Business Process Management Capabilities Janne Ohtonen, 2015-09-12 This thesis focuses on analysing Business Process Management (BPM) Capabilities (BPMC) through a practical approach based on design science. The research questions are (i) which capability factors are related to the success and failure of BPM initiatives and (ii) how can organisations take these capability factors into account in their respective environments. This research started from the personal interest of the researcher on BPM. The researcher has been working between the academic and practical worlds over time and knew that although there is a lot of research on the success and failure factors of BPM, that information has not been put to good use in the practical world. This led to an idea to gather the most important factors and to design a practical BPM capability factors artifact. This artifact helps organisations to identify and improve their BPMCs. The artifact is built based on an extensive literature review, expert interviews and case studies. The artifact consists of 35 key capability factors that affect the success and failure of BPM initiatives. It also includes a process that organisations can use to take those capability factors into account in their BPM initiatives. This research contributes by identifying recent important BPM capability

factors as well as using design science combined with interviews, surveys and case studies to build the artifact. From a practical perspective, this research was able to produce a process that can be used in organisations first to evaluate their BPMCs and then to improve them. The information produced by using the BPM capability artifact was found to be both useful and interesting by all participating real-life case organisations.

Daring Democracy Frances Moore Lappé, Adam Eichen, 2017-09-26 An optimistic book for Americans who are asking, in the wake of Trump's victory, What do we do now? The answer: We need to organize and fight to protect and expand our democracy. Americans are distraught as tightly held economic and political power drowns out their voices and values. Legendary Diet for a Small Planet author Frances Moore Lappé and organizer-scholar Adam Eichen offer a fresh, surprising response to this core crisis. This intergenerational duo opens with an essential truth: It's not the magnitude of a challenge that crushes the human spirit. It's feeling powerless—in this case, fearing that to stand up for democracy is futile. It's not, Lappé and Eichen argue. With riveting stories and little-known evidence, they demystify how we got here, exposing the well-orchestrated effort that has robbed Americans of their rightful power. But at the heart of this unique book are solutions. Even in this divisive time, Americans are uniting across causes and ideologies to create a "canopy of hope" the authors call the Democracy Movement. In this invigorating "movement of movements," millions of Americans are leaving despair behind as they push for and achieve historic change. The movement and democracy itself are vital to us as citizens and fulfill human needs—for power, meaning, and connection—essential to our thriving. In this timely and necessary book, Lappé and Eichen offer proof that courage is contagious in the daring fight for democracy.

Strategic Public Relations Leadership Anne Gregory, Paul Willis, 2022-07-22 Public relations professionals are operating in an increasingly challenging and complex environment. Pressures from outside the organisation include new accountabilities, empowered stakeholders, increased public cynicism and a new communication landscape. Internally, there are increasing demands to demonstrate a strategic contribution, alongside a requirement to coach and counsel senior managers exposed to these environmental pressures. This revised and updated edition provides a framework to enable public relations professionals to clearly articulate and demonstrate their own contribution to organisational effectiveness, while also setting out the specific capabilities public relations leaders must exhibit to operate at the highest levels of the organisation. This edition further develops the pioneering approach to integrating thinking around public relations, leadership, and strategy. It has been updated comprehensively to address contemporary developments and introduce new research and fresh perspectives from the authors. New to this edition are insights from Chief Executives on what they expect from public relations leaders and a comprehensive set of capabilities which scope the demanding role of professionals at the top of their game. Concise and practical, this textbook is suitable for MBA and other postgraduate and executive education qualifications in Public Relations and Corporate Communications – especially for those students who wish to pursue a successful career as a professional public relations specialist, able to operate strategically at the top of successful organisations.

Lenses on Reading Diane H. Tracey,Lesley Mandel Morrow,2006 This accessible text provides an extensive survey of the major theories and models that influence reading instruction and research. Ethics in Obstetrics and Gynecology Laurence B. McCullough, Frank A. Chervenak,1994 This book offers a comprehensive and clinically practical approach to ethics in the everyday practice of obstetrics and gynecology. The topics the authors address include: contraception, abortion, selective termination of multifetal pregnancies, gynecologic cancer, in vitro fertilization, surrogacy, prenatal diagnosis, fetal therapy, cephalocentesis, prematurity, HIV infection, and court ordered cesarean delivery. The issues involved in making decisions in many of these areas are a source of conflict, and lead to crisis between the physician and patient. One of the book's strengths is its emphasis on prevention and, if prevention fails, management, of the conflicts and crises which arise in these areas of medicine. The authors develop their preventative and management strategies on the basis of a framework for bioethics in the clinical setting. This framework is rigorously established and defended. The authors argue that four virtues -- self effacement, self sacrifice, compassion, and integrity -- generate the physician's obligation to protect and promote the patient's interest. They then identify the three types of patient's interests -- social role interests, subjective interests, and deliberative interests -- and they reinterpret the ethical principles of beneficence and respect for autonomy in terms of these. The concept of the fetus as patient, the physician's obligation to third parties, and the moral standing of fathers and family members are also addressed. The implications of their argument sets the stage for the discussions of prevention and management in the remaining sections of the book. *Ethics in Obstetrics and Gynecology* is a unique addition to the literature in both biomedical ethics and obstetrics and gynecology. It demonstrates that ethics should be

regarded as an essential part of obstetrics and gynecology, and that clinical practice is incomplete without i
