Arnoldy,Sarah Benson,Andrew Scholey,2021-03-05 The seeds and fruits (or their parts) of Iberoamerican crops have high nutritional and functional properties which could be utilized in a wide range of foods. The crops included in this book are amaranth (*Amaranthus* spp.), quinoa (*Chenopodium quinoa*), kañiwa (*Chenopodium pallidicaule*), chia (*Salvia hispanica* L.), Andean maize (*Zea mays* L.), moringa (*Moringa oleifera*), yvapurú (*Plinia peruviana*), kurugua (*Sicana odorifera*), sacha inchi (*Plukenetia huayllabambana*), camu camu (*Myrciaria dubia*), mango (*Mangifera indica*), tarwi (*Lupinus mutabilis*), peanut (*Arachis hypogaea* L.) and taro (*Colocasia esculenta*), all of them still underutilized. Their cultivation is low; nevertheless, in recent years, the worldwide demand for some of them has increased immensely, resulting in an increase in their production. The ancient Iberoamerican crops have been widely recognized for their nutritional value by food scientists and food producers

because they contain high-quality proteins and large quantities of micronutrients such as minerals, vitamins and bioactive compounds. In addition, they are gluten-free, which makes them suitable for people suffering from various gluten intolerances. This book summarizes the large amount of investigations in this field in the last year and provides knowledge within all the relevant areas of food science. The editors hope that this book will contribute to an increased use of these products in human nutrition by consumers worldwide.

Cribsheet Emily Oster, 2019-04-23 From the author of *Expecting Better* and *The Family Firm*, an economist's guide to the early years of parenting. "Both refreshing and useful. With so many parenting theories driving us all a bit batty, this is the type of book that we need to help calm things down." —LA Times "The book is jam-packed with information, but it's also a delightful read because Oster is such a good writer." —NPR With *Expecting Better*, award-winning economist Emily Oster spotted a need in the pregnancy market for advice that gave women the information they needed to make the best decision for their own pregnancies. By digging into the data, Oster found that much of the conventional pregnancy wisdom was wrong. In *Cribsheet*, she now tackles an even greater challenge: decision-making in the early years of parenting. As any new parent knows, there is an abundance of often-conflicting advice hurled at you from doctors, family, friends, and strangers on the internet. From the earliest days, parents get the message that they must make certain choices around feeding, sleep, and schedule or all will be lost. There's a rule—or three—for everything. But the benefits of these choices can be overstated, and the trade-offs can be profound. How do you make your own best decision? Armed with the data, Oster finds that the conventional wisdom doesn't always hold up.

She debunks myths around breastfeeding (not a panacea), sleep training (not so bad!), potty training (wait until they're ready or possibly bribe with M&Ms), language acquisition (early talkers aren't necessarily geniuses), and many other topics. She also shows parents how to think through freighted questions like if and how to go back to work, how to think about toddler discipline, and how to have a relationship and parent at the same time. Economics is the science of decision-making, and Cribsheet is a thinking parent's guide to the chaos and frequent misinformation of the early years. Emily Oster is a trained expert—and mom of two—who can empower us to make better, less fraught decisions—and stay sane in the years before preschool.
