The Ameriguns ,2020 Of all the firearms in the world owned by private citizens for non-military purposes, half are in the United States of America. In number they exceed the country's population: 393 million for 372 million people. Photographer Gabriele Galimberti has travelled to every corner of the United States, to meet proud gun-owners, and to see their firearms collections. These, often unsettling, portraits, along with the accompanying stories of the owners and their firearms, provide an uncommon and unexpected insight into what today is really represented by the institution of the Second Amendment.

Marine Anthropogenic Litter Melanie Bergmann,Lars Gutow,Michael Klages,2015-06-01 This book describes how man-made litter, primarily plastic, has spread into the remotest parts of the oceans and covers all aspects of this pollution problem from the impacts on wildlife and human health to socio-economic and political issues. Marine litter is a prime threat to marine wildlife, habitats and food webs worldwide. The book illustrates how advanced technologies from deep-sea research, microbiology and mathematic modelling as well as classic beach litter counts by volunteers contributed to the broad awareness of marine litter as a problem of global significance. The authors summarise more than five decades of marine litter research, which receives growing attention after the recent discovery of great oceanic garbage patches and the ubiquity of microscopic plastic particles in marine organisms and habitats. In 16 chapters, authors from all over the world have created a universal view on the diverse field of marine litter pollution, the biological impacts, dedicated research activities, and the various national and international legislative efforts to combat this environmental problem. They recommend future research directions necessary for a comprehensive understanding of this environmental issue and the development of efficient management strategies. This book addresses scientists, and it provides a solid knowledge base for policy makers, NGOs, and the broader public.

The Geography of Bliss Eric Weiner,2008-01-03 Now a new series on Peacock with Rainn Wilson, THE GEOGRAPHY OF BLISS is part travel memoir, part humor, and part twisted self-help guide that takes the viewer across the globe to investigate not what happiness is, but WHERE it is. Are people in Switzerland happier because it is the most democratic country in the world? Do citizens of Qatar, awash in petrodollars, find joy in all that cash? Is the King of Bhutan a visionary for his initiative to calculate Gross National Happiness? Why is Asheville, North Carolina so damn happy? In a unique mix of travel, psychology, science and humor, Eric Weiner answers those questions and many others, offering travelers of all moods some interesting new ideas for sunnier destinations and dispositions.

Traffic Signal Timing Manual U.s. Department of Transportation,Federal Highway Administration,2015-02-20 This report serves as a comprehensive guide to traffic signal timing and documents the tasks completed in association with its development. The focus of this document is on traffic signal control principles, practices, and procedures. It describes the relationship between traffic signal timing and transportation policy and addresses maintenance and operations of traffic signals. It represents a synthesis of traffic signal timing concepts and their application and focuses on the use of detection, related timing parameters, and resulting effects to users at the intersection. It discusses advanced topics briefly to raise awareness related to their use and application. The purpose of the Signal Timing Manual is to provide direction and guidance to managers, supervisors, and practitioners based on sound practice to proactively and comprehensively improve signal timing. The outcome of properly training staff and proactively operating and maintaining traffic signals is signal timing that reduces congestion and fuel consumption ultimately improving our quality of life and the air we breathe. This manual provides an easy-to-use concise, practical and modular guide on signal timing. The elements of signal timing from policy and funding considerations to timing plan development, assessment, and maintenance are covered in the manual. The manual is the culmination of research into practices across North America and serves as a reference for a range of practitioners, from those involved in the day to day management, operation and maintenance of traffic signals to those that plan, design, operate and maintain these systems.

Translating Mount Fuji Dennis Washburn,2006-11-07 Dennis Washburn traces the changing character of Japanese national identity in the works of six major authors: Ueda Akinari, Natsume S?seki, Mori ?gai, Yokomitsu Riichi, ?oka Shohei, and Mishima Yukio. By focusing on certain interconnected themes, Washburn illuminates the contradictory desires of a nation trapped between emulating the West and preserving the traditions of Asia. Washburn begins with Ueda's Ugetsu monogatari (Tales of Moonlight and Rain) and its preoccupation with the distant past, a sense of loss, and the connection between values and identity. He then considers the use of narrative realism and the metaphor of translation in Soseki's Sanshiro; the relationship between ideology and selfhood in Ogai's Seinen; Yokomitsu Riichi's attempt to synthesize the national and the cosmopolitan; Ooka Shohei's post-World War II representations of the ethical and spiritual crises confronting his age; and Mishima's innovative play with the aesthetics of the inauthentic and the artistry of kitsch. Washburn's brilliant analysis teases out common themes concerning the illustration of moral and aesthetic values, the crucial role of autonomy and authenticity in defining notions of culture, the impact of cultural translation on ideas of nation and subjectivity, the ethics of identity, and the hybrid quality of modern Japanese society. He pinpoints the persistent anxiety that influenced these authors' writings, a struggle to translate rhetorical forms of Western literature while preserving elements of the pre-Meiji tradition. A unique combination of intellectual history and critical literary analysis, Translating Mount Fuji recounts the evolution of a conflict that inspired remarkable literary experimentation and achievement.

Responding to Oil Spills in the U.S. Arctic Marine Environment National Research Council,Transportation Research Board,Marine Board,Division on Earth and Life Studies,Polar Research Board,Ocean Studies Board,Committee on Responding to Oil Spills in the U.S. Arctic Marine Environment,2014-08-01 U.S. Arctic waters north of the Bering Strait and west of the Canadian border encompass a vast area that is usually ice covered for much of the year, but is increasingly experiencing longer periods and larger areas of open water due to climate change. Sparsely inhabited with a wide variety of ecosystems found nowhere else, this region is vulnerable to damage from human activities. As oil and gas, shipping, and tourism activities increase, the possibilities of an oil spill also increase. How can we best prepare to respond to such an event in this challenging environment? *Responding to Oil Spills in the U.S. Arctic Marine Environment* reviews the current state of the science regarding oil spill response and environmental assessment in the Arctic region north of the Bering Strait, with emphasis on the potential impacts in U.S. waters. This report describes the unique ecosystems and environment of the Arctic and makes recommendations to provide an effective response effort in these challenging conditions. According to *Responding to Oil Spills in the U.S. Arctic Marine Environment*, a full range of proven oil spill response technologies is needed in order to minimize the impacts on people and sensitive ecosystems. This report identifies key oil spill research priorities, critical data and monitoring needs, mitigation strategies, and important operational and logistical issues. The Arctic acts as an integrating, regulating, and mediating component of the physical, atmospheric and cryospheric systems that govern life on Earth. Not only does the Arctic serve as regulator of many of the Earth's large-scale systems and processes, but it is also an area where choices made have substantial impact on life and choices everywhere on planet Earth. This report's recommendations will assist environmentalists, industry, state and local policymakers, and anyone interested in the future of this special region to preserve and protect it from damaging oil spills.

A Dictionary of Cebuano Visayan John Wolff,2016-01-27 This is a dictionary of Cebuano Visayan, the language of the central part of the Philippines and much of Mindanao. Although the explanations are given in English, the aim of this work is not to provide English equivalents but to explain Cebuano forms in terms of themselves. It is meant as a reference work for Cebuano speakers and as a tool for students of the Cebuano language. There is a total of some 25,000 entries and an addenda of 700 forms which were prepared after the dictionary had been composed. This dictionary is the product of eleven years work by more than a hundred persons. The work was edited by John Wolff but the sources are entirely native, and all illustrations are composed by native speakers. To date, this work probably represents the most authoritative dictionary of the Cebuano Visayan language.
