**Practical Oracle SQL** Kim Berg Hansen,2020-02-19 Write powerful queries using as much of the feature-rich Oracle SQL language as possible, progressing beyond the simple queries of basic SQL as standardized in SQL-92. Both standard SQL and Oracle's own extensions to the language have progressed far over the decades in terms of how much you can work with your data in a single, albeit sometimes complex, SQL statement. If you already know the basics of SQL, this book provides many examples of how to write even more advanced SQL to huge benefit in your applications, such as:Pivoting rows to columns and columns to rowsRecursion in SQL with MODEL and WITH clausesAnswering Top-N questionsForecasting with linear regressions Row pattern matching to group or distribute rowsUsing MATCH\_RECOGNIZE as a row processing engineThe process of starting from simpler statements in SQL, and gradually working those statements stepwise into more complex statements that deliver powerful results, is covered in each example. By trying out the recipes and examples for yourself, you will put together the building blocks into powerful SQL statements that will make your application run circles around your competitors. What You Will LearnTake full advantage of advanced and modern features in Oracle SQL Recognize when modern SQL constructs can help create better applicationsImprove SQL query building skills through stepwise refinementApply set-based thinking to process more data in fewer queriesMake cross-row calculations with analytic functionsSearch for patterns across multiple rows using row pattern matchingBreak complex calculations into smaller steps with subquery factoring Who This Book Is For Oracle Database developers who already know some SQL, but rarely use features of the language beyond the SQL-92 standard. And it is for developers who would like to apply the more modern features of Oracle SQL, but don't know where to start. The book also is for those who want to write increasingly complex queries in a stepwise and understandable manner. Experienced developers will use the book to develop more efficient queries using the advanced features of the Oracle SQL language.

Coastal Landscapes of the Mesolithic Almut Schülke,2020-03-06 Coastal Landscapes of the Mesolithic: Human Engagement with the Coast from the Atlantic to the Baltic Sea explores the character and significance of coastal landscapes in the Mesolithic – on different scales and with various theoretical perspectives and methodological approaches. Mesolithic people were strongly connected to the sea, with coastal areas vital for subsistence and communication across the water. This anthology includes case studies from Scandinavia, western Europe and the Baltic area, presented by key international researchers. Topics addressed include large-scale analyses of the archaeological and geological development of coastal areas, the exploration of coastal environments with interdisciplinary methods, the discussion of the character of coastal settlements and of their possible networks, social and economic practices along the coast, as well as perceptions and cosmological aspects of coastal areas. Together, these topics and approaches contribute in an innovative way to the understanding of the complexity of topographically changing coastal areas as both border zones between land and sea and as connecting landscapes. Providing novel insights into the study of the Mesolithic as well as coastal areas and landscapes in general, the book is an important resource for researchers of the Mesolithic and coastal archaeology.

**Lloyd's Register of Yachts 1915** Lloyd's Register Foundation,1915-01-01 The Lloyd's Register of Yachts was first issued in 1878, and was issued annually until 1980, except during the years 1916-18 and 1940-46. Two supplements containing additions and corrections were also issued annually. The Register contains the names, details and characters of Yachts classed by the Society, together with the particulars of other Yachts which are considered to be of interest, illustrates plates of the Flags of Yacht and Sailing Clubs, together with a List of Club Officers, an illustrated List of the Distinguishing Flags of Yachtsmen, a List of the Names and Addresses of Yacht Owners, and much other information. For more information on the Lloyd's Register of Yachts, please click here:

The Handbook of Fashion Studies Sandy Black,Amy de la Haye,Joanne Entwistle,Regina Root,Agnès Rocamora,Helen Thomas,2014-01-02 The Handbook of Fashion Studies identifies an innovative spectrum of thematic approaches, key strands and interdisciplinary concepts that continue to push forward the boundaries of fashion studies. The book is divided into seven sections: Fashion, Identity and Difference; Spaces of Fashion; Fashion and Materiality; Fashion, Agency and Policy; Science, Technology and New fashion; Fashion and Time and, Sustainable Fashion in a Globalised world. Each section consists of approximately four essays authored by established researchers in the field from the UK, USA, Netherlands, Sweden, Canada and Australia. The essays are written by international subject specialists who each engage with their section's theme in the light of their own discipline and provide clear case-studies to further knowledge on fashion. This consistency provides clarity and permits comparative analysis. The handbook will be essential reading for students of fashion as well as professionals in the industry.

Tales of the Iron Bloomery Bernt Rundberget,2016-11-01 In Tales of the Iron Bloomery Bernt Rundberget argues that the ironmaking of southern Hedmark was an important basis for political developments from chiefdom to Norwegian kingdom in the period AD 700-1300.

