Making of the Tunisian Revolution Nouri Gana,2013-09-07 From late 2010 to the present day, the Arab world has been shot through with insurrection and revolt. As a result, Tunisia is now seen as the unlikely birth place and exemplar of the process of democratisation long overdue in the Arab world. Mixing political, historical, economic, social and cultural analyses and approaches, these essays reflect on the local, regional and transnational dynamics together with the long and short term factors that, when combined, set in motion the Tunisian revolution and the Arab uprisings. Above all, the book maps the intertwined genealogies of cultural dissent that have contributed to the mobilisation of protesters and to the sustenance of protests between 17 December 2010 and 14 January 2011, and beyond.

National Intellectual Capital and the Financial Crisis in Australia, Canada, Japan, New Zealand, and the United States Carol Yeh-Yun Lin,Leif Edvinsson,Jeffrey Chen,Tord Beding,2013-11-01 In the first decade of the twenty-first century, the biggest event of worldwide proportion was the 2008 global financial crisis, which was caused primarily by ineffective governance, failed surveillance systems, and implementation flaws. While fiscal and monetary policies succeeded in pulling many countries out of a financial freefall, most economies have performed beneath pre-recession levels as governments continued to struggle with their finances. Examining the financial crisis from the viewpoint of intangible assets provides a different perspective from traditional economic approaches. National Intellectual Capital (NIC), comprised mainly of human capital, market capital, process capital, renewal capital, and financial capital, is a valuable intangible asset and a key source of national competitive advantage in today's knowledge economy. The authors—pioneers in the field—present extensive data and a rigorous conceptual framework to analyze the connections between the global financial crisis and NIC development. Covering the period from 2005 to 2010 across 48 countries, the authors establish a positive correlation between NIC and GDP per capita and consider the impact of NIC investment for short-term recovery and long-term risk control and strategy formulation. Each volume in a series of Springer Briefs on NIC and the financial crisis provides in-depth coverage of the impact of the crisis, the aftermath, future prospects, and policy implications for a regional cluster. This volume focuses on Australia, Canada, Japan, New Zealand, and the United States of America.

Winning Strategies for a Sustainable Future Bertelsmann Stiftung, 2013-11-01 Since the first Earth Summit held in Rio de Janeiro in 1992, many states have been looking for a new concept of economic and social progress. The environmental crises of the last years, as well as the global economic and financial crisis, require an even more profound shift in thinking - toward a policy committed to sustainability and intergenerational equity. But how can this goal be achieved? The publication for the Reinhard Mohn Prize 2013, *Winning Strategies for a Sustainable Future*, presents pioneering approaches from different continents. Bhutan, Costa Rica, Finland, Ghana and Tasmania are examples that show sustainability is feasible. These principles also open up new perspectives for Germany. Today, we know that sustainability is the great challenge of the 21st century. The guiding principle of sustainable development implies taking economic, social and environmental concerns into account in a balanced manner. Our focus in this regard must be improving the quality of life for all people.

Aiming Big with Small Cars Rajnish Tiwari, Cornelius Herstatt, 2013-10-28 This book focuses on the small car segment of India's automotive industry to explain the emergence of lead markets. The authors contend that the current understanding of lead markets does not sufficiently explain the business practices that are born out of the intensified globalization of innovation. Lead markets are considered crucial for the global diffusion of new products and this book investigates whether sustainable lead markets can also emerge in developing economies, and if so, under which conditions. The authors question the conventional wisdom and propose updates and extensions to the lead market theory to better reflect the changing ground realities on ground.

Emerging Economies During and After the Great Recession Philip Arestis, M. Sawyer, 2016-04-08 The International Papers in Political Economy (IPPE) series explores the latest developments in political economy. This twelfth volume presents a collection of eight papers, analysing the emergence and economic problems of the emerging economies during and after the international financial crisis of 2007-8 and the subsequent Great Recession. The contributions range from an analysis of the international financial crisis of 2007-8 in general terms to an analysis of the same but concentrating on the emerging economies, before turning to groups of economies, Arab, African and Eastern European countries, and two relevant but individual countries, namely China and Turkey. This book offers students, scholars, researchers and policy-makers detailed analysis and informed commentary on the origins of the international financial crisis of 2007-8 and the great recession by focusing on its effect on emerging countries.

