Corporate Responses to EU Emissions Trading Jon Birger Skjærseth, Per Ove Eikeland, 2016-05-13 The European Union (EU) aims to put Europe on track toward a low-carbon economy. In this striking challenge, the EU Emissions Trading System (EU ETS) has been singled out as the Union's key climate policy instrument,

ultimately aimed as a model for a global carbon market. The learning effect of the EU ETS could thus be tremendous. This study explores how the EU ETS actually works on the ground, affecting corporate climate strategies. It covers general sector responses as well as systematic comparative studies of companies across the sectors. The latter enables improved understanding of causal effects and the role of interaction between different policy instruments and other factors that impact corporate climate strategies. The study explores a broad set of mechanisms at play potentially linking the EU ETS to company climate strategies. These include how corporate norms of responsibility are affected by the EU ETS and how economic incentives provide opportunities for innovation. The book's main contribution lies in its systematic examination of corporate responses to the EU ETS from a broad empirical and analytical social science perspective covering companies in all main EU ETS sectors: electric power, oil, cement, steel and pulp and paper.

Kosovo and International Law Peter Hilpold, 2012-06-08 The ICJ's Opinion on Kosovo of 22 July 2010 has touched upon many pivotal questions of international law. This book contains a comprehensive stock-taking on this subject written by several

international law experts from different European countries.

Military Crisis Management Operations by NATO and the EU

Claudia Fahren-Hussey, 2018-09-06 This book analyzes both NATO's and the EU's military crisis management operations and provides an explanation for the fact that it is sometimes NATO, sometimes the EU, and sometimes both international organizations that intervene militarily in a conflict. In detailed case studies on Libya, Chad/Central African Republic, and the Horn of Africa, Claudia Fahren-Hussey shows that the capabilities and preferences of the organizations matter most and the organizations' bureaucratic actors influence the decision-making process of the member states.

Key Readings in Journalism Elliot King, Jane

Chapman, 2012-11-12 Key Readings in Journalism brings together over thirty essential writings that every student of journalism should know. Designed as a primary text for undergraduate students, each reading was carefully chosen in response to extensive surveys from educators reflecting on the needs of today's journalism classroom. Readings range from critical and historical studies of journalism, such as Walter Lippmann's Public Opinion and Michael Schudson's Discovering the News, to examples of classic

reporting, such as Carl Bernstein and Bob Woodward's All the President's Men. They are supplemented by additional readings to broaden the volume's scope in every dimension, including gender, race, and nationality. The volume is arranged thematically to enable students to think deeply and broadly about journalism—its development, its practice, its key individuals and institutions, its social impact, and its future—and section introductions and headnotes precede each reading to provide context and key points for discussion.

Society and Nation in Transnational Processes in Europe

Adam Jarosz, Miloš Kopezník, 2015-09-18 The modern nation is an organisational form of society that has undergone numerous changes throughout history. The concept of the nation in Europe in the nineteenth century has been posed and answered in the past, but, as the basic conditions of its existence change, it is essential that this important question be asked again. Without doubt, the modern nation realizes the promises of solidarity and community which are so attractive to the masses, and has a profound effect on identity formation. Without these structures originally put in place by civil society, self-organization as the implementation of national thought is unimaginable. Understanding the necessity and

the possibility of the designability of society through the idea of nation and the functionality of civil society determines the strength and stability of the national movement.

The European Union's Africa Policies Daniela

Sicurelli, 2016-12-05 The European Union (EU) is a key partner for African regional organizations and a major promoter of economic and political integration in the region. Several studies have interpreted the EU's role in Africa as either a self-interested hegemonic actor or as a value oriented normative power. In this volume, Daniela Sicurelli challenges these views by taking a closer look at Europe's policies towards Sub-Saharan Africa in the area of peacekeeping, trade and development, and environmental protection. Using fresh empirical evidence, including interviews with both European and African officials, she argues that the EU is far from becoming a unitary player in Africa. Lacking a clear strategy and coherent normative framework, the EU should be considered a multi-level actor, where national and supranational institutions have different interests and push forward contrasting views of what role Europe should play in Africa. The ability of single institutions to frame an issue as requiring either intergovernmental or supranational procedures appears crucial for shaping the content of

European Africa policies. An original contribution to the growing literature on the EU as an international actor, this book is extremely useful to scholars, researchers and policy-makers demanding critical work in the field of EU-Africa policy.

