Sport in the African World John Nauright, Mahfoud Amara, 2018-05-16 Sport has been a component of African cultural life for several hundred years. In today's globalized world, Africans and Africa have become a vital part of the international sporting landscape. This is the first book to attempt to survey the historical, contemporary and geographical breadth of that landscape, drawing on multidisciplinary scholarship from around the world. To gain an understanding of sport in Africa and its contributions to the global sports world, one must first consider the ways in which sport itself is a terrain of conflict and represents another symbolic territory to conquer. Addressing key themes such as colonialism, globalization, migration, apartheid, politics and international relations, sports media and broadcasting, ethnobranding, sports tourism and the African diaspora in Europe and the United States, this collection of original scholarship offers a significant contribution to this burgeoning field of research. *Sport in the African World* is fascinating reading for all students and scholars with an interest in sport studies, sport history, African history or African culture.

Communication and Sport Michael Butterworth, 2021-07-19 Sport is a universal feature of global popular culture. It shapes our identities, affects our relationships, and defines our communities. It also influences our consumption habits, represents our cultures, and dramatizes our politics. In other words, sport is among the most prominent vehicles for communication available in daily life. Nevertheless, only recently has it begun to receive robust attention in the discipline of communication studies. The *Handbook of Communication and Sport* attends to the recent and rapid growth of scholarship in communication and media studies that features sport as a central site of inquiry. The book attempts to capture a full range of methods, theories, and topics that have come to define the subfield of communication and sport or sports communication. It does so by emphasizing four primary features. First, it foregrounds communication as central to the study of sport. This emphasis helps to distinguish the book from collections in related disciplines such as sociology, and also points readers beyond media as the primary or only context for understanding the relationship between communication and sport. Thus, in addition to studies of media effects, mediatization, media framing, and more, readers will also engage with studies in interpersonal, intercultural, organizational, and rhetorical communication. Second, the handbook presents an array of methods, theories, and topics in the effort to chart a comprehensive landscape of communication and sport scholarship. Thus, readers will benefit from empirical, interpretive, and critical work, and they will also see studies drawing on varied texts and sites of inquiry. Third, the *Handbook of*

Communication and Sport includes a broad range of scholars from around the world. It is therefore neither European nor North American in its primary focus. In addition, the book includes contributors from commonly under-represented regions in Asia, Africa, and South America. Fourth, the handbook aims to account for both historical trajectories and contemporary areas of interest. In this way, it covers the central topics, debates, and perspectives from the past and also suggests continued and emerging pathways for the future. Collectively, the Handbook of Communication and Sport aspires to provide scholars and students in communication and media studies with the most comprehensive assessment of the field available.

Football in the Middle East Abdullah Al-Arian, 2022-09-01 Far and away the most popular sport in the world, football has a special place in Middle Eastern societies, and for Middle Eastern states. With Qatar hosting the 2022 FIFA World Cup, this region has been cast into the global footballing spotlight, raising issues of geopolitical competition, consumer culture and social justice. Taking an interdisciplinary approach, this book examines the complex questions raised by the phenomenon of football as a significant cultural force in the Middle East, as well as its linkages to broader political and socioeconomic processes. The establishment of football as a national sport offers significant insight into the region's historical experiences with colonialism and struggles for independence, as well as the sport's vital role in local and regional politics today—whether at the forefront of popular mobilizations, or as an instrument of authoritarian control. Football has also served as an arena of contestation in the formation of national identity, the struggle for gender equality, and the development of the media landscape. The twelve contributions to this volume draw on extensive engagement with the existing body of literature, and introduce original research questions that promise to open new directions for the study of football in the Middle East.

Routledge Handbook of Sport and Politics Alan Bairner, John Kelly, Jung Woo Lee, 2016-10-04 Sport is frequently considered to be an aspect of popular culture that is, or should be, untainted by the political. However, there is a broad consensus among academics that sport is often at the heart of the political and the political is often central to sport. From the 1936 Olympic Games in Nazi Germany to the civil unrest that preceded the 2014 World Cup in Brazil, sport and politics have remained symbiotic bedfellows. The Routledge Handbook of Sport and Politics goes further than any other book in surveying the complex, embedded relationships between sport and politics. With sections addressing ideologies, nation and statehood, corporate politics, political activism, social justice, and the politics of sports events, it introduces the conceptual foundations that underpin our

understanding of the sport-politics nexus and examines emergent issues in this field of study. Including in-depth case studies from North America, South America, Europe, the Middle East, Africa and Asia, this is an essential reference for anybody with an interest in the social scientific study of sport.

Investor-State Dispute Settlement and International Investment Agreements David Price, Amelia Hallam, 2024-06-03 This book examines the international investment agreements and the dispute settlement mechanisms contained therein, which bind the Gulf Cooperation Council member States. Recently, all member States have experienced increasing investor-state arbitration claims, while their nationals are increasingly instituting investor-state arbitrations to protect their own foreign investments. Intra-GCC disputes, though

relatively rare, have also appeared, largely as a result of the recent Gulf crisis. While focussing particularly upon the investor-state dispute settlement experience of member States as respondents, the book also explores the experiences of their nationals as claimants to determine how they can approach investor-state dispute settlement in the future. The book also reflects on existing treaty-making practices, making recommendations for regional-level dispute settlement to improve upon investor-state dispute settlement outcomes. This book provides a detailed analysis of the global investor-state dispute settlement regime and international investment agreements, and it will be of interest to students, academics, and practitioners with an interest in international investment law and arbitration.

Nation Branding and Sports Diplomacy Yoav Dubinsky, 2023-07-06 This book critically discusses the role of sports in nation branding and public diplomacy during the years 2020 and 2022, as the world was going through a global pandemic and health, economic, social, and political crises. The book argues that the use of sports for nation branding and public diplomacy goals is not new, but the changes the world went through required nations, places, communities, and individuals to modify and adapt the ways they use sports for country image purposes. After discussing global changes, the book outlines the theoretical frameworks of nation branding and public diplomacy, and discusses their manifestations through the evolution of the FIFA World Cup, the postponed Tokyo 2020 Olympic Games, the role of Title IX in American sports, the European Super League, the Oregon22 World Athletics Championships, the emergence of sport-tech diplomacy, and though the role of sports and the global order in an ever-changing world.

What Happened to Serie A Steven G. Mandis, Thomas Lombardi, Sarah Parsons

Wolter,2018-10-04 A deep dive into Italy's storied league. An excellent book . . . Anyone with an interest in football beyond the playing pitch will find it fascinating.” —Game of the People In the 1980s and 1990s, Serie A was known as Il campionato più bello del mondo—the most beautiful championship in the world—and had the highest match attendances in Europe. The stadiums were not only full of people, but full of color, flags, songs and rituals. Italy hosted World Cup 1990 and the stadia and stars on show in Serie A became iconic. Across the ten year period from 1989 to 1999 a remarkable 10 different Serie A clubs occupied nearly half the places in the finals of the Champions League and Europa Cup. They were dominant. But then in the 2000s they began to fall behind and despite the Azzurri winning the World Cup in 2006 and Inter Milan winning the Champions League in 2010, Italian football was on a downwards trajectory that saw the national team fail to qualify for the 2018 World Cup, their first absence from the tournament since 1958. What happened and why? In this extraordinary book, Steven G. Mandis investigates. Given unprecedented behind-the-scenes access to Italian clubs and key decision makers and players, Mandis is the first outside researcher to rigorously analyze both the on-the-pitch and business aspects of a club and league. What he learns is completely unexpected and challenges popular explanation and conventional wisdom.
