Wilbur A. Smith

The Birds of Prey John Ralston Saul, 1977

Birds of Prey Pete Dunne, Kevin T. Karlson, 2017-04-25 A visually stunning, comprehensive resource on North America's birds of prey, from the award-winning birder and author of *Gulls Simplified*. Always a popular group of birds, raptors symbolize freedom and fierceness, and in Pete Dunne's definitive guide, these traits are portrayed in hundreds of stunning color photographs showing raptors up close, in flight, and in action—fighting, hunting, and nesting. These gorgeous photographs enhance the comprehensive, authoritative text, which goes far beyond identification to cover raptor ecology, behavior, conservation, and much more. In returning to his forte and his first love, Pete Dunne has crafted a benchmark book on raptors: the first place to turn for any question about these highly popular birds, whether it's what they eat, where they live, or how they behave. "Birds of Prey is exhaustively researched and complemented by a stunning collection of photos, but the real highlight is...Dunne's writing. He weaves together personal anecdotes, historical accounts, and technical information to create something greater than the sum of all its parts: a beautiful, authoritative, and engagingly written guide to the natural history of North American hawks."—David Sibley, author of *The Sibley Guide to Birds* "Books about raptors used to fall into two major categories: field guides versus nature writing. No more!...Dunne's new book skillfully conjoins those two genres. Life a good field guide, *Birds of Prey* is authoritative and utilitarian, and like our finest nature writing, Dunne's prose is lyrical, sensitive, and full of feeling."—Ted Floyd, editor, *Birding*

Birds of Prey Leslie Brown, 1977

Flight Identification of European Raptors Richard F. Porter, 1981 For this third edition the typematter has been reset throughout to accommodate the many revisions and additions to the text.

The identification drawings, too, have been reviewed and Ian Willis has amended or redrawn elements of most of the Figures and has provided several additional drawings. There are 70 new photographs in the section of plates which has now been increased to 96 pages with a total of 248 photographs. The identification of the diurnal birds of prey is especially difficult. There is wide variation in plumage among some species, especially the eagles and buzzards, and in all species general outlines and wing positions are much affected by the prevailing conditions, by wind and light, and by the bird's behaviour at the time. Often, too, the birds are only sighted at long range, and the authors believe that when travelling extensively in Europe even the expert cannot hope to identify more than seventy per cent of the raptors seen. In the book, the 38 European species have been grouped into seven sections. Each section brings together those species with similar field characters between which confusion can so often, and so easily, arise. Each group has an introductory comparative text and drawings, and the species within the groups are then treated individually. The text, succinct and detailed as it is, is greatly enhanced by Ian Willis's fine drawings, and there are 248 photographs especially chosen to illustrate aspects of identification. The book has a final section summarising the legal status of birds of prey in European countries. Jacket drawings are by Ian Willis.--Bloomsbury Publishing.
