The Loneliness of the Black Republican Leah Wright Rigueur. 2016-08-02 The story of black conservatives in the Republican Party from the New Deal to Ronald Reagan Covering more than four decades of American social and political history, The Loneliness of the Black Republican examines the ideas and actions of black Republican activists, officials, and politicians, from the era of the New Deal to Ronald Reagan's presidential ascent in 1980. Their unique stories reveal African Americans fighting for an alternative economic and civil rights movement-even as the Republican Party appeared increasingly hostile to that very idea. Black party members attempted to influence the direction of conservatism-not to destroy it, but rather to expand the ideology to include black needs and interests. As racial minorities in their political party and as political minorities within their community, black Republicans occupied an irreconcilable position-they were shunned by African American communities and subordinated by the GOP. In response, black Republicans vocally, and at times viciously, critiqued members of their race and party, in an effort to shape the attitudes and public images of black citizens and the GOP. And yet, there was also a measure of irony to black Republicans' loneliness: at various points, factions of the Republican Party, such as the Nixon administration, instituted some of the policies and programs offered by black party members. What's more, black Republican initiatives, such as the fair housing legislation of senator Edward Brooke, sometimes garnered support from outside the Republican Party, especially among the black press, Democratic officials, and constituents of all races. Moving beyond traditional liberalism and conservatism, black Republicans sought to address African American racial experiences in a distinctly Republican way. The Loneliness of the Black Republican provides a new understanding of the interaction between African Americans and the Republican Party, and the seemingly incongruous intersection of civil rights and American conservatism.

African Americans and the Media Catherine Squires,2009-10-12 From pamphlets denouncing slavery to boycotts of Hollywood, African Americans have fought for adequate representations of themselves in the mass media industries of the United States. This book provides readers with an interdisciplinary overview of the past, present, and future of African Americans in U.S. media and the ongoing project of gaining racial equality in media: a process which spans generations. Catherine Squires introduces the reader to the varied ways in which Black Americans have navigated cultural, political, and economic obstacles both to make their own media and to critique mainstream media. Synthesizing the work of social scientists, historians,

cultural critics, as well as comments from audience members and media producers, African Americans and the Media gives readers a lively entry point to classic and contemporary studies of Black Americans and mass media. Across the chapters, readers follow African Americans' struggles to harness the power of print, broadcasting, film, and digital media, through five main themes which are woven through the book: representation, circulation, innovation, audience and responsibility. Taking in examples as diverse as Blaxploitation films, the work of 20th Century black activist journalists such as Ida B. Wells and A. Philip Randolph, and popular television such as The Cosby Show, this book will be essential reading for all students and scholars of media and communications and African American studies.

Doing Diversity in Higher Education Winnifred R. Brown-Glaude,2008-11-14 Using case studies from universities throughout the nation, Doing Diversity in Higher Education examines the role faculty play in improving diversity on their campuses. The power of professors to enhance diversity has long been underestimated, their initiatives often hidden from view. Winnifred Brown-Glaude and her contributors uncover major themes and offer faculty and administrators a blueprint for conquering issues facing campuses across the country. Topics include how to dismantle hostile microclimates, sustain and enhance accomplishments, deal with incomplete institutionalization, and collaborate with administrators. The contributors' essays portray working on behalf of diversity as a genuine intellectual project rather than a faculty service. The rich variety of colleges and universities included provides a wide array of models that faculty can draw upon to inspire institutional change.

Courage to Dissent Tomiko Brown-Nagin,2012 Offers a sweeping history of the civil rights movement in Atlanta from the end of World War II to 1980, arguing the motivations of the movement were much more complicated than simply a desire for integration.

Against Decolonisation Olúf mi Táíwò,2022-06-30 Decolonisation has lost its way. Originally a struggle to escape the West's direct political and economic control, it has become a catch-all idea, often for performing 'morality' or 'authenticity'; it suffocates African thought and denies African agency. Olúf mi Táíwò fiercely rejects the indiscriminate application of 'decolonisation' to everything from literature, language and philosophy to sociology, psychology and medicine. He argues that the decolonisation industry, obsessed with cataloguing wrongs, is seriously harming scholarship on and in Africa. He finds 'decolonisation' of culture intellectually unsound and wholly unrealistic, conflating modernity with coloniality, and groundlessly advocating an open-ended undoing of global society's foundations. Worst of all, today's movement attacks its own cause: 'decolonisers' themselves are disregarding, infantilising and imposing values on contemporary African thinkers. This powerful, much-needed intervention questions whether today's 'decolonisation' truly serves African empowerment. Táíwò's is a bold challenge to respect African intellectuals as innovative adaptors, appropriators and synthesisers of ideas they have always seen as universally relevant.

Becoming Belafonte Judith E. Smith,2014-09-15 This biography of the singer, actor, and fearless anti-racism activist is "so engaging that readers will crave a sequel" (Kirkus Reviews). A son of poor Jamaican immigrants who grew up in Depression-era Harlem, Harry Belafonte became the first black performer to gain artistic control over the representation of African Americans in commercial television and film. Forging connections with an astonishing array of consequential players on the American scene in the decades following World War II–from Paul Robeson to Ed Sullivan, John

Kennedy to Stokely Carmichael–Belafonte established his place in American culture as a hugely popular singer, matinee idol, internationalist, and champion of civil rights, black pride, and black power. In Becoming Belafonte, Judith E. Smith presents the first full-length interpretive study of this multitalented artist. She sets Belafonte's compelling story within a history of American race relations, black theater and film history, McCarthy-era hysteria, and the challenges of introducing multifaceted black culture in a moment of expanding media possibilities and constrained political expression. Smith traces Belafonte's roots in the radical politics of the 1940s, his careful negotiation of the complex challenges of the Cold War 1950s, and his full flowering as a civil rights advocate and internationally acclaimed performer in the 1960s. In Smith's account, Belafonte emerges as a relentless activist, a questing intellectual, and a tireless organizer–and a performer who never shied away from the dangerous crossroads where art and politics meet.

Party/Politics Michael Hanchard, 2006-09-28 Publisher Description

The Second Wave Philip Scranton,2001 Though it had helped define the New South era, the first wave of regional industrialization had clearly lost momentum even before the Great Depression. These nine original case studies look at how World War II and its aftermath transformed the economy, culture, and politics of the South. From perspectives grounded in geography, law, history, sociology, and economics, several contributors look at southern industrial sectors old and new: aircraft and defense, cotton textiles, timber and pulp, carpeting, oil refining and petrochemicals, and automobiles. One essay challenges the perception that southern industrial growth was spurred by a disproportionate share of federal investment during and after the war. In covering the variety of technological, managerial, and spatial transitions brought about by the South's second wave of industrialization, the case studies also identify a set of themes crucial to understanding regional dynamics: investment and development; workforce training; planning, cost-containment, and environmental concerns; equal employment opportunities; rural-to-urban shifts and the decay of local economies entrepreneurism; and coordination of supply, service, and manufacturing processes. From boardroom to factory floor, the variety of perspectives in The Second Wave will significantly widen our understanding of the dramatic reshaping of the region in the decades after 1940.

A World More Concrete N. D. B. Connolly,2016-03-25 Connolly argues that Americans, immigrants, and even indigenous people, between the 1890s and the 1960s, made tremendous investments in racial apartheid, largely in an effort to govern growing cities and to unleash the value of land as real estate. Through a focus on South Florida, the book illustrates how entrepreneurs used land and debates over property rights to negotiate the workings of Jim Crow segregation.