Transformations of Populism in Europe and the Americas John

Abromeit, York Norman, Gary Marotta, Bridget Maria

Chesterton, 2015-11-19 The recent resurgence of populist movements and parties has led to a revival of scholarly interest in populism. This volume brings together well-established and new scholars to reassess the subject and combine historical and theoretical perspectives to shed new light on the history of the subject, as well as enriching contemporary discussions. In three parts, the contributors explore the history of populism in different regions, theories of populism and recent populist movements. Taken together, the contributions included in this book represent the most comprehensive and wide-ranging study of the topic to date. Questions addressed include: - What are the 'essential' characteristics of populism? - Is it important to distinguish between left- and right-wing populism? - How can the transformation of populist movements be explained? This is the most thorough and up to date comparative historical study of populism available. As

such it will be of great value to anyone researching or studying the topic.

HL 97 - Europe in the World: Towards a More Effective EU Foreign and Security Strategy The Stationery Office, 2016-02-16

Europe faces an increasingly unstable and dangerous neighbourhood. The continuing war in Syria, a humanitarian crisis in the region and the weakening of state structures have created a combustible environment, which has contributed to the refugee and migration crisis and the rise of the so-called Islamic State of Iraq and the Levant (ISIL). Meanwhile, the conflict in eastern Ukraine appears to have become frozen, and relations with Russia are dominated by sanctions. In such a moment of uncertainty and upheaval, the discipline of developing a new strategy is welcome. First and foremost, a new EU foreign and security strategy must be underpinned by the recognition that the driving force in foreign policy is the Member States: it must provide the overarching framework for how Member States can act more collectively, and offer them the political framework to act within and through the EU. A new strategy for the EU must undertake a forthright process of prioritisation, agreed by the Member States. It should set out where the EU should act, and take into account what means it has at its

disposal. It must be driven by a sober assessment of the risks facing the Union, its security interests therein and a clear-sighted analysis of the resources the Union can bring to bear.

Comparative Law in Eastern and Central Europe Aleksander W. Bauknecht, Branislav Sitek, Jakub J. Szczerbowski, 2014-07-24

Comparative law is a research methodology which has been increasingly fashionable in recent decades, as comparisons between common law and civil law have dominated the law studies landscape. There are many methods of comparative law in use, including comparison of legal rules, comparison of cases, and comparison of legal theories. Each of these methods has strong proponents and opponents. Dogmatic comparisons of rules are criticized for not giving the whole picture of law in action, but praised for being the first and the only truly legal step in comparative research. Case-based comparisons are praised for enabling us to compare the true understanding of rules by courts, yet the critics of this method point out that only the higher courts' decisions are subject to comparison, and most cases do not reach this stage. Finally, comparisons of legal theories are praised for enabling us to know the spirit of the laws, yet opponents would argue that many countries sharing the same theory would draw

opposite conclusions from it. This book is a result of the attempted (and successful) introduction of comparative law into the region of Eastern and Central Europe. The subject has induced interest beyond expectations. This volume opens with a chapter on the unification of law, both from the perspective of institutional unification by such supra-state organizations, spontaneous and institutionalized unifications between two or more legal systems, and the methods of choosing the right rules in the unification process. Chapters two and three follow the classical division of private and public law, as proposed by the brilliant Roman lawyer Ulpian. Overall, the chapters in this book offer an interesting and engaging commentary on the current topics discussed by academics in Eastern and Central Europe.

Here She Is Hilary Levey Friedman, 2020-08-25 A fresh exploration of American feminist history told through the lens of the beauty pageant world. Many predicted that pageants would disappear by the 21st century. Yet they are thriving. America's most enduring contest, Miss America, celebrates its 100th anniversary in 2020. Why do they persist? In Here She Is, Hilary Levey Friedman reveals the surprising ways pageants have been an empowering feminist tradition. She traces the role of pageants

