**Popular Music** Roy Shuker, 2005 With 'Key Concepts in Popular Music', Roy Shuker presents a comprehensive A-Z glossary of the main terms and concepts used in the study of popular music.

Making Music with Samples Daniel Duffell, 2005-01-01 Making Music With Samples is packed with creative, hands-on tips - aimed at getting the reader actively enjoying the art of sampling as quickly and easily as possible - interspersed with snippets of essential theoretical stuff: whether it's the science of

sound, or copyright legalities. Starting with the absolute basics of what sampling is, author Dan Duffell progresses from simpler, widely-used tools like small loop-based samplers, through the various platforms available to the sample user - the different methods and equipment required to create and manipulate samples, including: hardware samplers, sampling/keyboard workstations, computer setups, software samplers, drum samplers, etc. He then describes the setting up procedures needed to get you started - connections and installation, signal levels and so on - at the same time providing some relevant background information on how a sampler actually works. Next: choosing source material - whether created you, or from sample CDs like the one attached, or from other people's recordings - which inevitably also raises the thorny subject of copyright and licensing: sampling and the law. Then there's a section depicting the basic layout and operation of some well-known software and hardware samplers, and a look at Sampling & Synthesis and Modular Systems...

For current and preservice music teachers and designed as a development tool, reference resource, and basic teaching text, it addresses pedagogical issues and the use of computers to aid production and presentation of students' musical works. Written by a music educator and digital media specialist, it cuts through the jargon to present a concise, easy-to-digest overview of the field, covering: notation software MIDI sound creation downloading music posting personal MP3s for mass distribution.
