Toxic Timescapes Simone M. Müller, May-Brith Ohman Nielsen, 2023-01-17 An interdisciplinary environmental humanities volume that explores human-environment relationships on our permanently polluted planet. While toxicity and pollution are ever present in modern daily life, politicians, juridical systems, media outlets, scholars, and the public alike show great difficulty in detecting, defining, monitoring, or generally coming to terms with them. This volume's contributors argue that the source of this difficulty lies in the struggle to make sense of the intersecting temporal and spatial scales working on the human and more-than-human body, while continuing to acknowledge race, class, and gender in terms of global environmental justice and social inequality. The term toxic timescapes refers to this intricate intersectionality of time, space, and bodies in relation to toxic exposure. As a tool of analysis, it unpacks linear understandings of time and explores how harmful substances permeate temporal and physical space as both event and process. It equips scholars with new ways of creating data and conceptualizing the past, present, and future presence and possible effects of harmful substances and provides a theoretical framework for new environmental narratives. To think in terms of toxic timescapes is to radically shift our understanding of toxicants in the complex web of life. Toxicity, pollution, and modes of exposure are never static; therefore, dose, timing, velocity, mixture, frequency, and chronology matter as much as the geographic location and societal position of those exposed. Together, these factors create a specific toxic timescape that lies at the heart of each contributor's narrative. Contributors from the disciplines of history, human geography, science and technology studies, philosophy, and political ecology come together to demonstrate the complex reality of a toxic existence. Their case studies span the globe as they observe the intersection of multiple times and spaces at such diverse locations as former battlefields in Vietnam, aging nuclear-weapon storage facilities in Greenland, waste deposits in southern Italy, chemical facilities along the Gulf of Mexico, and coral-breeding laboratories across the world.

Advances in Digital Forensics Mark Pollitt, Sujeet Sheno, 2006-03-28 Digital forensics deals with the acquisition, preservation, examination, analysis and presentation of electronic evidence. Networked computing, wireless communications and portable electronic devices have expanded the role of digital forensics beyond traditional computer crime investigations. Practically every crime now involves some aspect of digital evidence; digital forensics provides the techniques and tools to articulate this evidence. Digital forensics also has myriad intelligence applications. Furthermore, it has a vital role in information assurance - investigations of security breaches yield valuable information that can be used to design more secure systems. Advances in Digital Forensics describes original research results and innovative applications in the emerging discipline of digital forensics. In addition, it highlights some of the major technical and legal issues related to digital evidence and electronic crime investigations. The areas of coverage include: Themes and Issues in Digital Forensics Investigative Techniques Network Forensics Portable Electronic Device Forensics Linux and File System Forensics Applications and Techniques This book is the first volume of a new series produced by the International Federation for Information Processing (IFIP) Working Group 11.9 on Digital Forensics, an international community of scientists, engineers and practitioners dedicated to advancing the state of the art of research and practice in digital forensics. The book contains a selection of twenty-five edited papers from the First Annual IFIP WG 11.9 Conference on Digital Forensics, held at the National Center for Forensic Science, Orlando, Florida, USA in February 2005. Advances in Digital Forensics is an important resource for researchers, faculty members and graduate students, as well as for practitioners and individuals engaged in research and development efforts for the law enforcement and intelligence communities. Mark Pollitt is President of Digital Evidence Professional Services, Inc., Ellicott City, Maryland, USA. Mr. Pollitt, who is retired from the Federal Bureau of Investigation (FBI), served as the Chief of the FBI's Computer Analysis Response Team, and Director of the Regional Computer Forensic Laboratory National Program. Hitler and Czechoslovakia in World War II Patrick Crowhurst, 2013-10-24 The invasion of Czechoslovakia by Nazi Germany in March 1939 helped to precipitate Europe's descent into World War II six months later. The move, supposedly to protect the Sudeten Germans, shocked many in Europe, who saw it as a clear statement of intent by Hitler. Here, Patrick Crowhurst argues that occupation of the Sudetenland and the Czech lands was also crucial to the Nazi war machine. The armaments, factories and raw materials that Hitler seized accelerated Germany's capabilities; Czech tanks would prove crucial in the Ardennes and, as the Wehrmacht fought at Stalingrad, Armaments Minister Albert Speer was corralling Czech industrial machinery to produce engines, aircraft and equipment in support. In addition, new Slovakian and Czech primary material are used to give a new in-depth account of the German reaction to the assassination of Reinhardt Heydrich on the streets of Prague in June 1942. The recriminations were brutal, and dovetailed with Hitler's plans for the genocide of Czech Jewry. This is a new side of the History of Nazi Europe, and argues for the centrality of the Czech occupation in the overall narrative of World War II.

