Blood And Urine Tests Karthika P, 2016-05-01 It is very often that we perform various blood and urine tests. As usual, you will be offered with a copy of the results. Generally, these results contain readings or levels of certain materials present in our body which probably will be the reason for the sickness we had experienced. A doctor evaluates these reports and tells us about our ailment. They are familiar with the standard reading and they could easily find the reading which is either high/low/normal. If we are also familiar with the normal standards, we too can get an idea about the results we have in hand. This book contains all the Blood Tests and Urine Tests with the normal levels or the standard levels. It will be helpful for you to have an analysis of your own test result, and learn outside the scope of consultation.
