Pro Android Python with SL4A Paul Ferrill, 2011-08-21 Pro Android Python with SL4A is for programmers and hobbyists who want to write apps for Android devices without having to learn Java first. Paul Ferrill leads you from installing the Scripting Layer for Android (SL4A) to writing small scripts, to more complicated and interesting projects, and finally to uploading and packaging your programs to an Android device. Android runs scripts in many scripting languages, but Python, Lua, and Beanshell are particularly popular. Most programmers know more than one programming language, so that they have the best tool for whatever task they want to accomplish. Pro Android Python with SL4A explores the world of Android scripting by introducing you to the most important open-source programming languages that are available on Android-based hardware. Pro Android Python with SL4A

starts by exploring the Android software development kit and then shows you how to set up an Eclipse-based Android development environment. You then approach the world of Android programming by using Beanshell, which runs on the Dalvik, and learning how to write small programs to administer an Android device. Next, discover how Lua, a lightweight language perfectly suited for scripting on smaller devices, can work with Android. Lua can be used for small but important tasks, like SMS encryption and synchronizing photos with flickr. Last, but certainly not least, you will discover the world of Python scripting for SL4A, and the power contained within the full range of Python modules that can combine with the Android SDK. You'll learn to write small location-aware apps to get you started, but by the end of this book, you'll find yourself writing fully GUI-fied applications running on the Android desktop! Pro Android Python with SL4A is rounded out with a chapter on distributing and packaging scripts, a skill that you'll find very useful as you reach out to a wider audience with your programs.

Blockbusters Anita Elberse, 2014-02-03 What's behind the phenomenal success of entertainment businesses such as Warner Bros., Marvel Enterprises, and MGM — along with such stars as Jay-Z, Lady Gaga, and LeBron James? Which strategies give leaders in film, television, music, publishing, and sport an edge over their rivals? Anita Elberse, Harvard Business School's expert on the entertainment industry, has done pioneering research on the worlds of media and sport for more than a decade. Now, in this groundbreaking book, she explains a powerful truth about the fiercely

competitive world of entertainment: building a business around blockbuster products — the movies, television shows, songs, and books that are hugely expensive to produce and market — is the surest path to long-term success. Along the way, she reveals why entertainment executives often spend outrageous amounts of money in search of the next blockbuster, why superstars are paid unimaginable sums, and how digital technologies are transforming the entertainment landscape. Full of inside stories from Elberse's unprecedented access to some of the world's most successful entertainment brands, *Blockbusters* is destined to become required reading for anyone seeking to understand how the entertainment industry really works — and how to navigate today's high-stakes business world at large.

Winning the Battle for Relevance Michael McQueen, 2016-03-17 Based on a 6-year study of 500 of the world's biggest brands, *Winning the Battle for Relevance* seeks to answer the question: "What separates the enduring from the endangered?" As businesses, industries, and revenue models continue to be disrupted at an alarming rate, leaders would do well to learn from the mistakes of fallen

brands such as Borders, Kodak, and Blockbuster—lest they fall into the same trap. Better still, *Winning the Battle for Relevance* highlights what every organization and institution can learn from enduringly successful brands in order to win the battle for relevance in the turbulent years ahead.

Write It Your Way Javier Nicholas, 2020-02-23 Can we create the lives that we've always wanted or do we simply allow life to happen to us? Can the story of your life be one of the greatest ever written? In his debut book, Javier Nicholas unpacks timeless universal principles that can help you step out from your comfort zone, discover your number one strength and use your faith to trump fear. No matter where you are in life, the best is yet to come; you can do more, see more and be more. It all starts with you.

High Performance Companies Nitin Pangarkar, 2011-10-11 The easy-to-adopt strategies that make companies from Coca-Cola to Starbucks perennial over-performers and that you can use, too *High Performance Companies* complements the frameworks for strategy making detailed in many existing books, proposing a number of rules of thumb (or principles) that companies can consider when making

their day-to-day decisions which, in turn, will determine their actual strategies. These principles traverse a wide range of scenarios, such as strategic changes implemented by companies, resource allocation decisions—especially towards building durable assets—and resource acquisition through inorganic means. The book adopts a reader-friendly approach by teasing out the lessons to be found in detailed cases studies from interesting companies. The writing minimizes jargon while maintaining rigor, especially with regard to the applicability and relevance of the strategic principles to different business contexts. Cites extensive evidence in support of the proposed arguments, without sacrificing readability Combines both short and long case studies within each chapter to demonstrate the general applicability of the principles presented Uses a variety of examples ranging from well-known companies such as Coca-Cola, Singapore Airlines, and Starbucks to relatively lesser known companies such as Illinois Tool Work, SAS Institute, and Heng Long Leather to show that the principles presented are applicable everywhere Providing valuable new insight into what makes a business successful and how to replicate this in a company of any size, High Performance Companies

is an essential addition to the library of any manager or student of business.

