*Cold War Civil Defence in Western Europe* Marie Cronqvist,Rosanna Farbøl,Casper Sylvest,2021-12-06 This open access edited collection brings together established and new perspectives on Cold War civil defence in Western Europe within a common analytical framework that also facilitates comparative and transnational dimensions. The current interest in creating disaster-resilient societies demands new histories of civil defence. Historical contextualization is essential in order to understand what is at stake in preparing, devising, and implementing forms of preparedness, protection, and security that are specifically targeted at societies and citizens. Applying the concept of sociotechnical imaginaries to civil defence history, the chapters of this volume cover a range of new themes, from technology and materiality to media, memory, and everyday experience. The book underlines the social embeddedness of civil defence by detailing how it both prompted new forms of social interaction and reflected norms and visions of the ‘good society’ in an age where nuclear technology seemed to hold the key to both doom and salvation.

*Pamphlet Architecture 15: War and Architecture* Lebbeus Woods,1993 War and Architecture is a timely and moving response by architect Lebbeus Woods to the bombing of Sarajevo. With text in both English and Croatian, accompanied by the author's exquisitely drawn, hauntingly beautiful proposals, the book is both dedicated and addressed to the citizens of this ravaged city. Lebbeus Woods has long been fascinated by the intimate ties between architecture and violence. He identifies the two predominant patterns for rebuilding cities following catastrophic destruction: restoring the city exactly to its previous, historical state; or erasing the remains of the city to construct a new utopia. These, he argues, are twin forms of denial. Woods draws an analogy to the process of biological and emotional healing, presenting architectural forms that act as injections, scabs, scars, and new tissue, within the complex organism of a city. Only by facing the insanity of willful destruction, he argues, can reason begin to believe again in itself.

**Core Issues in Policing** Frank Leishman,Barry Loveday,Stephen P. Savage,2000 BULL.

Stages of Emergency Tracy C. Davis,2007-06-06 In an era defined by the threat of nuclear annihilation, Western nations attempted to prepare civilian populations for atomic attack through staged drills, evacuations, and field exercises. In Stages of Emergency the distinguished performance historian Tracy C. Davis investigates the fundamentally theatrical nature of these Cold War civil defense exercises. Asking what it meant for civilians to be rehearsing nuclear war, she provides a comparative study of the civil defense maneuvers conducted by three NATO allies—the United States, Canada, and the United Kingdom—during the 1950s and 1960s. Delving deep into the three countries’ archives, she analyzes public exercises involving private citizens—Boy Scouts serving as mock casualties, housewives arranging home protection, clergy training to be shelter managers—as well as covert exercises undertaken by civil servants. Stages of Emergency covers public education campaigns and school programs—such as the ubiquitous “duck and cover” drills—meant to heighten awareness of the dangers of a possible attack, the occupancy tests in which people stayed sequestered for up to two weeks to simulate post-attack living conditions as well as the effects of confinement on interpersonal dynamics, and the British first-aid training in which participants acted out psychological and physical trauma requiring immediate treatment. Davis also brings to light unpublicized government exercises aimed at anticipating the global effects of nuclear war. Her comparative analysis shows how the differing priorities, contingencies, and social policies of the three countries influenced their rehearsals of nuclear catastrophe. When the Cold War ended, so did these exercises, but, as Davis points out in her perceptive afterword, they have been revived—with strikingly similar recommendations—in response to twenty-first-century fears of terrorists, dirty bombs, and rogue states.

*After The Bomb* M. Grant,2009-11-12 Civil defence was an integral part of Britain's modern history. Throughout the cold war it was a central response of the British Government to the threat of war. This book will be the first history of the preparations to fight a nuclear war taken in Britain between the end of the Second World War and 1968.

*The City as Target* Ryan Bishop,Gregory Clancey,John W. Phillips,2012-03-29 Bringing together scholars from a diverse range of disciplines, The City as Target provides a sustained and critical response to the relationship between the concept of targeting (in its many forms) and notions of understanding, imagining and shaping the urban. Among the many spatial and graphic terms used to describe cities in urban studies, the word target is rarely encountered. Though equally spatial, it differs from these others by implying some motive force, and, more than that, a force with some intentionality. To target is to aim, to project, and ultimately to impact. It suggests a space of violence, or at least action, or movement resulting in displacement, which most other terms do not. In that sense it is useful, underused, and perhaps revelatory. Rather than approach the city as simply a site of growth, processes, and developments, the contributors to this volume treat it as the recipient of attentions. The work draws on a wide variety of geographical sites and historic monuments in order to explore this concept, examining and challenging current urban theories. It seeks to highlight both the power of The Global City and the current vulnerability and fragility of urban culture, exploring the city as a recipient and a culprit in relation to issues including terrorism and urban warfare, the latest cyclical failure of global financial markets, and the relatively new spectre of environmental unsustainability. Offering a unique and relevant contribution to the literature, this work will be of great interest to scholars of urban theory, international relations, postcolonial politics and military studies.

**Mission Improbable** Lee Clarke,1999 How does the U.S. Post Office plan to deliver mail after atomic Armageddon? How do oil industry executives intend to collect 10 million gallons of oil spilled in the Gulf of Alaska? How do regulators try to convince people that everyone can be evacuated from congested Long Island after a nuclear power plant destroys itself? Lee Clarke enters the world of managers and experts to find out how governments and corporations plan for massive disaster when they have no clue as to how to go about it. He argues that managers create plans that are fantasy documents, rhetorical tools that are used to convince audiences that experts are in charge and that all is well. Provocative and written for a general audience, Mission Improbable makes the case that society would be safer, smarter, and fairer if organizations would admit their limitations.

