**Recent advances in voltage-gated sodium channels, their pharmacology and related diseases** Mohamed Chahine,Jean-François Desaphy, It is our pleasure to co-edit a Research Topic on voltage-gated sodium channels pharmacology and related diseases. We are in a process to inviting submissions of novel research article, state-of-the-art review papers and viewpoints on this topic. All the papers will follow a peer-review process according to the guidelines of Frontiers in Pharmacology. Voltage-gated sodium channel play a critical role in electrical signalling in many excitable cells such as neurons, skeletal muscle cells and cardiac myocytes. They are responsible for the initiation and the propagation of action potential, allowing integration of higher processes. They are formed by one alpha subunit that forms the pore of the channel and one or several regulatory subunits. Sodium channels are the target for local anaesthetics, antiarrhythmic drugs, and anticonvulsants. This class of ion channels is prime target to several toxins. Recently, a number of mutations in sodium channels that often results in alterations of rapid channel gating have been identified and linked to human diseases. Such channelopathies cause periodic paralysis, myotonia, long QT syndrome and other cardiac conductance disturbances, pain, hemiplegic migraine, and epilepsy. Sodium channels play also a negative role in malignant cellular proliferation, chronic pain, and other diseases. Considering these crucial physiological and pathological implications, it is not surprising that sodium channels have been and still are key targets for drug development. This Research Topic of Frontiers of Pharmacology of Ion Channels and Channelopathies will focus on this important class of ion channels how they operate, their pharmacology and their implication in diseases.

The Art of the B Movie Poster Adam Newell,2024-08-13 Exploding off the page with over 1,000 of the best examples of exploitation, grindhouse, and pulp film poster design comes The Art of the B-Movie Poster, a collection of incredible posters from low-budget films from the 1940s, 50s, 60s, and 70s. Once relegated to the underground and midnight movie circuit, these films and their bombastic advertisements are experiencing a surge of mainstream popularity driven by fans appreciative of the artistic skill, distinctive aesthetic, and unabashed sensationalism they relied on to make a profit, with the quality of the poster often far surpassing that of the film itself. The book celebrates this tradition with sections divided into moral panic films, action, horror, sci-fi, and of course, sex, each introduced with short essays by genre experts such as Kim Newman, Eric Schaffer, Simon Sheridan, Vern, and author Stephen Jones, winner of the Horror Writer's Association 2015 Bram Stoker Award for Non-Fiction. Edited by Adam Newell and featuring an introduction by author and filmmaker Pete Tombs, The Art of the B-Movie Poster is a loving tribute to the artwork and artists that brought biker gangs, jungle girls, James Bond rip-offs and reefer heads to life for audiences around the world.
