**Risk and Insurance in Construction** Nael G. Bunni,2003-09-02 Those involved in construction have to cope with so much learning in their own discipline that they shun further involvement in subjects such as insurance and law which in themselves are so deeply and intensely complex. However, insurance and law are interwoven in the basic procedures used in the construction industry for undertaking work, be they design, construction, supervision or operation, or any combination of them. This thoroughly revised edition of Nael Bunni's successful book, formerly called Insurance in Construction, provides information on risk, construction law and construction insurance for those involved with all aspects of construction. The chapters on risk have been expanded to include recent developments in the area and provide further examples of events which could occur on what can be viewed as the most risky human work activity, namely construction. New chapters are also added to deal with the insurance clauses of the many new standard forms of contract published in recent years, including FIDIC's new suite of contracts published in September 1999, ICE's seventh edition of the civil engineering standard form of contract, and ICE's second edition of the design/build form.

Long-Term Care in Transition David Barton Smith, 2000-09-30 Long-Term Care in Transition is a carefully documented case study of the changes that took place in the regulation of nursing homes in New York between 1975 and 1980. It covers the history of the regulatory offensive in New York and strategies of control and their effectiveness, touching on such subjects as professional standards, rate-setting, reimbursement, criminal prosecution and consumers. Invaluable reading for health care professionals involved in the management of nursing homes, it concludes with some of the lessons learned from this experience for the health sector as a whole. While regulations have changed since 1980, David B. Smith has written a new preface, which puts the study in perspective. Book jacket.

Decoding the Ethics Code Celia B. Fisher,2021-12-09 Revised to reflect the latest edition of the American Psychological Association's (APA) Ethical Principles of Psychologists and Code of Conduct, Celia B. Fisher's acclaimed Decoding the Ethics Code Fifth Edition explains and puts into practical perspective the format, choice of wording, aspirational principles, and enforceability of the code. Providing in-depth discussions of the foundation and application of each ethical standard to the broad spectrum of scientific, teaching, and professional roles of psychologists, this unique guide helps practitioners effectively use ethical principles and standards to morally conduct their work, avoid ethical violations, and, most importantly, preserve and protect the fundamental rights and welfare of those whom they serve. This edition covers crucial and timely topics, with new sections on the impact of the COVID-19 pandemic and strategies for applying the social justice and liberation psychology moral frameworks to ethical decision making; addressing personal biases and the prejudices of those with whom psychologists work; and healing and self-care for Black, Indigenous, and People of Color psychologists, students and trainees.
