community of Oceanside Heights is a mess. Ghostwriter Anne Hardaway's cottage-by-the-sea has seen better days to begin with, but she reluctantly decides to repair her rotting basement floor. Never mind that her newest assignment is writing a how-to home repair book for women—she still can barely tell a flat head from a Phillips, a lack of skill she's grateful for when her handyman finds a twenty-year-old skeleton buried in the dirt beneath her basement's wooden floor. And The Forecast Calls For A Chance Of Scattered Murders When her gruesome guest turns out to be the psychologist who treated her mother in the mid-70's, Anne must consider whether her own mother could have been the killer. Some discreet investigating soon leads Anne to Sunnyside Nursing Home where elderly clients are dying at an alarming rate and the staff makes Nurse Ratched look endearing. Before she can say riptide, Anne is hip deep in the residue of a killer storm and uncovering a tale of dark desire that makes the climate ripe for more murder.

Ocean Steve Mentz, 2020-03-19 Object Lessons is a series of short, beautifully designed books about the hidden lives of ordinary things. The ocean comprises the largest object on our planet. Retelling human history from an oceanic rather than terrestrial point of view unsettles our relationship with the natural environment. Our engagement with the world's oceans can be destructive, as with today's deluge of plastic trash and acidification, but the mismatch between small bodies and vast seas also emphasizes the frailty and resilience of human experience. From ancient stories of shipwrecked sailors to the containerized future of 21st-century commerce, Ocean splashes the histories we thought we knew into salty and unfamiliar places. Object Lessons is published in partnership with an essay series in The Atlantic.

Federico Fellini Hava Aldouby, 2013-12-11 Federico Fellini professed a desire to create “an entire film made of immobile pictures.” In this study, Hava Aldouby uses this quotation as a launching point to analyze Fellini's films as sequences of “pictures” that draw extensively on art history, and particularly painting, as a reservoir of visual imagery. Aldouby employs an innovative pictorial approach that allows her to uncover a wealth of visual evocations overlooked by Fellini scholars over the years. Federico Fellini: Painting in Film, Painting on Film sheds light on the intertextual links between Fellini's films and the works of various artists, from Velazquez to Francis Bacon, by identifying references to specific paintings in his films. Using new archival evidence from Fellini's private library, brought to light for the first time here, Aldouby draws out Fellini's in-depth knowledge of art history and his systematic employment of art-historical allusions.

The Ocean Is Alive Glenn Edney, 2016-04-11 The Ocean covers over 70 percent of our planet's surface and accounts for 97-99 percent of the liveable biosphere. She is the cradle of our existence and the heart of our blue home, a vast, living and breathing superorganism. The Ocean Is Alive is first and foremost a celebration of the Ocean in all her living splendour. It takes the reader on a fascinating and informative voyage of discovery into the blue heart of our planet, from the Ocean's formation more than four billion years ago and the emergence of life deep below her surface, to the incredible diversity and exuberance we know today. But much more than this, it is a journey of discovery into Ocean consciousness: through the evolution of the senses, the emergence of sentient behaviour, and finally an intriguing exploration of what the author calls 'Ocean Mind'. In telling the Ocean's story Glenn Edney draws on his thirty years experience as an Ocean ecologist, underwater naturalist and professional diver to take us beyond the science and into the depths of what it is like to be an Ocean being. Using a combination of personal experience, stories and insights from others, along with guided visualizations, the author weaves a highly readable and thought provoking tale of an Ocean alive to itself, and alive to anyone willing to 'take the plunge'. But no contemporary story of the Ocean would be complete without investigating the current threats to the Ocean's wellbeing. In addressing these issues the author presents a compelling case for recognition of the Ocean as a living being with intrinsic value far beyond the benefits she provides humanity, and offers a new vision for our relationship with the living Ocean.
