**The Wallpaper Fox** Morris Philipson, 2000-05-15 Written with razor-sharp wit and keen psychological insight, this compelling novel explores the way people—husbands, wives, parents, children, lovers—use and abuse each other. Under the meticulously maintained social conventions of the wealthy Warner family lie more primitive impulses and desires. As each character faces a crisis, we start to see the fascinating ways in which they make moral choices. Philipson gives us a very believable portrait of a marriage. He also gives us no easy answers . . . and best of all, real storytelling. —Publishers Weekly This solid and serious novel emerges as not just an expose of what really goes on behind the well-groomed facades of the affluent, but a thoughtful exploration of character and the efficacy of moral action in forming and reforming it. —Jane Larkin Crain, New York Times Book Review A swift, no-fudging narrative by a writer it is always rewarding to rediscover. —Sophie Wilkins, National Review An extraordinary novel, fascinating, compelling, and totally disconcerting. —Fort Worth Star-Telegram Has the drama, intelligence and moral force of an American *Howards End*. —Cynthia Ozick

**The Dragonfly Sea** Yvonne Adhiambo Owuor, 2021-09-02 'One of the most unforgettable books I have read in the last few years... What a writer! What a thinker! What a woman!' Fiammetta Rocco From the award-winning author of *Dust* comes a magical, sea-saturated, coming-of-age novel that transports readers from Kenya to China and Turkey. On an island in the Lamu Archipelago lives a solitary, stubborn child called Ayaana and her mother, Munira. When a sailor, Muhidin, enters their lives, the child finds something she has never had before: a father. But as Ayaana grows into adulthood, forces of nature and history begin to reshape her life, leading her to distant countries and fraught choices. Selected as a descendant of long-ago Chinese shipwrecked sailors Ayaana is sent to study in China. Leaving her resourceful single mother, she is forced to grow up fast. Whether it's the scarred captain of the Chinese shipping container that transports Ayaana or the son of Turkish shipping magnate who trades in refugees, Owuor never loses a profound sense of empathy for her characters. She evokes a fascinating kind of beauty in this dangerous, chaotic world and its ever-shifting oceans and trade. Told with a glorious lyricism, *The Dragonfly Sea* is a transcendent story of love and adventure, and of the inexorable need for shelter in a dangerous world. 'One of Africa's most exciting voices ... The Dragonfly Sea is a continent-hopping novel of epic proportions.' Refinery29 'In its omnivorous interest in the world, *The Dragonfly Sea* is a paean to both cultural diffusion and difference . . . as much as [the novel] traces the globe, it also depicts an internal pilgrimage, its heroine in rose attar a broken saint.' New York Times 'Owuor continues to break ground among contemporary African writers.' Vanity Fair

Outskirts of Galaxies Johan H. Knapen, Janice C. Lee, Armando Gil de Paz, 2017-07-09 This book consists of invited reviews written by world-renowned experts on the subject of the outskirts of galaxies, an upcoming field which has been understudied so far. These regions are faint and hard to observe, yet hide a tremendous amount of information on the origin and early evolution of galaxies. They thus allow astronomers to address some of the most topical problems, such as gaseous and satellite accretion, radial migration, and merging. The book is published in conjunction with the celebration of the end of the four-year DAGAL project, an EU-funded initial training network, and with a major international conference on the topic held in March 2016 in Toledo. It thus reflects not only the views of the experts, but also the scientific discussions and progress achieved during the project and the meeting. The reviews in the book describe the most modern observations of the outer regions of our own Galaxy, and of galaxies in the local and high-redshift Universe. They tackle disks, haloes, streams, and accretion as observed through deep imaging and spectroscopy, and guide the reader through the various formation and evolution scenarios for galaxies. The reviews focus on the major open questions in the field, and explore how they can be tackled in the future. This book provides a unique entry point into the field for graduate students and non-specialists, and serves as a reference work for researchers in this exciting new field.
