**Applied Artificial Higher Order Neural Networks for Control and Recognition** Zhang, Ming,2016-05-05 In recent years, Higher Order Neural Networks (HONNs) have been widely adopted by researchers for applications in control signal generating, pattern recognition, nonlinear recognition, classification, and prediction of control and recognition scenarios. Due to the fact that HONNs have been proven to be faster, more accurate, and easier to explain than traditional neural networks, their applications are limitless. Applied Artificial Higher Order Neural Networks for Control and Recognition explores the ways in which higher order neural networks are being integrated specifically for intelligent technology applications. Emphasizing emerging research, practice, and real-world implementation, this timely reference publication is an essential reference source for researchers, IT professionals, and graduate-level computer science and engineering students.

**Nature-Inspired Computing: Concepts, Methodologies, Tools, and Applications** Management Association, Information Resources,2016-07-26 As technology continues to become more sophisticated, mimicking natural processes and phenomena also becomes more of a reality. Continued research in the field of natural computing enables an understanding of the world around us, in addition to opportunities for man-made computing to mirror the natural processes and systems that have existed for centuries. Nature-Inspired Computing: Concepts, Methodologies, Tools, and Applications takes an interdisciplinary approach to the topic of natural computing, including emerging technologies being developed for the purpose of simulating natural phenomena, applications across industries, and the future outlook of biologically and nature-inspired technologies. Emphasizing critical research in a comprehensive multi-volume set, this publication is designed for use by IT professionals, researchers, and graduate students studying intelligent computing.

CAPE covers computer-aided methods, algorithms and techniques related to process and product engineering. The ESCAPE-20 scientific program reflects the strategic objectives of the CAPE Working Party: to check the status of historically consolidated topics by means of their industrial application and to evaluate their emerging issues. \* Includes a CD that contains all research papers and contributions \* Features a truly international scope, with guest speakers and keynote talks from leaders in science and industry \* Presents papers covering the latest research, key topical areas, and developments in computer-aided process engineering (CAPE)

British Slave Emancipation William A. Green,1991 This study of the West Indies in the mid-19th century draws on the experiences of more than a dozen sugar colonies to illustrate the politics and society of the islands on the eve of emancipation. It places British government policies towards the region in the context of Victorian attitudes.