**Fatherhood in the Nordic welfare states** Eydal, Guðný Björk,Rostgaard, Tine,2016-01-13 The five Nordic countries, Denmark, Finland, Iceland, Norway and Sweden, are well-known for their extensive welfare system and gender equality which provides both parents with opportunities to earn and care for their children. In this topical book, expert scholars from the Nordic countries, as well as UK and the US, demonstrate how modern fatherhood is supported in the Nordic setting through family and social policies, and how these contribute to shaping and influencing the images, roles and practices of fathers in a diversity of family settings and variations of fatherhoods. This comprehensive volume will have wide international appeal for those who look to Nordic countries and their success in creating gender equal societies.

*Green Social Work* Lena Dominelli,2013-10-29 Social work is the profession that claims to intervene to enhance people's well-being. However, social workers have played a low-key role in environmental issues that increasingly impact on people's well-being, both locally and globally. This compelling new contribution confronts this topic head-on, examining environmental issues from a social work perspective. Lena Dominelli draws attention to the important voice of practitioners working on the ground in the aftermath of environmental disasters, whether these are caused by climate change, industrial accidents or human conflict. The author explores the concept of 'green social work' and its role in using environmental crises to address poverty and other forms of structural inequalities, to obtain more equitable allocations of limited natural resources and to tackle global socio-political forces that have a damaging impact upon the quality of life of poor and marginalized populations at local levels. The resolution of these matters is linked to community initiatives that social workers can engage in to ensure that the quality of life of poor people can be enhanced without costing the Earth. This important book will appeal to those in the fields of social work, social policy, sociology and human geography. It powerfully reveals how environmental issues are an integral part of social work's remit if it is to retain its currency in the modern world and emphasize its relevance to the social issues that societies have to resolve in the twenty-first century.

*Homeland Security* Steven J. Tomisek,2002

**The McGraw-Hill Homeland Security Handbook : The Definitive Guide for Law Enforcement, EMT, and All Other Security Professionals** David Kamien,2006 This book provides first responders, security professionals, and students with a fundamental and definitive overview of critical homeland security issues. It features a review and assessment of homeland security risks, along with insights, strategies, and practical advice for working successfully in the new threat environment. Individual chapters cover : terrorist tactics, intra-government coordination of information, behavioral pattern recognition, aviation and cargo security, new rules for securing cyberspace, roles of media and private individuals, and more.

**Changing Social Equality** Jon Kvist,2012 Taking a comparative perspective, this book casts new light on the changing inequalities in Europe.

*Countering Al Qaeda* Brian Michael Jenkins,2002 This monograph reviews events since the terrorist attacks of September 11, 2001, and discusses the current state of al Qaeda and the kinds of actions that can be expected of it in the future. Al Qaeda constitutes the most serious immediate threat to the security of the United States, so the campaign against terrorism must remain focused. The monograph describes the central elements that must be emphasized in the next, more-complex phase of that campaign.

*Disaster Research* Rasmus Dahlberg,Olivier Rubin,Morten Thanning Vendelø,2015-09-07 Given the tendency of books on disasters to predominantly focus on strong geophysical or descriptive perspectives and in-depth accounts of particular catastrophes, Disaster Research provides a much-needed multidisciplinary perspective of the area. This book is structured thematically around key approaches to disaster research from a range of different, but often complementary academic disciplines. Each chapter presents distinct approaches to disaster research that is anchored in a particular discipline; ranging from the law of disasters and disaster historiography to disaster politics and anthropology of disaster. The methodological and theoretical contributions underlining a specific approach to disasters are discussed and illustrative empirical cases are examined that support and further inform the proposed approach to disaster research. The book thus provides unique insights into fourteen state-of-the-art disciplinary approaches to the understanding of disasters. The theoretical discussions as well as the diverse range of disaster cases should be of interest to both postgraduate and undergraduate students, as well as academics, researchers and policymakers.

British Nuclear Culture Jonathan Hogg,2016-01-28 The advent of the atomic bomb, the social and cultural impact of nuclear science, and the history of the British nuclear state after 1945 is a complex and contested story. British Nuclear Culture is an important survey that offers a new interpretation of the nuclear century by tracing the tensions between 'official' and 'unofficial' nuclear narratives in British culture. In this book, Jonathan Hogg argues that nuclear culture was a pervasive and persistent aspect of British life, particularly in the years following 1945. This idea is illustrated through detailed analysis of various primary source materials, such as newspaper articles, government files, fictional texts, film, music and oral testimonies. The book introduces unfamiliar sources to students of nuclear and cold war history, and offers in-depth and critical reflections on the expanding historiography in this area of research. Chronologically arranged, British Nuclear Culture reflects upon, and returns to, a number of key themes throughout, including nuclear anxiety, government policy, civil defence, 'nukespeak' and nuclear subjectivity, individual experience, protest and resistance, and the influence of the British nuclear state on everyday life. The book contains illustrations, individual case studies, a select bibliography, a timeline, and a list of helpful online resources for students of nuclear history.

**Societal Security and Crisis Management** Per Lægreid,Lise H. Rykkja,2018-07-25 This book studies governance capacity and governance legitimacy for societal security and crisis management. It highlights the importance of building organizational capacity by focusing on the coordination of public resources and underscores the relevance of legitimacy by emphasizing the importance of public perceptions, attitudes, and trust vis-à-vis government arrangements for crisis management. The authors explore several cases and identify relevant dimensions concerning performance, capacity and legitimacy across different countries. It is an ideal volume for audiences interested in public administration, public policy, crisis management and security studies.
