**Wings of Thought** Kahlil Gibran, 2011-12-20 A critical exploration of the life's work of one of the twentieth century's most important philosophers and poets, Kahlil Gibran. Through his fiction, essays, poems, and art, Kahlil Gibran inspired a devoted international following and transformed modern Arabic literature. In this book, Joseph P. Ghougassian brings together the philosophical elements present across Gibran's diverse writings, including his bestselling work *The Prophet*, as well as other significant works such as *The Broken Wings*, which tells the story of doomed young lovers, and the collection of aphorisms in *Sand and Foam*. Excerpts from Gibran's letters provide a window into his mind, heart, and soul, creating a biography of this groundbreaking, mystical writer unlike any other. This systematic collection introduces Gibran as a "people's philosopher," who used simple, straightforward language to reveal a worldview of rich, deep meaning.

**Everybody (Else) Is Perfect** Gabrielle Korn, 2021-01-26 From the former editor-in-chief of *Nylon* comes a provocative and intimate collection of personal and cultural essays featuring eye-opening explorations of hot button topics for modern women, including internet feminism, impossible beauty standards in social media, shifting ideals about sexuality, and much more. Gabrielle Korn starts her professional life with all the right credentials. Prestigious college degree? Check. A loving, accepting family? Check. Instagram-worthy offices and a tight-knit group of friends? Check, check. Gabrielle's life seems to reach the crescendo of perfect when she gets named the youngest editor-in-chief in the history of one of fashion's most influential publications. Suddenly she's invited to the world's most epic parties, comped beautiful clothes and shoes from trendy designers, and asked to weigh in on everything from gay rights to lip gloss on one of the most influential digital platforms. But behind the scenes, things are far from perfect. In fact, just a few months before landing her dream job, Gabrielle's health and wellbeing are on the line, and her promotion to editor-in-chief becomes the ultimate test of strength. In this collection of inspirational and searing essays, Gabrielle reveals exactly what it's truly like in the fashion world, trying to find love as a young lesbian in New York City, battling with anorexia, and trying not to lose herself in a mirage of women's empowerment and Instagram perfection. Through deeply personal essays, Gabrielle recounts her struggles to reconcile her long-held insecurities about her body while coming out in the era of *The L Word*, where swoon-worthy lesbians are portrayed as skinny, fashion-perfect, and power-hungry. She takes us with her everywhere from New York Fashion Week to the doctor's office, revealing that the forces that try to keep women small are more pervasive than anyone wants to admit, especially in a world that's been newly branded as woke. From #MeToo to commercialized body positivity, Korn's biting, darkly funny analysis turns feminist commentary on its head. Both an in-your-face take on impossible beauty standards and entrenched media ideals and an inspiring call for personal authenticity, this powerful collection is ideal for fans of Roxane Gay and Rebecca Solnit.

**Handbook of Positive Body Image and Embodiment** Niva Piran, 2019-04-02 For five decades, negative body image has been a major focus of study due to its association with psychological and social morbidity, including eating disorders. However, more recently the body image construct has broadened to include positive ways of living in the body, enabling greater understanding of embodied well-being, as well as protective factors and interventions to guide the prevention and treatment of eating disorders. *Handbook of Positive Body Image and Embodiment* is the first comprehensive, research-based resource to address the breadth of innovative theoretical concepts and related practices concerning positive ways of living in the body, including positive body image and embodiment. Presenting 37 chapters by world-renowned experts in body image and eating behaviors, this state-of-the-art collection delineates constructs of positive body image and embodiment, as well as social environments (such as families, peers, schools, media, and the Internet) and therapeutic processes that can enhance them. Constructs examined include positive embodiment, body appreciation, body functionality, body image flexibility, broad conceptualization of beauty, intuitive eating, and attuned sexuality. Also discussed are protective factors, such as environments that promote body acceptance, personal safety, diversity, and activism, and a resistant stance towards objectification, media images, and restrictive feminine ideals. The handbook also explores how therapeutic interventions (including Acceptance and Commitment Therapy, Cognitive Dissonance, and many more) and public health and policy initiatives can inform scholarly, clinical, and prevention-based work in the field of eating disorders.

**The Algorithmic Beauty of Plants** Przemyslaw Prusinkiewicz, Aristid Lindenmayer, 2012-12-06 Now available in an affordable softcover edition, this classic in Springer's acclaimed *Virtual Laboratory* series is the first comprehensive account of the computer simulation of plant development. 150 illustrations, one third of them in colour, vividly demonstrate the spectacular results of the algorithms used to model plant shapes and developmental processes. The latest in computer-generated images allow us to look at plants growing, self-replicating, responding to external factors

and even mutating, without becoming entangled in the underlying mathematical formulae involved. The authors place particular emphasis on Lindenmayer systems - a notion conceived by one of the authors, Aristid Lindenmayer, and internationally recognised for its exceptional elegance in modelling biological phenomena. Nonetheless, the two authors take great care to present a survey of alternative methods for plant modelling.

**The New Cambridge Bibliography of English Literature: Volume 2, 1660-1800** George Watson,1971-07-02 More than fifty specialists have contributed to this new edition of volume 2 of The Cambridge Bibliography of English Literature. The design of the original work has established itself so firmly as a workable solution to the immense problems of analysis, articulation and coordination that it has been retained in all its essentials for the new edition. The task of the new contributors has been to revise and integrate the lists of 1940 and 1957, to add materials of the following decade, to correct and refine the bibliographical details already available, and to re-shape the whole according to a new series of conventions devised to give greater clarity and consistency to the entries.

**Shades of Difference** Evelyn Nakano Glenn,2009-01-23 Shades of Difference addresses the widespread but little studied phenomenon of colorism—the preference for lighter skin and the ranking of individual worth according to skin tone. Examining the social and cultural significance of skin color in a broad range of societies and historical periods, this insightful collection looks at how skin color affects people's opportunities in Latin America, Asia, Africa, and North America. Is skin color bias distinct from racial bias? How does skin color preference relate to gender, given the association of lightness with desirability and beauty in women? The authors of this volume explore these and other questions as they take a closer look at the role Western-dominated culture and media have played in disseminating the ideal of light skin globally. With its comparative, international focus, this enlightening book will provide innovative insights and expand the dialogue around race and gender in the social sciences, ethnic studies, African American studies, and gender and women's studies.
