Human-Computer Interaction Hans-Jörg Bullinger, Jürgen Ziegler, Hans-Jörg Bullinger, Jürgen Ziegler, 1999-09-01 This volume, one of a two volume set, is from the August 1999 HCI International conference papers presented in Munich, Germany. Human Computer Interaction: Communication, Cooperation, and Application Design focuses on the informative and communicative aspects of computer use. A larger number of contributions is concerned with computer-supported cooperation using a wide variety of different techniques. In keeping with the increased focus of HCI International '99 on internet issues and aspects of the global information society, many papers in this volume are centered around information and communication networks and their implications for work, learning, and every-day activities. Due to the growing number and diversity of groups utilizing modern information technologies, issues of accessibility and design for all are becoming more and more pertinent. A range of papers in this volume address these issues and provide the latest research and development results.

Radio Sound Effects Robert L. Mott, 2005-02-18 To today's radio listener, it is difficult to imagine the influence radio once held over the American people. Unlike movies or newspapers, radio both informed and entertained its audience without requiring them to participate. Part of its success depended upon the people who created the sound effects--a squeaking door, the approach of a horse, or a typewriter. The author did live sound effects during the Golden Age of radio. He provides many insights into the early days of the medium as it grappled with entertaining an audience based on a single sense (hearing). How the sounds were produced is fully covered as are the artists responsible for their production. Stories of successful effects production are balanced by embarrassing or funny failures. A list of artists and their shows is included.

The Oxford Handbook of Interactive Audio Karen Collins, Bill Kapralos, Holly Tessler, 2014-04-04 As audiences are increasingly no longer solely listeners but also active producer-consumers, and as video games and other interactive systems increasingly permeate our daily lives, understanding interactivity and its impact on the audience has never been more important. A collection of newly commissioned chapters on interactivity in music and sound edited by preeminent scholars in the field, this book marks the beginning of a journey into understanding the ways in which we interact with sound, and offers a new set of analytical tools for the growing field of interactive audio. What does it mean to interact with sound? How does interactivity alter our experience as creators and listeners? What makes interactive audio different from non-interactive audio? Where does interacting with audio fit into our understanding of sound and music? What does the future hold for interactive media when it comes to our musical and sonic experiences? And how do we begin to approach interactive audio

from a theoretical perspective? The Oxford Handbook of Interactive Audio answers these questions by exploring the full range of interactive audio in video games, performance, education, environmental design, toys, and artistic practice. Examining these questions from a range of approaches -- technological, emotional, psychological, and physical -- the book provides a thorough overview of the fascinating experience of interactive sound.

Radio Live! Television Live! Robert L. Mott,2003-12-11 During the golden age of live radio and television, writers, performers, and producers created their programs in an environment far different from the studios of today. With live programming, anything could happen, and often did. Robert L. Mott, a veteran writer and Emmy-nominated sound effects creator of the live era, recreates the days when television and radio programs were performed live. He includes personal reminiscences as well as a forthright look behind the microphones: horses' hooves were played by coconuts, African-American women were played by white males, and television actors might ad lib an entire program that didn't go as planned. Celebrities like Red Skelton and Jackie Gleason, as well as the unsung heroes in the sound booth and backstage, step up to the mike here. Behind-the-scenes photographs are also included in this account of the exciting--but not always glamorous--world that was live on the air.
