Math with Bad Drawings Ben Orlin, 2018-09-18 A hilarious reeducation in mathematics-full of joy, jokes, and stick figures-that sheds light on the countless practical and wonderful ways that math structures and shapes our world. In Math With Bad Drawings, Ben Orlin reveals to us what math actually is; its myriad uses, its strange symbols, and the wild leaps of logic and faith that define the usually impenetrable work of the mathematician. Truth

and knowledge come in multiple forms: colorful drawings, encouraging jokes, and the stories and insights of an empathetic teacher who believes that math should belong to everyone. Orlin shows us how to think like a mathematician by teaching us a brand-new game of tic-tac-toe, how to understand an economic crises by rolling a pair of dice, and the mathematical headache that ensues when attempting to build a spherical Death Star. Every discussion in the book is illustrated with Orlin's trademark bad drawings, which convey his message and insights with perfect pitch and clarity. With 24 chapters covering topics from the electoral college to human genetics to the reasons not to trust statistics, *Math with Bad Drawings* is a life-changing book for the math-estranged and math-enamored alike.

3D Tic Tac Toe Amy Beth Cyphers,2019-10-26 This little book is perfect for long trips and good old fashioned fun. It's also great if your kids are grounded from electronics and think they are board. After playing this game together your kids will get along like best friends and not fight again for a solid 24 hours. *These claims might not work for every family, but were proven 60% true 10% of the time on our test group. Instructions: 3D Tic-Tac-Toe is a game for two players. One player chooses X and one chooses O Each player takes it in turns to place their mark (X or O) on an empty square in the grid The winner is

the first player to get four in a row in any direction - horizontally, vertically or diagonally. Winning lines can stretch across all four grids as long as they make a straight line from corner to corner. A variation of this game is instead of playing to make one row of four, the goal is to make as many rows of three as possible.

Solitaire Tic-Tac-Toe Michael Birken, 2005 What a great idea: a way to play tic-tac-toe when a partner's not available. Each space in the grid has a page number and a letter. Fill one in, then turn to that page and find out what move the book wants to make. Keep on going until the game is done. There's just one way to come out a winner in each game--but it's not easy! Great for travelers, those waiting on line, or a child sick at home.
