*Training and Racing with a Power Meter, 2nd Ed.* Hunter Allen, Andrew Coggan, 2012-11-27 Hunter Allen and Andy Coggan, PhD have completely revised the book that made power meters understandable for amateur and professional cyclists and triathletes. Power meters have become essential tools for competitive cyclists and triathletes. No training tool can unlock as much speed and endurance as a power meter--for those who understand how to interpret their data. A power meter displays and records exactly how much energy a cyclist expends, which lends unprecedented insight into that rider's abilities and fitness. With the proper baseline data, a cyclist can use a power meter to determine race strategy, pacing, and tactics. *Training and Racing with a Power Meter* makes it possible to exploit the incredible usefulness of the power meter by explaining how to profile strengths and weaknesses, measure fitness and fatigue, optimize workouts, time race readiness, and race using power. This new edition: Enables athletes to predict future performance and time peak form Introduces fatigue profiling, a new testing method to pinpoint weaknesses Includes two training plans to raise functional

threshold power and time peaks for race day Offers 75 power-based workouts tuned for specific training goals This updated edition also includes new case studies, a full chapter on triathlon training and racing, and improved 2-color charts and tables throughout. Training and Racing with a Power Meter, will continue to be the definitive guide to the most important training tool ever developed for endurance sports.

What was once elite is now commonplace, and today thousands of dedicated riders cycle up to and over 100 miles on ultra-distance rides every week. To add to this, the increasing profile of major events such as Race Across of America (RAAM), Race Across the Alps (RATA) and Ultracycling Dolomites means that many more riders are being drawn to the challenge of 'non-stop' endurance cycling. Ultra-Distance Cycling is the first mainstream book to offer practical, authoritative guidance to cyclists looking to step-up to long-distance endurance events, as well as expert advice to established competitors seeking a competitive advantage. Written by a leading sports scientist and a record-breaking ultra-distance cyclist, this unique book is both science and experience based, offering practical and performance-enhancing insights on a wide range of areas. These include physical training and mental preparation, guidance on your support network, advice on PR and sponsorship, as well as all-important sections on equipment, nutrition and the major ultra-distance cycling events. This definitive manual provides riders with everything they need to ride longer and faster, and to excel at ultra-distance cycling events.