Informe sobre las migraciones en el mundo 2011 International Organization for Migration, 2012-04-24 El Informe sobre las Migraciones en el Mundo 2011 presenta los datos disponibles a escala mundial sobre las percepciones y las actitudes del público con respecto a la migración. Analiza la forma en que se modelan esas percepciones y actitudes y el modo en que pueden ejercer influencia en la política y en los medios de comunicación, o ser objeto de influencia. También examina el papel que desempeñan los medios de comunicación en la presentación de las opiniones, la información sobre las tendencias y el marco del discurso sobre la migración. Se incluyen, asimismo, ejemplos de buenas prácticas en la comunicación de una imagen positiva y equilibrada de los migrantes por parte de los gobiernos, la sociedad civil y los medios de comunicación. Por último,

el Informe plantea varias medidas para mejorar la comunicación sobre la migración con el propósito de promover una mejor comprensión y reconocimiento de los beneficios de la migración, formular políticas con una mayor base empírica y contar con la participación efectiva de los propios migrantes.

The Corruption Cure Robert I. Rotberg, 2017-04-24 Why leadership is key to ending political and corporate corruption globally Corruption corrodes all facets of the world's political and corporate life, yet until now there was no one book that explained how best to battle it. The Corruption Cure provides many of the required solutions and ranges widely across continents and diverse cultures—putting some thirty-five countries under an anticorruption microscope—to show exactly how to beat back the forces of sleaze and graft. Robert Rotberg defines corruption theoretically and practically in its many forms, describes the available legal remedies, and examines how we know and measure corruption's presence. He looks at successful and unsuccessful attempts to employ anticorruption investigative commissions to combat political theft and venal behavior. He explores how the globe's least corrupt nations reached that exceptional goal. Another chapter discusses the role of civil society in limiting corruption. Expressed political will through determined leadership is a key factor in winning all of these battles. Rotberg analyzes the best-performing noncorrupt states to show how consummate leadership made a telling difference. He demonstrates precisely how determined leaders changed their wildly corrupt countries into paragons of virtue, and how leadership is making a significant difference in stimulating political anticorruption movements in places like India, Croatia, Honduras, and Lebanon. Rotberg looks at corporate corruption and how it can be checked, and also offers an innovative fourteen-step plan for nations that are ready to end corruption. Curing rampant corruption globally requires strengthened political leadership and the willingness to remake national political cultures. Tougher laws and better prosecutions are not enough. This book enables us to rethink the problem completely—and solve it once and for all.

Navigating Intellectual Capital After the Financial Crisis Carol Yeh-Yun Lin, Leif Edvinsson, Jeffrey Chen, Tord Beding, 2014-07-24 In the first decade of the twenty-first century, the biggest event of worldwide proportion was the 2008 global financial crisis, which was caused primarily by ineffective governance, failed surveillance systems and implementation flaws. While fiscal and monetary policies succeeded in pulling many countries out of a financial freefall, most economies have performed beneath pre-recession levels as governments continued to struggle with their finances. Examining the financial crisis from the viewpoint of intangible assets provides a different perspective from traditional economic approaches. National Intellectual Capital (NIC), comprised mainly of human capital, market capital, process capital, renewal capital and financial capital, is a valuable intangible asset and a key source of national competitive advantage in today's knowledge economy. The authors—pioneers in the field—present extensive data and a rigorous conceptual framework to analyze the connections between the global financial crisis and NIC development. Covering the period from 2005 to 2010 across 48 countries, the authors establish a positive correlation between NIC and GDP per capita and consider the impact of NIC investment for short-term recovery and long-term risk control and strategy formulation. This book summarizes and synthesizes the data presented in a series of eleven SpringerBriefs volumes on “National Intellectual Capital and the Financial Crisis,” concerning the co-developments between NIC and GDP growth and describes the internal and external factors that influenced the relative success or failure of national strategies in weathering the crisis. The authors go on to explore the impacts of various policy reforms, including stimulus packages and consolidations employed around the world, with particular respect to the factors enhancing or impeding short-term recovery versus long-term growth. Finally, they propose a new model of “sustainable national intellectual capital” and challenge readers to consider how to pass on a healthy globe and harmonious society to the next generation.
