Makers of the Piano: 1820-1860 Martha Novak Clinkscale, 1993 This book continues the overview of early pianos begun in Clinkscale's *Makers of the Piano 1700-1820* (OUP, 1993). Although a few of the biographies overlap, the majority of the makers are completely new. Approximately 2,400 makers and manufacturers and about 2,200 pianos are listed. Of this total, about 645 are English, the majority of whom were active in London; more than 200 of the London makers have not been discussed in previous publications.

Worth Returning Veronica Lang, 2021-02-16 Rob had not been in love with her when he'd married her. This, Maria concluded, was why he had not been able to keep his marriage vows. When he betrayed her just a few years into their marriage, she wanted to leave him immediately, despite the fact that she still loved him. But knowing how their separation would devastate their children, she decided to stay, at least until both children were old enough. Later, she would learn about Rob's greater betrayal, committed before they'd even been married. Maria finally found the courage to leave Rob when their children were grown and married. Her leaving came as a great shock to him, who'd assumed his wife would stay forever. She hadn't left him when she had first learned of his betrayals, had she? So why did she have to leave at all? It was only after she was gone that Rob realized how much he needed her. Her absence was almost unbearable. He'd tried to win her back, but it was too late. She had fallen in love with another man. Now, nearly a decade after their estrangement, Rob and Maria find themselves in the same tour group doing the Camino de Santiago. She'd joined the tour, hoping it would help assuage her grief over her partner's death; Rob had joined because he thought it would be 'fun'. Neither of them could have predicted how much the Camino tour would transform their lives. The lives of Nina and Joy, friends and neighbors of Maria who did the Camino with them, and those of the other pilgrims in their group are transformed as well. This is their story too.

Blue Skin of the Sea Graham Salisbury, 2008-12-24 Eleven interlinked stories tell the tale of a boy coming of age in Kailua-Kona, a Hawaiian fishing village. Sonny Mendoza is a little different from the rest of the men in his family. Salisbury explores characters like Auntie Pearl, a full-blooded Hawaiian as regal as the queens of old; cool Jack, from L.A., who starts a gang and dares Sonny to be brave enough, cruel enough, to join; mysterious Melanie, who steals his heart; and Deeps, the shark hunter. But the most memorable character is the sea itself: inviting, unpredictable, deadly. Mendoza men are brave men, but Sonny's courage is of a different kind. Why can't he love and trust the water as the men of his family are meant to do?

MATLAB® Essentials William Bober, 2017-09-11 All disciplines of science and engineering use numerical methods for complex problem analysis, due to the highly mathematical nature of the field. Analytical methods alone are unable to solve many complex problems engineering students and professionals confront. Introduction to MATLAB® Programming for Engineers and Scientists examines the basic elements of code writing, and describes MATLAB® methods for solving common engineering problems and applications across the range of engineering disciplines. The text uses a class-tested learning approach and accessible two-color page design to guide students from basic programming to the skills needed for future coursework and engineering practice.
