Vili Lehdonvirta

Cloud Empires Vili Lehdonvirta,2024-02-06 The rise of the platform economy into statelike dominance over the lives of entrepreneurs, users, and workers. The early Internet was a lawless place, populated by scam artists who made buying or selling anything online risky business. Then Amazon, eBay, Upwork, and Apple established secure digital platforms for selling physical goods, crowdsourcing labor, and downloading apps. These tech giants have gone on to rule the Internet like autocrats. How did this happen? How did users and workers become the hapless subjects of online economic empires? The Internet was supposed to liberate us from powerful institutions. In *Cloud Empires*, digital economy expert Vili Lehdonvirta explores the rise of the platform economy into statelike dominance over our lives and proposes a new way forward. Digital platforms create new marketplaces and prosperity on the Internet, Lehdonvirta explains, but they are ruled by Silicon Valley despots with little or no accountability. Neither workers nor users can “vote with their feet” and find another platform because in most cases there isn’t one. And yet using antitrust law and decentralization to rein in the big tech companies has proven difficult. Lehdonvirta tells the stories of pioneers who helped create—or resist—the new social order established by digital platform companies. The protagonists include the usual suspects—Amazon founder Jeff Bezos, Travis Kalanick of Uber, and Bitcoin’s inventor Satoshi Nakamoto—as well as Kristy Milland, labor organizer of Amazon’s Mechanical Turk, and GoFundMe, a crowdfunding platform that has emerged as an ersatz stand-in for the welfare state. Only if we understand digital platforms for what they are—institutions as powerful as the state—can we begin the work of democratizing them.

How to Be a Capitalist Without Any Capital Nathan Latka,2019-03-05 Instant Wall Street Journal Bestseller! You don't need to be Ivy League educated, have money, be creative, or even have an idea to get rich. You just need to be willing to break the rules. At nineteen, I founded a software company with \$119 in my bank account. Five years later, it was valued at \$10.5 million. I don't consider myself exceptionally brilliant. I just realized something few people know: You don't need lots of money or an original idea to get really rich. Now, I make more than \$100,000 in passive income every month, while also running my own private equity firm and hosting The Top Entrepreneurs podcast, which has more than 10 million downloads. This book will show you how I went from college dropout to member of the New Rich. And I'm holding nothing back. You'll see my tax returns, my profit and loss statements, my email negotiations when buying and selling companies. It's time to forget your grandfather's advice. I'll teach you how to be a modern opportunist--investor, entrepreneur, or side hustler--by breaking these four golden rules of the old guard: 1.Focus on one skill: Wrong. Don't cultivate one great skill to get ahead. In today's business world, success goes to the multitaskers. 2.Be unique: Wrong. The way to get rich is not by launching a new idea but by aggressively copying others and then adding your own twist. 3.Focus on one goal: Wrong. Focus instead on creating a system to produce the outcome you want, not just once, but over and over again. 4.Appeal to the masses: Wrong. The masses are broke (\$4k average net worth in America?). Let others cut a trail through the jungle so you can peacefully walk in and capitalize on their hard work. By rejecting these defunct rules and following my unconventional path, you can copy other people's ideas shamelessly, bootstrap a start-up with almost no funding, invest in small local businesses for huge payoffs, and reap all the benefits.

He's been a growth consultant for several more multimillion-dollar startups. His companies have been featured in TechCrunch more than a dozen times. Now, he shares his remarkable story in *Getting Acquired: How I Built and Sold My SaaS Startup*. Follow Gazdecki's journey: starting a company at the age of twenty-one and hiring, then leading, over one hundred employees without any real work experience of his own. This honest, personal look behind the scenes reveals both his successes and his mistakes as he labored to build a compelling brand story and catalyze growth on a shoestring budget, almost lost everything, and finally sold the company for millions at the age of twenty-nine.

*Built to Sell* John Warrillow, 2012-12-24 Run your company. Don't let it run you. Most business owners started their company because they wanted more freedom—to work on their own schedules, make the kind of money they deserve, and eventually retire on the fruits of their labor. Unfortunately, according to John Warrillow, most owners find that stepping out of the picture is extremely difficult because their business relies too heavily on their personal involvement. Without them, their company—no matter how big or profitable—is essentially worthless. But the good news is that entrepreneurs can take specific steps—no matter what stage a business is in—to create a valuable, sellable company. Warrillow shows exactly what it takes to create a solid business that can thrive long into the future.
