Words, Music and Propaganda Tjaša Mohar, Victor Kennedy, 2023-12-20 Music is used to sell everything from cars to political candidates. How can words and melody so successfully manipulate us? This volume provides answers by examining the ways in which music of various genres, including folk, popular music, rock, and rap, is used to protest and to promote structures of political, commercial, and religious authority. Students, teachers, musicians, historians, policy makers, and fans of music and popular culture will find answers to questions such as: How does music help to build national identity, foster a sense of patriotism, and reflect changes in society? What role did music play in building socialism in Czechoslovakia and in Belarus' 2020 democratic movement? What are the most important features of Ukrainian songs of resistance? The book highlights the role of music in the feminist movement by analysing the Riot Grrrl movement and the history of Olivia Records, as well as the use of music as propaganda in the education system and as "purity propaganda" in religion. Two chapters focus on famous American protest singers, Woody Guthrie and Phil Ochs, and one highlights an ex-socialist society's response to David Bowie's music.

The Last Night on Bikini Patricia MacInnes, 1995 On a boozy island base in 1954, a military family strives to be part of history, the father making preparations to test the H-bomb, the mother sewing uniforms for animals to be exposed to radiation, everyone blissfully ignorant of what lies in store for the downwind islanders. The story is narrated by their teenage daughter, between tests of her own, these of the more amorous kind

Bombs over Bikini Connie Goldsmith, 2014-04-01 In 1946, as part of the Cold War arms race, the US military launched a program to test nuclear bombs in the Marshall Islands of the Pacific Ocean. From 1946 until 1958, the military detonated sixty-seven nuclear bombs over the region's Bikini and Enewetak Atolls. The twelfth bomb, called Bravo, became the world's first nuclear disaster. It sent a toxic cloud of radiation over Rongelap Atoll and other nearby inhabited islands. The testing was intended to advance scientific knowledge about nuclear bombs and radiation, but it had much more far-reaching effects. Some of the islanders suffered burns, cancers, birth defects, and other medical tragedies as a result of radiation poisoning. Many of the Marshallese were resettled on other Pacific islands or in the United States. They and their descendants cannot yet return to Bikini, which remains contaminated by radiation. And while the United States claims it is now safe to resettle Rongelap, only a few construction workers live there on a temporary basis. For *Bombs over Bikini*, author Connie Goldsmith researched government documents, military film footage, and other primary source documents to tell the story of the world's first nuclear disaster. You'll meet the people who planned the test operations, the Marshall Islanders who lost their homes and suffered from radiation illnesses, and those who have worked to hold the US government accountable for catastrophically poor planning. Was the new knowledge about nuclear bombs and radiation worth the cost in human suffering? You decide.

The Deadly Jigsaw Puzzle Alma Bond, 2003-06 My patient, Veronica Vail, was murdered in her Park Avenue apartment. Lt. John Franklin asks my help in finding the killer. We interview her husband Roland, his daughter by a former marriage who never liked Veronica, and Carlos de la Cuesta, a handsome, black-haired drag queen in love with Roland. Lt. Franklin hypothesizes that a stranger broke into the Vail apartment to steal a painting. Roland confirms that an expensive painting has disappeared. A maid named Lottie Lobell tells us that while looking out the window on the day of the murder, she saw a black-haired man run away from the building carrying a painting. He is found and brought in for questioning. Using purely psychological clues, I confront all the suspects with the truth. The killer collapses under my inquisition, and confesses.

Dose of Insanity Davis L. Temple, 2010 *Dose of Insanity* is a sweeping thriller about a

promising new drug that goes horribly wrong when greed and denial trump scientific judgment. An exciting new discovery finds its way into the hands of giant Apex Pharmaceuticals following the death of a young scientist. Despite the many red flags, Apex's tyrannical CEO Maxwell Hall sees only the multibillion dollar potential of the product and rushes it into development. Once Medulin is announced to the world, only a small Connecticut biotechnology company called Genplex is successful at discovering a viable alternative. Genplex and its young research director, Jerrod Wesley, become locked in a battle of David-and-Goliath proportions as they struggle to reach the market first. But more is at stake than market share. Medulin causes patients to become violently insane, and Maxwell Hall leaves a trail of corruption and murder as he covers his tracks. When Jerrod's daughter, Courtney, is touched by the effects of Medulin, she seeks her own revenge. The conclusion is dramatic, terrifying, and satisfying. About the Author Davis L. Temple, Jr. is an established scientist and scientific writer. He is also the author of three previous novels, Two Letters Then Booger Den (for which he received the Mississippi Author of the Year Award in 2004), Preacherman, and Voodoo Storm. He lives with his wife, Patty, in Bonita Springs, Florida, and Greensboro, Georgia.

Expression and Survival Craig Greenman,2009-03-26 Philosophers know suicide primarily as an ethical problem. But in *Expression and Survival*, Craig Greenman argues that, when it comes to suicide, the standard ethical approach may do more harm than good. He develops instead an aesthetic approach, arguing that art-making it or experiencing it-can help a suicidal person survive. Drawing on the work of philosophers and artists, as well as his own experiences, Greenman guides the reader through the landscape to which many suicidal people feel condemned. He traces the problem back to antagonism-we harm others and they harm us-and argues that art, broadly construed, can help us survive it. The result will be of interest to ethicists, aestheticians, social and political philosophers, therapists, and anyone who has ever struggled with suicide. Also included in this volume are two essays, "Writing and Ambivalence" and "What Is Philosophy?"