in many of the feminist movement's signature achievements, including bringing women into the public sphere, helping them become leaders in business and politics, providing increased educational opportunities, and giving them a voice in the age of #MeToo. Using her unique perspective as a NOW state president, daughter to Miss America 1970, sometimes pageant judge, and scholar, Friedman explores how pageants became so deeply embedded in American life from their origins as a P.T. Barnum spectacle at the birth of the suffrage movement, through Miss Universe's bathing beauties to the talent- and achievement-based competitions of today. She looks at how pageantry has morphed into culture everywhere from The Bachelor and RuPaul's Drag Race to cheer and specialized contests like those for children, Indigenous women, and contestants with disabilities. Friedman also acknowledges the damaging and unrealistic expectations pageants place on women in society and discusses the controversies, including Miss America's ableist and racist history, Trump's ownership of the Miss Universe Organization, and the death of child pageant-winner JonBenét Ramsey. Presenting a more complex narrative than what's been previously portrayed, Here She Is shows that as American women continue to evolve, so too will

beauty pageants.

The Cultural Histories of Radio Luxembourg and Europe n°1

Richard Legay, 2024-01-31 This book focuses on two commercial radio stations, Radio Luxembourg and Europe n°1, which were popular institutions in Western Europe throughout the Long Sixties, working across media and broadcasting transnationally. It argues that the existence of an overarching 'dispositif' of commercial radio stations enabled them to operate on various dimensions and differentiated them from other broadcasters. The book therefore answers current calls in media history to look beyond national and single-medium borders and contributes to the cultural and media history of Western Europe.

Research Handbook on the EU's Common Foreign and Security

Policy Steven Blockmans, Panos Koutrakos, 2018 In times of rapid change and unpredictability the European Union's role in the world is sorely tested. How successfully the EU meets challenges such as war, terrorism and climate change, and how effectively the Union taps into opportunities like mobility and technological progress depends to a great extent on the ability of the EU's institutions and member states to adopt and implement a comprehensive and integrated approach to external action. This

Research Handbook examines the law, policy and practice of the EU's Common Foreign and Security Policy, including the Common Security and Defence, and gauges its interactions with the other external policies of the Union (including trade, development, energy), as well as the evolving political and economic challenges that face the European Union.

Europe and Its Muslim Minorities Amikam

Nachmani,2010-01-20 Presents a comprehensive picture of the causes and effects of Muslim immigration to the West. This title discusses the population explosion in the sending countries, with their declining availability of jobs and increasing desperation. It highlights the situation of Western countries with their shrinking families and growing workforce shortages.

ITV Handbook Edward M. Schwalb,2004 The proposed book will present key iTV issues, technology solutions and standards assembled from those technologies. Readers of the book will gain an understanding of the various iTV concepts and the relationships between them. In addition to the general discussions, each chapter will contain specific details so as to serve as a starting point for readers who want to become experts in a specific field.

Lobbying in the European Parliament Maja Kluger

Dionigi,2016-12-01 This book explains when and how interest groups are influential in the European Parliament, which has become one of the most important lobbying venues in the EU. Yet we know little about the many ways in which interest groups and lobbyists influence parliamentary politics. The author offers insights on four key cases of lobbying, based on the analysis of EU documents, lobbying letters, and 150 interviews. She argues that lobbying success depends on a number of factors, most notably the degree of counter-lobbying, issue salience, and committee receptiveness. These factors are brought together in the framework of “Triple-I” - interests, issues, and institutions – to determine the success or failure of lobbying. This book will be of use to students and scholars interested in EU politics and governance, EU decision-making, and interest group politics, along with policy-makers and practitioners.

A Capital Market Union for Europe Mr.Ashok Vir

Bhatia,Ms.Srobona Mitra,Anke Weber,Mr.Shekhar Aiyar,Luiza Antoun de Almeida,Cristina Cuervo,Mr.Andre O Santos,Tryggvi Gudmundsson,2019-09-10 This note weighs the merits of a capital market union (CMU) for Europe, identifies major obstacles in its path, and recommends a set of carefully targeted policy actions. European capital markets are relatively small, resulting in strong bank-dependence, and are split sharply along national lines. Results include an uneven playing field in terms of corporate funding costs, the rationing out of collateral-constrained firms, and limited shock absorption. The benefits of integration center on expanding financial choice, ultimately to support capital formation and resilience. Capital market development and integration would support a healthy diversity in European finance. Proceeding methodically, the note identifies three key barriers to greater capital market integration in Europe: transparency, regulatory quality, and insolvency practices. Based on these findings, the note urges three

policy priorities, focused on the three barriers. There is no roadblock—such steps should prove feasible without a new grand bargain.