The Texas Miracle John Marshall, 2016-07-22 In The Texas Miracle, author John Marshall offers a detailed examination of the largest political fraud in Texas since the Sharpstown scandal in the early 1970s. An extension of his earlier book, Playing Possum, he expands on the information surrounding a massive land deal. Marshall offers a political look at what took place in Texas. In 2006, the Staubach Company advised the Brazos River Authority to begin charging a fair market rate at Possum Kingdom Lake to the people who had built their weekend homes around the shoreline. At that time, the average lake lot was three-quarters of an acre and the average rental rate was \$76 per month. In 2007, Governor Rick Perry, Lt. Governor David Dewhurst, and a handful of Texas legislators attempted to force the Brazos River Authority to sell the shoreline of Possum Kingdom Lake to the wealthy weekenders at a discount. This effort was opposed by Republicans, Democrats, and bureaucrats alike, and it met a humiliating defeat. Two years later, the weekenders and the politicians enlisted the services of the River Card. The Texas Miracle tells that tale.

Archives and New Modes of Feminist Research Maryanne Dever, 2020-04-28 In an era when the metaphor of the archive is invoked to cover almost any kind of memory, collection or accumulation, it is important to re-examine what is entailed—politically and methodologically—in the practice of feminist archival research. This question is central not only to the renewed interest many disciplines are showing in empirical research in archives but also given the current explosion of online social and cultural data which has fundamentally transformed what we understand an archive to be. Contributors in this collection are keen to mark out what may be novel and what is enduring in the ways in which feminist thought and feminist practice frame archives. Importantly, they engage with archives in their historical and political complexity rather than treating them as simple

repositories of source material. In this respect, contributors are keenly interested in what it means to archive particular materials, and not simply in what those materials may hold for feminist researchers. The collection features established and emerging feminist scholars and brings together interventions from across such disciplines as history, literature, modernist studies, cinema studies and law. This book was originally published as a special issue of the journal *Australian Feminist Studies*.

Secret Wings of World War II Lance Cole, 2015-06-30 There are many myths and legends surrounding the advanced German aeronautical technology of the Second World War. There are also facts and proven events. Yet within these stories and behind these facts lie conspiracy theories, mistaken assumptions and denials that seem to contradict the evidence. So what really happened? How far ahead were the German scientists? And, of even greater interest, why and how? There have been other books about advanced German wartime aeronautics, yet few authors have fully examined the detail of the designs and their relevance to the fighter and bomber legends of the 1950s and '60s, let alone the current crop of military and civil all-wing or blended-wing aircraft. This book charts the story from its origins, through current-day innovations and beyond, into the all-wing future of tomorrow.

Political Archive of Paul de Man Martin McQuillan, 2012-08-06 Re-reads a major theorist in terms of the current crisis in sovereignty and global capital. Taking de Man's recently published manuscript *Textual Allegories* as a point of departure, 13 experts, themselves significant voices in contemporary literary theory, revisit de Man's account of Rousseau and what he calls a 'Theotropic Allegory' (the second to last step before 'Political Allegory', on the road toward a general theory of Textual Allegory). They frame de Man's readings of Rousseau in a 'post-theoretical' landscape concerned with political theology, occupied with the transformation of the western model of sovereignty, and faced with the apparent collapse of the capitalist global contract. The volume is framed by an introduction by leading de Man scholar, Martin McQuillan, and concludes with an original and previously unpublished text by Paul de Man.

