Blockout! AIMS Education Foundation,2000

Blockout Oliver T. Spedding,2016-06-03 1992 Paul Parker, a young South African metallurgist, is studying in Turkey. He and Irene Yilmaz, a Turkish peasant girl, become lovers and Irene falls pregnant. They decide on an illegal abortion and Maria Ayaz arranges the abortion. Doctor Ahmet Atilla performs illegal abortions to raise money to leave Turkey and also rapes the pregnant girls while they are under general anesthetic. Irene enters the building to have the abortion. Paul hides nearby and recognizes the doctor who attended to him previously. While Atilla is raping Irene she regains consciousness. The doctor strangles her. Outside, Paul falls asleep. Atilla tells Maria to go home, erases all evidence of their presence in the apartment and dumps Irene's body in the sea. He then murders Maria. Paul awakens, can't find Irene and returns to his apartment. Inspector Ali Karacan of the Istanbul Police arrests Paul for the murder of Irene and Maria. Atilla denies being at the abortion building. Paul faces life in jail but the police find Atilla's fingerprints in the abortion apartment. The doctor flees Turkey and Paul returns to South Africa. 1999 Atilla, practicing neurosurgery in South Africa under the name Ismet Illata hears of a psychological researcher, Selwyn Brink, who has a microchip which, when implanted in the human brain, blocks individual distant memories. Brink is financing his research through drug sales. Paul Parker sustains serious head injuries in a car accident. Illata recognizes him and obtains the memory-blocking microchip from Brink by blackmailing him and implants the processed chip in Paul's brain, blocking Paul's memory of him. Atilla also plans to marry Paul's sister. Can anything stop him?

McCracken's Removable Partial Prosthodontics - E-Book Alan B. Carr,David T. Brown,2010-06-22 The leading prosthodontics resource for more than 40 years, McCracken's Removable Partial Prosthodontics provides the information you need to successfully manage the replacement of missing teeth. It covers the basic principles of treatment planning and design, and discusses the newest techniques, procedures, and equipment. Well-known educators Alan B. Carr, DMD, MS, and David T. Brown, DDS, MS use an evidence-based approach that helps you diagnose, design, develop, and sequence a treatment plan. A new chapter in this edition explains how to select and use implants to improve prosthesis performance. From initial contact with the patient to post-treatment care, from basic concepts to advanced material, this full-color text provides a complete foundation in prosthodontic care. Colored boxes highlight the more advanced topics, so it's easy to focus on content that's appropriate for your level of experience. Evidence-based approach uses current research to help you diagnose, design, develop, and sequence a treatment plan. Various philosophies and techniques are presented, so you can select and incorporate applicable techniques on a case-by-case basis. Chapters are presented in three logically-sequenced sections to keep specific focus areas together: General Concepts/Treatment Planning Clinical and Laboratory Maintenance Additional information on the use of implants includes: New Considerations for the Use of Dental Implants with Removable Partial Dentures chapter, on improving prosthesis performance through increasing functional stability New section on impact of implants on movements of partial denture New section on implants as a rest New section on implants as direct retainers New section on implant considerations in design New full-color drawings and photographs show techniques, materials, and anatomical detail more accurately.