*Traders in Motion* Kirsten W. Endres,Ann Marie Leshkovich,2018-06-15 With essays covering diverse topics, from seafood trade across the Vietnam-China border, to street traders in Hanoi, to gold shops in Ho Chi Minh City, Traders in Motion spans the fields of economic and political anthropology, geography, and sociology to illuminate how Vietnam's rapidly expanding market economy is formed and transformed by everyday interactions among traders, suppliers, customers, family members, neighbors, and officials. The contributions shed light on the micropolitics of local-level economic agency in the paradoxical context of Vietnam's socialist orientation and its contemporary neoliberal economic and social transformation. The essays examine how Vietnamese traders and officials engage in on-the-ground contestations to define space, promote or limit mobility, and establish borders, both physical and conceptual. The contributors show how trading experiences shape individuals' notions of self and personhood, not just as economic actors, but also in terms of gender, region, and ethnicity. Traders in Motion affords rich comparative insight into how markets form and transform and what those changes mean. Contributors: Lisa Barthelmes, Christine Bonnin, Gracia Clark, Annuska Derks, Kirsten W. Endres, Chris Gregory, Caroline Grillot, Erik Harms, Esther Horat, Gertrud Hüwelmeier, Ann Marie Leshkovich, Hy Van Luong, Minh T. N. Nguyen, Nguyen Thi Thanh Binh, Linda J. Seligmann, Allison Truitt, Sarah Turner

Oxford Textbook of Neurologic and Neuropsychiatric Epidemiology Carol Brayne,Valery L. Feigin,Lenore J. Launer,Giancarlo Logroscino,2020-11-02

Neurologic and neuropsychiatric disorders are of great importance to societies and they also raise special considerations in epidemiological research methodology. Not only do neurologic and neuropsychiatric disorders form a major group of disorders associated with ageing populations, but those disorders that occur in earlier life can be associated with severe individual, family, and societal distress and burden. The inter-relationship of syndromes and disorders is a topic of major interest and growing biological insights across psychiatry and neurology. This includes not only overlaps in neurodegenerative syndromes but also those related to other systems such as metabolic, inflammatory, immune and vascular disorders. Part of the Oxford Textbooks in Clinical Neurology series, the Oxford Textbook of Neurologic and Neuropsychiatric Epidemiology is designed to focus on the overlaps and inter-relationships between neuro-epidemiological disorders, as well as on ways to harmonise large cohort studies to maximise opportunities for determining causes related to rarer disorders. Divided into three main parts, the book covers 1) the principles of neurologic and neuropsychiatric epidemiology; 2) specific neuropsychiatric disorders and their inter-relationships and 3) the implications of neuro-epidemiologic research for patient populations and current medical practice. This comprehensive work serves as an invaluable reference to current neuro-epidemiological methods for neurologists, psychiatrists, and senior trainees in those disciplines, as well as public health practitioners and students with an interest in neurology and neuropsychiatry.

Year-book American Institute of Electrical Engineers,1920

The Top Books of the Year Berg Hansen The year 2023 has witnessed a remarkable surge in literary brilliance, with numerous engrossing novels enthralling the hearts of readers worldwide. Lets delve into the realm of bestselling books, exploring the fascinating narratives that have enthralled audiences this year. Berg Hansen : Colleen Hoovers "It Ends with Us" This touching tale of love, loss, and resilience has captivated readers with its raw and emotional exploration of domestic abuse. Hoover masterfully weaves a story of hope and healing, reminding us that even in the darkest of times, the human spirit can succeed. Uncover the Best : Taylor Jenkins Reids "The Seven Husbands of Evelyn Hugo" This spellbinding historical fiction novel unravels the life of Evelyn Hugo, a Hollywood icon who defies expectations and societal norms to pursue her dreams. Reids compelling storytelling and compelling characters transport readers to a bygone era, immersing them in a world of glamour, ambition, and self-discovery. Discover the Magic : Delia Owens "Where the Crawdads Sing" This captivating coming-of-age story follows Kya Clark, a young woman who grows up alone in the marshes of North Carolina. Owens crafts a tale of resilience, survival, and the transformative power of nature, entrancing readers with its evocative prose and mesmerizing setting. These popular novels represent just a fraction of the literary treasures that have emerged in 2023. Whether you seek tales of romance, adventure, or personal growth, the world of literature offers an abundance of compelling stories waiting to be discovered. The novel begins with Richard Papen, a bright but troubled young man, arriving at Hampden College. Richard is immediately drawn to the group of students who call themselves the Classics Club. The club is led by Henry Winter, a brilliant and charismatic young man. Henry is obsessed with Greek mythology and philosophy, and he quickly draws Richard into his world. The other members of the Classics Club are equally as fascinating. Bunny Corcoran is a wealthy and spoiled young man who is always looking for a good time. Charles Tavis is a quiet and reserved young man who is deeply in love with Henry. Camilla Macaulay is a beautiful and intelligent young woman who is drawn to the power and danger of the Classics Club. The students are all deeply in love with Morrow, and they are willing to do anything to please him. Morrow is a complex and mysterious figure, and he seems to be manipulating the students for his own purposes. As the students become more involved with Morrow, they begin to commit increasingly dangerous acts. The Secret History is a brilliant and suspenseful novel that will keep you wondering until the very end. The novel is a warning tale about the dangers of obsession and the power of evil.
