Kosovo and International Society Alex J. Bellamy,2002-08-11 This book explains the international engagement with the Kosovo conflict from the dissolution of Yugoslavia to Operation Allied Force. It shows how Kosovo was deliberately excluded from the search for peace in Yugoslavia before going on to demonstrate how a shaky international consensus was forged to support air strikes in 1999. In doing so, it exposes many of the myths and conspiracy theories that have developed about the war and explains the dilemmas facing actors in this unfolding drama.

Peacemakers James W. Pardew,2017-10-12 The wars that accompanied the breakup of Yugoslavia in the 1990s were the deadliest European conflicts since World War II. The violence escalated to the point of genocide when, over the course of ten days in July 1995, Serbian troops under the command of General Ratko Mladic murdered 8,000 unarmed men and boys who had sought refuge at a UN safe-haven in Srebrenica. Shocked, the United States quickly launched a diplomatic intervention supported by military force that ultimately brought peace to the new nations created when Yugoslavia disintegrated. Peacemakers is the first inclusive history of the successful multilateral intervention in the Balkans from 1995--2008 by an official directly involved in the diplomatic and military responses to the crises. A deadly accident near Sarajevo in 1995 thrust James Pardew into the center of efforts to stop the fighting in Bosnia. In a detailed narrative, he shows how Richard Holbrooke and the US envoys who followed him helped to stop or prevent vicious wars in Bosnia, Croatia, Kosovo, and Macedonia. Pardew describes the human drama of diplomacy and war, illuminating the motives, character, talents, and weaknesses of the national leaders involved. Pardew demonstrates that the use of US power to relieve human suffering is a natural fit with American values. Peacemakers serves as a potent reminder that American leadership and multilateral cooperation are often critical to resolving international crises.

Protected Area Governance and Management Graeme L. Worboys,Michael Lockwood,Ashish Kothari,Sue Feary,Ian Pulsford,2015-04-08 Protected Area Governance and Management presents a compendium of original text, case studies and examples from across the world, by drawing on the literature, and on the knowledge and experience of those involved in protected areas. The book synthesises current knowledge and cutting-edge thinking from the diverse branches of practice and learning relevant to protected area governance and management. It is intended as an investment in the skills and competencies of people and consequently, the effective governance and management of protected areas for which they are responsible, now and into the future. The global success of the protected area concept lies in its shared vision to protect natural and cultural heritage for the long term, and organisations such as International Union for the Conservation of Nature are a unifying force in this regard. Nonetheless, protected areas are a socio-political phenomenon and the ways that nations understand, govern and manage them is always open to contest and debate. The book aims to enlighten, educate and above all to challenge readers to think deeply about protected areas—their future and their past, as well as their present. The book has been compiled by 169 authors and deals with all aspects of protected area governance and management. It provides information to support capacity development training of protected area field officers, managers in charge and executive level managers.

**Energy Options Impact on Regional Security** Frano Barbir,Sergio Ulgiati,2010-09-23 Energy appears to be a fundamental driving force of economic and political strategies as well as planetary stability. Energy-related issues such as (1) the availability of new energy sources and viable technologies, (2) the disparity in access to energy sources, (3) the role of energy in our societies (energy societal metabolism), (4) the energy support to the life of our cities (where about half of world population is going to live very soon), and (5) the energy demand for food security all over the world, are “hot” problems that humans will have to face within the framework of sustainability (ecologically sound production and consumption patterns associated with socially acceptable life styles), in terms of policies, technological development and economic processes. A coherent energy strategy is required, addressing both energy supply and demand, security of access, development problems, equity, market dynamics, by also taking into account the whole energy lifecycle including fuel production, transmission and distribution, energy conversion, and the impact on energy equipment manufacturers and the end-users of energy systems. Issues of energy efficiency and rebound effect must also be taken into proper account. In the short term, the aim should be to achieve higher energy efficiencies and increased supply from local energy sources, in particular renewable energy sources.
