"We Are All Fast-Food Workers Now" Annelise Orleck,2018-02-27 The story of low-wage workers rising up around the world to demand respect and a living wage. Tracing a new labor movement sparked and sustained by low-wage workers from across the globe, "We Are All Fast-Food Workers Now" is an urgent, illuminating look at globalization as seen through the eyes of workers-activists: small farmers, fast-food servers, retail workers, hotel housekeepers, home-healthcare aides, airport workers, and adjunct professors who are fighting for respect, safety, and a living wage. With original photographs by Liz Cooke and drawing on interviews with activists in many US cities and countries around the world, including Bangladesh, Cambodia, Mexico, South Africa, and the Philippines, it features stories of resistance and rebellion, as well as reflections on hope and change as it rises from the bottom up.

Beautiful Minecraft James Delaney, 2016-11-01 With a bit of imagination and a heavy dose of artistic talent, Minecraft blocks can be used to build almost anything. But as you'll see, some artists are taking Minecraft building to a whole new level. Beautiful Minecraft is a compendium of stunning artwork built in Minecraft. Using millions of blocks and spending hundreds of hours, these artists have created floating steampunk cities, alien worlds, detailed classical sculptures, fantastical landscapes, architectural marvels, and more. The results are simply beautiful.

A Structural Analysis of Complex Aerial Photographs Makoto Nagao, Takashi Matsuyama, 1980-12-31 It is most appropriate that the first volume to appear in the series Advanced Applications in Pattern Recognition should be this monograph by Nagao and Matsuyama. The work described here is a deep unification and synthesis of the two fundamental approaches to pattern recognition: numerical (also known as statistical) and structural (linguistic, syntactic). The power and unity of the methodology flow from the apparently effortless and natural use of the knowledge-base framework illuminated by the best results of artificial intelligence research. An integral part of the work is the algorithmic solution of many hitherto incompletely or clumsily treated problems. It was on the occasion of a laboratory visit in connection with the 4th IJ CPR (of which Professor Nagao was the very able Program Chairman) that I saw in operation the system described here. On the spot I expressed the desire to see the work described for the international technical audience in this series and the authors were kind enough to agree to contribute to a new and unknown series. With the

publication of this monograph on the eve of the 5th ICPR my wish is fulfilled. I want to thank here the authors and Plenum Publishing Corporation for making this volume and the series a reality.
