Alternative Definitions for the Grade Factor of Broken Corn and Foreign Material Lowell D. Hill, 1982 The purpose of the research reported in this publication was to evaluate the current definition of the grade factor for broken corn and foreign material (BC FM) and to examine alternative definitions based on various sizes of screens. The data were obtained through analysis of 1,080 samples of corn from Illinois elevators. The data show that the 12/64-inch round-hole sieve currently used does not result in maximum differentiation between corn and BC FM since much of the material passing through the sieve is broken corn. Other sieve sizes would increase the contrast between corn and BC FM on physical and chemical properties, although in this research none of the sieve sizes clearly differentiated between corn and BC FM on all properties. To improve the information provided by the BC FM factor in the corn standards, any revision of the factor must involve more than just a change in sieve size. It must also include a redefinition of foreign material, alteration of the maximum allowances for each grade, and development of some means of identifying broken kernels. In addition, these revisions must take into account the requirements of processors, feeders, and merchandisers. This study provides data on which an evaluation of the alternatives can be based.

**Best Canadian Stories** John Metcalf, 2017-11-14 Now in its 47th year, Best Canadian Stories has long championed the short story form and highlighted the work of many of the writers, throughout their respective careers, who have gone on to shape the Canadian literary canon. Caroline Adderson, Margaret Atwood, Clark Blaise, Lynn Coady, Mavis Gallant, Zsuzsi Gartner, Douglas Glover, Steven Houghton, Isabel Huggan, Mark Anthony Jarman, Norman Levine, Rohinton Mistry, Alice Munro, Leon Rooke, Diane Schoemperlen, Russell Smith, Linda Svendsen, Kathleen Winter, and many others have appeared in its pages over the years and decades, making Best Canadian Stories the go-to source for what's new in Canadian fiction writing for close to five decades. The short story is perhaps Canada's greatest contribution to literature, and in this edition established practitioners of the form—including Tamas Doboz, Cynthia Flood, K.D. Miller, and Lisa Moore—are joined by powerful emerging talents—like Paige Cooper and CBC Short Story Prize winner David Huebert—in a continuation of not only a series, but a legacy in Canadian letters.

*Fracture and Fracture Mechanics* R. B. Tait, G. G. Garrett, 2013-10-22 Fracture and Fracture Mechanics: Case Studies contains the proceedings of the Second National Conference on Fracture, held at the University of the Witwatersrand in Johannesburg, South Africa on November 26-27, 1984. This book presents case studies in fracture and fracture mechanics and highlights the problems associated with fracture, failure analysis, and safe design in industries as diverse as mining, power generation, transport, petrochemical, and manufacturing. This book has 29 chapters divided into five sections and opens with a discussion on the role of professional complacency in bridge failures. The first section is devoted to failure investigation and covers topics ranging from failure analysis of a hydraulic retarder piston to the use of scanning electron microscopy in investigating tungsten carbide-cobalt fractured components. The second section deals with slow crack growth and considers an approach to assessing structural integrity and fatigue

failures in vibrating equipment. Failures arising from repair welding and incomplete heat treatment are described. The remaining chapters explore fitness for purpose evaluation of fractures; the environmental effects of fractures; and case studies of failure prevention in industries such as petrochemical, power generation, and transportation. This monograph will be of interest to structural engineers, metallurgists, and materials scientists and technologists.

*Cracked* Louise McCreesh,2020-05-07 'Cracked is a perfect book. I loved it. Sensitive, poignant and tender - all delivered in the grip of a white-knuckle whodunnit' - Rachael Blok, bestselling author of *The Scorched Earth* Seven patients. One dark secret. PHILLIP WALTON HAS BEEN MURDERED. AND THIS IS NOT THE FIRST MURDER. Jenny Nilson hasn't seen her former psychiatrist Phillip since she left the Hillside Psychiatric Unit eight years ago. She wanted to forget everything about her time there, so she kept her secrets buried deep. Especially from her new husband. But now the police are knocking at her door with evidence of her involvement in Phillip's death. It seems as though everything she's kept hidden is about to spill out. Jenny desperately needs to speak to old friends, and old enemies, from those dark years. Because they are the only ones who know what really happened at Hillside, and about the dark secret that Phillip kept for them all - that this is not the first death. *Cracked* is the blisteringly tense, deliciously dark and twisty debut thriller which is perfect for fans of *THE SILENT PATIENT* and *THE WOMAN IN THE WINDOW*. \*Trigger Warning: This novel deals with issues of self harm and suicide that some readers may find upsetting\* REAL READERS LOVE CRACKED 'I couldn't put this book down. *The Nutshell Technique* Jill Chamberlain,2016-03-01 Veteran script consultant Jill Chamberlain discovered in her work that an astounding 99 percent of first-time screenwriters don't know how to tell a story. These writers may know how to format a script, write snappy dialogue, and set a scene. They may have interesting characters and perhaps some clever plot devices. But, invariably, while they may have the kernel of a good idea for a screenplay, they fail to tell a story. What the 99 percent do instead is present a situation. In order to explain the difference, Chamberlain created the Nutshell Technique, a method whereby writers identify eight dynamic, interconnected elements that are required to successfully tell a story. Now, for the first time, Chamberlain presents her unique method in book form with *The Nutshell Technique: Crack the Secret of Successful Screenwriting*. Using easy-to-follow diagrams ("nutshells"), she thoroughly explains how the Nutshell Technique can make or break a film script. Chamberlain takes readers step-by-step through thirty classic and contemporary movies, showing how such dissimilar screenplays as *Casablanca*, *Chinatown*, *Pulp Fiction*, *The Usual Suspects*, *Little Miss Sunshine*, *Juno*, *Silver Linings Playbook*, and *Argo* all have the same system working behind the scenes, and she teaches readers exactly how to apply these principles to their own screenwriting. Learn the Nutshell Technique, and you'll discover how to turn a mere situation into a truly compelling screenplay story.
