ABC's of 21 Mike Exinger, 2012-04-23 Blackjack, or Twenty-One if you prefer, is one of the most popular table games in any casino. And it has the lowest “casino edge” of any game, too. So why aren't more people playing? They don't know how to play. They feel intimidated. They think slots give them a better deal. They don't want to lose all their money. They think Paula Deen will eat them with a pound of butter. I can deal with all of these issues except the last one. Blackjack can be easy to learn,

and with my systems it's easy to learn how to win, too. You're on your own with Paula...

How to Win 21 & Poker, Dice, Races, Roulette Mike Goodman, 2016-11-11 THE ONE

IMPORTANT THING TO KNOW ABOUT GAMBLING is that there is no guaranteed way to win all the time. But there is a guaranteed way to lose constantly, and that is when you don't understand the basic rules of playing and betting. It is appalling how many people, even big-money gamblers, lose consistently and don't know why. There are only two types of gamblers-those who really know the game and suckers. Mike Goodman, a veteran professional gambler, gives you an amazing, easy-to-understand insight on how to gamble and win. HORSE RACING...watch those second favorites; let the suckers play the favorites, they're usually overplayed! DICE...you're a sucker if you don't take advantage of the odds, but the real pay-off comes when you know how to bet! SLOTS...there's only one way to beat those "one-arm bandits," but, unfortunately, it's against the law! ROULETTE...it's tough to beat the house percentage, but there are ways to lose less, keep you in the game, and then, who knows? BLACKJACK "21"...here's a game you can win at consistently if you learn the tricks and

how to put “lady luck” on your side! POKER...you get real help here; tips that’ll open your eyes, make you play a better game and win! This book gives solid advice on how you can become a tough player and helps tilt the odds more in your direction. I’m just plain sick of “experts” who promise the moon but peddle virtually worthless advice. Somewhere in their pitch you’re told that they’re not multi-millionaires because they are not allowed in gambling casinos and I challenge any one of them to use this system at “craps”, “21” or roulette at my casino. If they haven’t got the guts to back up their system with hard cash, I challenge them to meet me face to face in public to debate any phase of gambling on which they claim to be an authority. Mike Goodman

Teaching Sign Language to Chimpanzees R. Allen Gardner, Beatrix T. Gardner, Thomas E. Van Cantfort, 1989-01-01 In this volume, the Gardners and their co-workers explore the continuity between human behavior and the rest of animal behavior and find no barriers to be broken, no chasms to be bridged, only unknown territory to be charted and fresh discoveries to be made. With the beginning of Project Washoe in 1966, sign language studies of chimpanzees opened up a new field of scientific

inquiry by providing a new tool for looking at the nature of language and intelligence and the relation between human and nonhuman intelligence. Here, the pioneers in this field review the unique procedures that they developed and the extensive body of evidence accumulated over the years. This close look at what the chimpanzees have actually done and said under rigorous laboratory conditions is the best answer to the heated controversies that have been generated by this line of research among ethologists, psychologists, anthropologists, linguists, and philosophers.

edge over the casinos. The book also contains advice on which blackjack games give you the most profit potential, the risks involved in playing blackjack, how to play without fear of getting barred, and the discipline to 'take the money and run'.

The Complete Blackjack Survival Kit Ronald J. Plachno,2014-01-09 The Complete Blackjack Survival Kit uses more than 16 billion of computer simulated hands of Blackjack (the Game of 21) to find best play complete with tables. And those tables and odds not only include one deck and six deck examples, but also some newer casino games such as 6:5 Blackjack, Super Fun Blackjack, Spanish 21 and more. The book and its math go further and use math and high speed computer simulation to

examine betting and staking strategies. But perhaps the most unique part of this book, that we say makes it complete, is that it then uses statistics to see what all this means. Can you get rich even if you put the odds in your favor? The author has simulated the game of Blackjack twice using computers. The first time in 1984 using Commodore computers, that actually did the job, but of course were slower. The author then programmed a new far faster simulator for use on multiple high speed Windows computers and ran many more simulations that have become the basis for this book. All work in this book was done independently. Some of the basics you will likely already know or have read, since math is math. However, I find no one with the exact same tables. And I certainly find no book I have read that reached the same conclusions about the real chances of winning. That might be because in this case, we simulated not only the game - but also the odds of winning in short periods of play. This book of course does not guarantee that you can be a winner in Blackjack and make money. It might though give you perspective and explain why your neighbor has not yet quit his job and moved to Las Vegas. But of course in the middle of all of this, it gives help that some of us can

used to improve and also have fun. I also found a few things from the simulations that surprised me as well. - Ron Plachno (author)