Healthcare and Biomedical Technology in the 21st Century George R. Baran, Mohammad F.

Kiani, Solomon Praveen Samuel, 2013-10-05 Healthcare and Biotechnology in the 21st Century:

Concepts and Case Studies introduces students not pursuing degrees in science or engineering to the remarkable new applications of technology now available to physicians and their patients and discusses how these technologies are evolving to permit new treatments and procedures. The book also elucidates the societal and ethical impacts of advances in medical technology, such as extending life and end of life decisions, the role of genetic testing, confidentiality, costs of health care delivery, scrutiny of scientific claims, and provides background on the engineering approach in healthcare and the scientific method as a guiding principle. This concise, highly relevant text enables faculty to offer a substantive course for students from non-scientific backgrounds that will empower them to make more informed decisions about their healthcare by significantly enhancing their understanding of these

technological advancements.

Visual Heritage: Digital Approaches in Heritage Science Eugene Ch'ng, Henry Chapman, Vincent Gaffney, Andrew S. Wilson, 2022-04-05 How we understand our shared and individual heritage, interpret and disseminate that knowledge is increasingly central to contemporary society. The emerging context for such development is the field of heritage science. Inherently interdisciplinary, and involving both the Arts and Humanities, engineering, conservation and the digital sciences, the development of heritage science is a driver for change; socially, economically and technically. This

book has gathered contributions from leading researchers from across the world and provides a series of themed contributions demonstrating the theoretical, ethical, methodological and technical methods which lie at the heart of heritage science. Archaeology, conservation, museology, the arts, forensic sciences, and heritage management are represented through collaborative research with specialists in applied technologies including object and terrestrial laser scanning, multi-spectral imaging, visualisation, GIS and 3D-printing. Together, the chapters present important case studies to demonstrate the recent advances and best practise within the discipline, highlighting the value of digital transformation across the heritage community that includes objects, monuments, sites and landscapes spanning two million years of natural and cultural history from all over the world. Visual Heritage: Digital Approaches in Heritage Science is aimed at a broad academic and practice-led readership, which extends across many disciplines and will be of considerable value to scholars, practitioners, and students working within heritage and computer science at all levels. The content, which applies heritage science across two million years of cultural history will be appreciated by a

general audience, as well as those wishing simply to explore the vast range of potential technical applications across all the disciplines represented in the book.

The Economist Explains and its online sister, the Daily Chart, are the two most popular blogs on The Economist's website. Together, these online giants provide answers to the kinds of questions, quirky and serious, that may be puzzling anyone interested in the world around them. Want to know how a tattoo affects your job prospects, why bees are under threat, or even how different countries spend their money? We have the answers. They are sometimes surprising, often intriguing, and always enlightening.

Globalization and Media in the Digital Platform Age Dal Yong Jin, 2019-09-02 Global media expert

Dal Yong Jin examines the nexus of globalization, digital media, and contemporary popular culture in this empirically rich, student-friendly book. Offering an in-depth look at globalization processes, histories, texts, and state policies as they relate to the global media, Jin maps out the increasing role of digital platforms as they have shifted the contours of globalization. Case studies and examples focus on ubiquitous digital platforms, including Facebook, YouTube, and Netflix, in tandem with globalization so that the readers are able to apply diverse theoretical frameworks of globalization in different media milieu. Readers are taught core theoretical concepts which they should apply critically to a broad range of contemporary media policies, practices, movements, and technologies in different geographic regions of the world – North America, Europe, Africa, Latin America, and Asia – with a view to determining how they shape and are shaped by globalization. End-of-chapter discussion questions prompt further critical thinking and research. Students doing coursework in digital media, global media, international communication, and globalization will find this new textbook to be an

essential introduction to how media have influenced a complex set of globalization processes in broad international and comparative contexts.

Covering Extended Reality Technologies in the Media Emma Kaylee Graves, 2024-01-16 This book presents a study of the news coverage of extended reality technologies (virtual, augmented and mixed reality; or XR) and how this news corresponds with the marketing of XR products. Focusing on a group of recently emerging technological products, the book offers in-depth analysis of the news coverage of XR technologies and explores the overlap between news discourse and promotional discourse by comparing the way these products are framed in the news and their marketing materials. Using both quantitative and qualitative data, it discusses the topics covered in XR news, as well as the sources used and the specific framing techniques that appear in both XR news and marketing materials. In addition to these findings, it also provides a set of frame categories that can be used by other researchers analysing the media coverage of emerging technologies. Ultimately arguing that the news represents XR in such a way that treats readers as consumers instead of citizens, prioritising the

interests of XR companies rather than news audiences, this book will be of interest to students and researchers in media and communications, discourse studies, journalism, PR and marketing and innovation studies, as well as XR practitioners.
