Ciao, Stirling Valerie Pirie,2019-09-03 When Valerie Pirie interviewed for her first real secretarial job after college, she did not expect to end up working for Stirling Moss. Regarded as the greatest driver who was never crowned world champion, he would become not only her new boss but also a lifelong friend. Here, in this playful and moving memoir, she opens up about the man behind the steering wheel. With a joie de vivre and unparalleled pluck, Pirie details the highs and lows of her many years working – and occasionally living – at very close quarters with a true pioneer of Formula One, recounting anecdotes from the track, the office and nights out in the West End of London with one of the best-known names in motor racing. Whether at Goodwood, Le Mans or the Nürburgring, Pirie was often there beside Moss to witness the wins, losses and technical malfunctions – and, of course, his career-ending crash in 1962. If she wasn't at his bedside in the hospital, managing his never-ending building works or – on one occasion – transporting his spare dentures to France, Pirie was accompanying Moss wherever he needed her most. Never 'just' colleagues, the pair were true companions, and this book brings to light the story of their enduring friendship from the classic post-war era of motor racing through to today.

Strengthening Forensic Science in the United States National Research Council,Division on Engineering and Physical Sciences,Committee on Applied and Theoretical Statistics,Policy and Global Affairs,Committee on Science, Technology, and Law,Committee on Identifying the Needs of the Forensic Sciences Community,2009-07-29 Scores of talented and dedicated people serve the forensic science community, performing vitally important work. However, they are often constrained by lack of adequate resources, sound policies, and national support. It is clear that change and advancements, both systematic and scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with consistent application. Strengthening Forensic Science in the United States: A Path Forward provides a detailed plan for addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science, to establish and enforce standards within the forensic science community. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exoneration. Strengthening Forensic Science in the United States gives a full account of what is needed to advance the forensic science disciplines, including upgrading of systems and organizational structures, better training, widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs. While this book provides an essential call-to-action for congress and policy makers, it also serves as a vital tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators.

There's a reason Alison Green has been called "the Dear Abby of the work world." Catching Giants Kevin Gaskell,2022-04-28 Can a small business really compete with the biggest business giants? The typical argument is that they wouldn't have the budget, skills or experience. But Catching Giants demonstrates that this simply isn't true and shows how, even in the toughest of circumstances and competitive environments, it is possible for the small player to win big. When Kevin Gaskell and his small, inexperienced crew took on the 'World's Toughest Row' and set out to cross the Atlantic Ocean in a tiny rowing boat, they knew it would take a single-minded determination, focus, some innovative approaches and smart thinking to beat their Olympic level competition and become world champions. But that's exactly what they did! Through this thrilling, motivating and inspiring story of triumph over seemingly impossible odds, Kevin shares the 80 world-beating lessons that he and his team used to beat the best at their own game. Whatever the challenge and whether it's clarity, strategy, finances or team alignment that appear to stand in your way, these game-changing lessons have the power to help any team leader, manager or business owner overcome barriers and drive their team to reach for, catch and pass their own giants.

The Tyranny of Big Tech Josh Hawley,2021-05-04 The reign of Big Tech is here, and Americans' First Amendment rights hang by a keystroke. Amassing unimaginable amounts of personal data, giants like Google, Facebook, Amazon, and Apple—once symbols of American ingenuity and freedom—have become a techno-oligarchy with overwhelming economic and political power. Decades of unchecked data collection have given Big Tech more targeted control over Americans' daily lives than any company or government in the world. In The Tyranny of Big Tech, Senator Josh Hawley of Missouri argues that these mega-corporations—controlled by the robber

barons of the modern era—are the gravest threat to American liberty in decades. To reverse course, Hawley argues, we must correct progressives’ mistakes of the past. That means recovering the link between liberty and democratic participation, building an economy that makes the working class strong, independent, and beholden to no one, and curbing the influence of corporate and political elites. Big Tech and its allies do not deal gently with those who cross them, and Senator Hawley proudly bears his own battle scars. But hubris is dangerous. The time is ripe to overcome the tyranny of Big Tech by reshaping the business and legal landscape of the digital world.

Confessions of a Recovering Environmentalist and Other Essays Paul Kingsnorth,2017-08-01 A provocative and urgent essay collection that asks how we can live with hope in “an age of ecocide” Paul Kingsnorth was once an activist—an ardent environmentalist. He fought against rampant development and the depredations of a corporate world that seemed hell-bent on ignoring a looming climate crisis in its relentless pursuit of profit. But as the environmental movement began to focus on “sustainability” rather than the defense of wild places for their own sake and as global conditions worsened, he grew disenchanted with the movement that he once embraced. He gave up what he saw as the false hope that residents of the First World would ever make the kind of sacrifices that might avert the severe consequences of climate change. Full of grief and fury as well as passionate, lyrical evocations of nature and the wild, *Confessions of a Recovering Environmentalist* gathers the wave-making essays that have charted the change in Kingsnorth’s thinking. In them he articulates a new vision that he calls “dark ecology,” which stands firmly in opposition to the belief that technology can save us, and he argues for a renewed balance between the human and nonhuman worlds. This iconoclastic, fearless, and ultimately hopeful book, which includes the much-discussed “Uncivilization” manifesto, asks hard questions about how we’ve lived and how we should live.
