Psychological Trauma and Juvenile Delinquency Patricia K. Kerig,2014-10-20 Recent years have seen an explosion of new research dedicated to understanding the link between psychological trauma and juvenile delinquency. Building on the work of the previous decade which uncovered shocking rates of trauma exposure and posttraumatic stress among juvenile justice-involved youth, more recent work has focused on uncovering the underlying developmental mechanisms that account for the association between trauma and antisocial behavior, as well as identifying the intervening processes that might encourage youth to be more positively social. Part I of this volume is dedicated to research investigating the moderating and mediating variables that might explain how childhood trauma is transformed into adolescent misbehavior. Expert contributors analyse a wide range of both traumas and traumatic reactions, and diverse samples, including little-studied sexual minority youth. This volume is unique in the particular attention it pays to the relatively neglected female offender. Part II describes innovative evidence-based treatments designed specifically to intervene with trauma among delinquent youth, including milieu, individual, group, family and parenting interventions, as well as a novel youth theatre. The collection concludes with reflections on social policy related to the development of a trauma-informed juvenile justice system. This book was originally published as two special issues of the Journal of Child & Adolescent Trauma.

Advances in Information Technology Borworn Papasratorn,Wichian Chutimaskul,Kriengkrai Porkaew,Vajirasak Vanijja,2009-11-16 At the School of Information Technology, KMUTT, we believe that information technology is the most important driver of economy and social development. IT can - able better productivity, as well as helping us to save resources. IT is giving rise to a new round of industrial and business revolution. We now can have products and s- vices that once were believed to be beyond reach. Without IT, it is impossible for people to realize their full potential. Businesses worldwide are harnessing the power of broadband communication, which will have a profound and constructive impact on the economic, social devel- ment, education, and almost all aspects of our life. This new era of unified commu- cation presents us with new challenges. This is why we should work together more closely to enhance the exchange of knowledge related to effective application of broadband communication and IT. It is my sincere hope that all contributions to the Third International Conference on Advances in Information Technology (IAIT 2009) will increase our understanding of how we can have effectively apply this emerging technology for the benefit of all people all around the world. I hope IAIT 2009 will also lead to more research that can contr- ute to a better methodology for IT applications in the era of unified communication. I am very grateful to all our keynotes speakers for coming all the way to Thailand.
