The Alaska Journal Lincoln Steward,2024-01-22 About the Book The Alaska Journal is an exciting day-by-day account of author Lincoln Steward's four-month-long solo bicycle tour from Nazareth, PA, to Homer, AK, and back again. Join him in discovering the planning of the trip, the routes he traveled, the places he ate and slept, and the people he met along the way. Cyclists with an interest in long-distance touring, and non-cyclists as well, will enjoy seeing how Lincoln tests his own physical and mental fortitude by getting out of the comfort zone of his normal everyday surroundings while having interactions with people of all walks of life during a time when people are very divided by political issues. For cyclists thinking about trying a similar adventure, this is an opportunity to learn from his experience. About the Author Lincoln Steward is a 51-year-old, single, self-employed man who lives alone, which is a big reason why he had the opportunity to take the time for such an experience as his bicycle tour. Aside from being an avid cyclist, he remodels homes, mostly bathrooms and kitchens, specializing in tile setting. He tunes up bicycles as a side gig and occasionally does some artistic woodworking as a hobby. Mostly known for bicycling, Lincoln has ridden over ten thousand miles a year for the last decade, including many endurance events, several multi-day "bikepacking" adventures, and three self-supported cross-country tours. He rides with a couple different cycling clubs in the Lehigh Valley, PA, and has worked in a couple different bicycle shops.

Those selected by three-time American Tour de France winner Greg LeMond focus on quieter roads—including dirt and gravel roads—that get cyclists off the beaten track. Organized into eight regional sections covering the entire continent, the book includes some "off the mainland" routes in Hawaii and the Caribbean for good measure. For those with time and a spirit of adventure, routes can be connected for a continuous, coast-to-coast trip.

Bike Tribes Mike Magnuson,2012-05-22 A hilarious and essential illustrated field guide that breaks down the tribes of the bicycling community: from the spandex-clad weekend warriors to the hipsters on street bikes who love to laugh at each other (and themselves) Anyone who rides a bike knows the bicycling world is made up of tribes. From tattooed messengers to pretty urban hipsters to grouchy shop owners, they may look like they live on different planets, but they are united by their abiding love of bikes—and often their total disdain of other members of this insular world. Bike Tribes is the Preppy Handbook of bicycling, replete with one-of-a-kind illustrations that taxonomize the special habits, clothing, preferences, and predilections of cyclists. Mike Magnuson, an avid rider, bicycling expert, and longtime contributor to Bicycling magazine, covers the basics of racing, etiquette, and apparel and gear, including running commentary on cycling culture, poking holes in practically every pretension in the cycling world. Bike Tribes is a fun romp through the various subcultures in the bike community—bound to appeal to newcomers and grizzled cyclists alike.

Everything Is Possible—An 8000 Mile Bike Ride Through North America Olov Giertz,2017-11-30 This book is for you who wants inspiration by discovering the world for a shorter or longer time, and get new impressions every day by traveling, either in nature or by meeting people. Or those who want to know a little more about North America's continent (even if it is your home continent) or want inspiration to feel that everything you want to do is possible. I, Olov Giertz, and my friends, Karl Sitell, and Torbjörn Ekman saw new landscapes and talked to new people every day. Our physical performance was approximately equivalent to body work in eight hours a day. Most people can do this without any special training. We got a lot of experiences, we lived in tents and saw much wildlife and national parks. this book is based on diary notes and letters home from the 1991 trip, when we rode from Anchorage, Alaska, to Key West, Florida, a total of 8000 miles, one third of the Earth's perimeter at the equator. The Illustrating photos are my own. I hope you will enjoy your reading and think it's interesting!

Reinventing the Wheel Chris Zane,2011-03-01 When Chris Zane bought his bicycle shop at age 16, his business struggled until he discovered the secret that catapulted his store into one of the largest in the country. His secret? Provide unbelievable, over the top, excessively generous customer service. Chris Zane isn't a management consultant or professor preaching a theory of customer service; he's a hands-on entrepreneur whose customer service approach has yielded enormous success. Zane has become a business celebrity, including being featured in the most recent round of American Express television ads. Featured in the New York Times and in Associated Press articles and bestowed numerous awards for its unique business practices and outstanding customer relations, Zane's Cycles has produced ideas thought by many to be pie-in-the-sky. But these counterintuitive concepts have proven to be hard-headed and effective. For example, Zane's offers a trade-in program for families who can turn in bicycles their kids have outgrown for a 100 percent credit toward new ones. Initially thought impossibly generous, this program has proven to be good business. Experience and a clear understanding of the lifetime value of a customer makes this program, and many others Zane's implements, work. In Reinventing the Wheel, commonly overlooked elements that make a business exceptional are revealed. Zane produces a case study unlike any other—one that shows the importance of investing in customers and employees and how businesses are really selling experiences, not products. His philosophies and tried-and-true methods of guerilla marketing will show entrepreneurs and business owners how to knock out the competition while thriving in any kind of economy and doing good for the community along the way.

Tandem Bicycling America Paul Wittreich,2002-06 Come along on a bicycle built for two for this double tale of a KHS Tandemania Roma tandem bicycle to take you the length of the Mississippi River from the Canadian Border to the Gulf of Mexico then from Coast to Coast from the Atlantic to the Pacific. The seat belts couldn't be fastened because there aren't any. The only proper precaution is to look out for cars, and have bike helmets on. The country is out there for you to see. But you have to slow down from 70 mph to 10 to 15 mph if you want to see it all. That is, if you want to smell the flowers plus the pig manure scent wafting through the air. America is out there, it is just a case of knowing how to find it. I think we have found it.

- *The Mechanical Horse* Margaret Guroff,2016-04-05 “Guroff has broken new ground with this masterful account of the bicycle revolution set in the broad context of American social and cultural history.” –Tom Crouch, author of *The Bishop’s Boys* With cities across the country adding miles of bike lanes and building bike-share stations, bicycling is enjoying a new surge of popularity in America. It seems that every generation or two, Americans rediscover the freedom of movement, convenience, and relative affordability of the bicycle. The earliest two-wheeler, the draisine, arrived in Philadelphia in 1819 and astonished onlookers with the possibility of propelling themselves “like lightning.” Two centuries later, the bicycle is still the fastest way to cover ground on gridlocked city streets. Filled with lively stories, *The Mechanical Horse* reveals how the bicycle transformed American life. As bicycling caught on in the nineteenth century, many of the country’s rough, rutted roads were paved for the first time, laying a foundation for the interstate highway system. Cyclists were among the first to see the possibilities of self-directed, long-distance travel, and some of them (including a fellow named Henry Ford) went on to develop the automobile. Women shed their cumbersome Victorian dresses—as well as their restricted gender roles—so they could ride. And doctors recognized that aerobic exercise actually benefits the body, which helped to modernize medicine. Margaret Guroff demonstrates that the bicycle’s story is really the story of a more mobile America—one in which physical mobility has opened wider horizons of thought and new opportunities for people in all avenues of life. “[A] fascinating volume . . . Like them or loathe them, cyclists are reprising their initial role as adapters of disruptive technology.” –The Wall Street Journal