The Routledge History of American Sport Linda J. Borish, David K. Wiggins, Gerald R. Gems, 2016-10-04 The *Routledge History of American Sport* provides the first comprehensive overview of historical research in American sport from the early Colonial period to the present day. Considering sport through innovative themes and topics such as the business of sport, material culture and sport, the political uses of sport, and gender and sport, this text offers an interdisciplinary analysis of American leisure. Rather than moving chronologically through American history or considering the historical origins of each sport, these topics are dealt with organically within thematic chapters, emphasizing the influence of sport on American society. The volume is divided into eight thematic sections that include detailed original essays on particular facets of each theme. Focusing on how sport has influenced the history of women, minorities, politics, the media, and culture, these thematic chapters survey the major areas of debate and discussion. The volume offers a comprehensive view of the history of sport in America, pushing the field to consider new themes and approaches as well. Including a roster of contributors renowned in their fields of expertise, this ground-breaking collection is essential reading for all those interested in the history of American sport.

Secret Science Ulf Schmidt, 2015-07-08 From the early 1990s, allegations that servicemen had been duped into taking part in trials with toxic agents at top-secret Allied research facilities throughout the twentieth century featured with ever greater frequency in the media. In Britain, a whole army of over 21,000 soldiers had participated in secret experiments between 1939 and 1989. Some remembered their stay as harmless, but there were many for whom the experience had been all but pleasant, sometimes harmful, and in isolated cases deadly. *Secret Science* traces, for the first time, the history of chemical and biological weapons research by the former Allied powers, particularly in Britain, the United States, and Canada. It charts the ethical trajectory and culture of military science, from its initial development in response to Germany's first use of chemical weapons in the First World War to the ongoing attempts by the international community to ban these types of weapons once and for all. It asks whether Allied and especially British warfare trials were ethical, safe, and justified within the prevailing conditions and values of the time. By doing so, it helps to explain the complex dynamics in top-secret Allied research establishments: the desire and ability of the chemical and biological warfare corps, largely comprised of military officials, scientists, and expert civil servants, to construct and identify a never-ending stream of national security threats which served as flexible justification strategies for the allocation of enormous resources to conducting experimental research with some of the most deadly agents known to man. *Secret Science* offers a nuanced, non-judgemental analysis of the contributions made by servicemen, scientists, and civil servants to military research in Britain and elsewhere, not as passive, helpless victims 'without voices', or as laboratory and desk perpetrators 'without a conscience', but as history's actors and agents of their own destiny. As such it also makes an important contribution to the burgeoning literature on the history and culture of memory.

AC/E Digital Culture Annual Report 2014 AC/E, 2014-04-02 The AC/E Digital Culture Annual Report aims to become an annual document of reference that analyses the evolution of digital trends in the cultural sector (museums, libraries, publishing companies, booksellers, theatre companies, film production, music companies, etc.) It is designed to be a manual for constant reference and consultation for cultural sector professionals wishing to discover the advantages & benefits derived from the use of new technologies. The first report, coordinated by Javier Celaya of Dosdoce.com, analyses the impact of the Internet in the overall cultural sector, as well as it provides a specific focus on the use of new technologies in the performing arts (production, promotion, staging, distribution, etc.). Each year, the report will focus on a specific area of the cultural sector. The aim of the study is to exchange knowledge by identifying cases of success and good practices at both the national and international levels in order to enhance performing arts professionals' awareness of the possibilities new technologies can offer their entities and also of the digital trends they will need to bear in mind in the coming years. In this regard, the report is much more than just an initial compilation of the statistical data needed to establish the point of departure and current use of different types of technology. This study involves preliminary research and is open to the participation of any cultural entity wishing to contribute its experience and present cases of good practice and success in the use of different types of technology applied to the performing arts.
