four-dimensional mathematics, exploring Euclidean and non-Euclidean geometries, symmetry, knots, tilings, and soap films. *Visualizing Mathematics with 3D Printing* includes more than 100 color photographs of 3D printed models. Readers can take the book's insights to a new level by visiting its sister website, 3dprintmath.com, which features virtual three-dimensional versions of the models for readers to explore. These models can also be ordered online or downloaded to print on a 3D printer. Combining the strengths of book and website, this volume pulls higher geometry and topology out of the realm of the abstract and puts it into the hands of anyone fascinated by mathematical relationships of shape. With the book in one hand and a 3D printed model in the other, readers can find deeper meaning while holding a hyperbolic honeycomb, touching the twists of a torus knot, or caressing the curves of a Klein quartic.

AutoBATS and 3D MUSIC: New Approaches to Imaging Earthquake Rupture Behaviors Pei-Ru Jian, 2021-09-27 This book presents the kinematic earthquake rupture studies from moment tensor to spatial-temporal rupture imaging. For real-time seismic hazard monitoring, the new stable automatic moment tensor (AutoBATS) algorithm is developed and implemented for the real-time MT reports by the Taiwan Earthquake Science Information System (TESIS). In order to understand the rupture behavior of the 2013 Mw 8.3 Okhotsk deep earthquake sequence, the 3D Multiple Signal Classification Back Projection (MUSIC BP) with P and pP phases is applied. The combined P- and pP-wave BP imaging of the mainshock shows two stages of anti-parallel ruptures along two depths separating for about 10~15 km. Unusual super-shear ruptures are observed through the 3D BP images of two Mw 6.7 aftershocks. In last two chapters, the 3D BP imaging reveals similar rupture properties of two shallow catastrophic earthquakes (Mw=6.4) in southwestern Taiwan. Both the 2010 Jiashian and 2016 Meinong earthquakes ruptured westward with similar velocity of ~2.5 km/s along a NE-ward shallow dipping blind fault. The rupture similarities of the doublet suggest two parallel elongate asperities along the causative fault. After several decades of seismic quiescence, the 2010 Jiashian event initiated the rupture at the deeper asperity and triggered the shallower asperity which caused catastrophes six years later.

Artificial Hells Claire Bishop, 2012-07-24 This searing critique of participatory art—from its development to its political ambitions—is “an essential title for contemporary art history scholars and students as well as anyone who has . . . thought, ‘Now that’s art!’ or ‘That’s art?’” (Library Journal) Since the 1990s, critics

and curators have broadly accepted the notion that participatory art is the ultimate political art: that by encouraging an audience to take part an artist can promote new emancipatory social relations. Around the world, the champions of this form of expression are numerous, ranging from art historians such as Grant Kester, curators such as Nicolas Bourriaud and Nato Thompson, to performance theorists such as Shannon Jackson. *Artificial Hells* is the first historical and theoretical overview of socially engaged participatory art, known in the US as “social practice.” Claire Bishop follows the trajectory of twentieth-century art and examines key moments in the development of a participatory aesthetic. This itinerary takes in Futurism and Dada; the Situationist International; Happenings in Eastern Europe, Argentina and Paris; the 1970s Community Arts Movement; and the Artists Placement Group. It concludes with a discussion of long-term educational projects by contemporary artists such as Thomas Hirschhorn, Tania Bruguera, Pawel Althamer and Paul Chan. Since her controversial essay in *Artforum* in 2006, Claire Bishop has been one of the few to challenge the political and aesthetic ambitions of participatory art. In *Artificial Hells*, she not only scrutinizes the emancipatory claims made for these projects, but also provides an alternative to the ethical (rather than artistic) criteria invited by such artworks. *Artificial Hells* calls for a less prescriptive approach to art and politics, and for more compelling, troubling, and bolder forms of participatory art and criticism.

Life at the Precipice R.F. Vincent,2023-07-14 In 1959 an earthquake in central Vancouver Island devastated the lakeside community of Pyrite Ridge. The seismic event triggered landslides that isolated the town and killed sixteen people, while a geological phenomenon known as a segue caused the lake to drop an astonishing 150 metres. Perched on the precipice of a yawning abyss and cut off from the world by tons of rubble, Pyrite Ridge became a place of myth and lore. After finding a newspaper attached to a red balloon that supposedly came from the town, Travis Sivart, an Air Force officer struggling with post-traumatic stress disorder, sets out to investigate the legend of Pyrite Ridge. After an arduous journey he stumbles upon the community, now known as The Segway, which is inhabited by an eclectic group of thirty people. Travis spends a week in the town, learning of its remarkable history and interacting with the unforgettable residents. Everyone has their own compelling tale of how they came to The Segway, creating an extraordinary tapestry that causes Travis to question his own sanity. Is there a connection between his personal demons and the tragic events of 1959? *Life at the Precipice* seamlessly blends fact, fiction, and popular science in a unique combination of drama and humor that will have readers wondering if the mysterious town of The Segway actually exists.
