Billing and Coding Knowledge, Confidence, and Performance Among Primary Care Healthcare Providers

Teresa Sallas Bruney, 2009 Problem: Billing for primary care services is a skill needed for successful independent practice. When primary care services are provided, clinicians are frequently called

upon to assign a numerical code based on the complexity of the care provided. Third party payers recognize these codes, and base their reimbursement to providers upon them. Studies have affirmed the lack of knowledge of primary care providers regarding accurate coding. Carefully crafted educational interventions can produce changes in healthcare provider knowledge and clinical practice. Refinement and improvement of written patient documentation, improved accuracy of billing and coding, as well as improved, appropriate reimbursement for primary care NPs and physicians could improve the quality of the healthcare services provided, strengthen the financial health of a primary care practice, and lead to increased availability of primary care services to patients. Purpose: The purpose of this study was to describe the need for and provide an educational intervention to improve the billing and coding knowledge, confidence, and performance of primary care providers in a selected state. The rationale for the project was that by crafting an educational intervention based on best practices that met the needs of the targeted group, primary care providers might improve the quality of healthcare services provided. Goal and Objectives: The goal of this project was to design and implement a billing and coding educational intervention leading to changes in the clinical practice of primary care NPs and physicians. Objectives were to conduct a needs assessment regarding the billing and coding needs of primary care healthcare providers in North Central Florida, develop and implement a 2 hour, cost-effective, billing and coding educational symposium, assess demographic information of the population of interest, and evaluate symposium attendee responses regarding changes in billing and coding knowledge, confidence, and performance before and after the symposium. Plan: Phase One: Conduct formal and informal needs assessment; analyze responses. Phase Two: Plan, develop, and implement a billing and coding educational symposium. Phase Three: Collect and analyze data before and after the educational symposium, and evaluate

outcome measurements. Outcomes and Results: Key findings revealed significant changes in the billing and coding knowledge and confidence of primary care APNs and MDs after the educational symposium. Respondents also reported significant changes in clinical practice as a result of having attended the symposium. Ninety percent of respondents reported changes in their billing and coding practices and improvements in their written patient documentation. Sixty eight percent of respondents reported that as a results of their attending the billing and coding symposium, their practice colleagues had also changed their billing and coding practices.

United States Code United States, 2013 The United States Code is the official codification of the general and permanent laws of the United States of America. The Code was first published in 1926, and a new edition of the code has been published every six years since 1934. The 2012 edition of the Code incorporates laws enacted through the One Hundred Twelfth Congress, Second Session, the last of which was signed by the President on January 15, 2013. It does not include laws of the One Hundred Thirteenth Congress, First Session, enacted between January 2, 2013, the date it convened, and January 15, 2013. By statutory authority this edition may be cited U.S.C. 2012 ed. As adopted in 1926, the Code established *prima facie* the general and permanent laws of the United States. The underlying statutes reprinted in the Code remained in effect and controlled over the Code in case of any discrepancy. In 1947, Congress began enacting individual titles of the Code into positive law. When a title is enacted into positive law, the underlying statutes are repealed and the title then becomes legal evidence of the law. Currently, 26 of the 51 titles in the Code have been so enacted. These are identified in the table of titles near the beginning of each volume. The Law Revision Counsel of the House of Representatives continues to prepare legislation pursuant to 2 U.S.C. 285b to enact the remainder of the Code, on a title-by-title basis, into positive law. The 2012 edition of

the Code was prepared and published under the supervision of Ralph V. Seep, Law Revision Counsel. Grateful acknowledgment is made of the contributions by all who helped in this work, particularly the staffs of the Office of the Law Revision Counsel and the Government Printing Office--Preface.

The Changing Legal Orders in Hong Kong and Mainland China: Essays on "One Country, Two Systems" Albert H.Y. Chen, 2021-03 This collection of selected works by Professor Albert H.Y. Chen shows the contours of the author's scholarship as it

developed over 35 years of his academic career, from 1984 to the present. The essays are divided into three sections which cover the three major domains of Professor Chen's research. Part I covers the legal developments and controversies of "One Country, Two Systems" since the Hong Kong interpretation on "the right of abode" in 1999 to the anti-extradition movement of 2019. Part II shifts to focus on tradition and modernity in Chinese Law, including China's Confucian and Legalist traditions and how the socialist legal system in China evolved and modernized in the era of "reform and opening". Part III examines the transplantation of Western thinking and constitutionalism to East Asia in modern times and discusses the achievements and failures of these efforts. In conjunction with an introductory chapter that sets out the basic orientation and paradigm of these legal and constitutional studies and an epilogue that reflects on the main themes, this collection exemplifies the author's important contributions to the field and provides insight into how the legal orders in Hong Kong and mainland China have changed over the course of Professor Chen's academic career.

Annual Report for Illinois Illinois Interagency Council on Early Intervention, 1994

Pay for Performance in Health Care Jerry Cromwell, Michael G. Trisolini, Gregory C. Pope, Janet B. Mitchell, Leslie M. Greenwald, 2011-02-28 This book provides a balanced assessment of pay for performance (P4P), addressing both its promise and its shortcomings. P4P programs have become widespread in health care in just the past decade and have generated a great deal of enthusiasm in health policy circles and among legislators, despite

limited evidence of their effectiveness. On a positive note, this movement has developed and tested many new types of health care payment systems and has stimulated much new thinking about how to improve quality of care and reduce the costs of health care. The current interest in P4P echoes earlier enthusiasms in health policy—such as those for capitation and managed care in the 1990s—that failed to live up to their early promise. The fate of P4P is not yet certain, but we can learn a number of lessons from experiences with P4P to date, and ways to improve the designs of P4P programs are becoming apparent. We anticipate that a “second generation” of P4P programs can now be developed that can have greater impact and be better integrated with other interventions to improve the quality of care and reduce costs.
