Guerilla Film Makers Movie Blueprint Chris Jones, 2003-06-20 Central to The Guerilla Film Makers Movie Blueprint are flow charts: crystal-clear diagrams detailing every single thing, no matter how small, that needs to be done to make your film. This visual approach to the filmmaking process ensures that new (and established!) filmmakers get an instant overview of each and every discipline. Backing up the diagrams are copious notes - humorous in tone, yet broad and deep in content. Wherever possible, the text is broken apart into box outs, hot tips and sub-diagrams. This book is entertaining, irreverent, and never less than painfully practical. The Guerilla Film Makers Movie Blueprint will have its own dedicated website where readers can download the tools, forms, software, and artwork detailed in the book. Jones's latest endeavor is packed with over a decade's worth of experience, know-how, and insider tips. A must-read for every budding filmmaker.

Interdisciplinary Applications of the Person-Centered Approach Jeffrey H. D. Cornelius-White, Renate Motschnig-Pitrik, Michael Lux, 2013-06-04 This book examines the scientific contribution and increasing relevance of the Person-Centered Approach (PCA) in psychotherapy. The direction taken in the book is to provide readers with a multidisciplinary and multi-perspective view as well as practical applications. Beyond the more conventional psychotherapy applications (client-centered, experimental, emotion-focused, child-centered, motivational interviewing, existential, filial, etc.) others have evolved including peace and conflict resolution work, encounter and T-groups, nonviolent communication, parent effectiveness training, person-centered planning for people with disabilities,

relationship enhancement methods, learner-centered education, technology-enhanced learning environments, human relations leadership training, etc. Simultaneously, scientific disciplines were influenced by this perspective in less obvious ways. Hence, the major contribution of this book is to identify and characterize the key bridges-so far only partly recognized- between the PCA and several other disciplines. Based on the results of the bridge-building endeavor, the editors will propose an initial formulation of the PCA as a meta-theory. It is intended as a generic framework to solve complex, social problems and to stimulate further research and development concerning the human species in relationship to its environment.

Rails to Penn State Michael Bezilla,Jack Rudnicki,2007 More than five hundred short line railroads existed in the United States at the industry's height, and Pennsylvania had more than any other state. The history of the Bellefonte Central, which operated in central

Pennsylvania from the 1880s until 1982, is a classic story of the rise and decline of short line railroads nationwide. Connecting with the Pennsylvania Railroad--a company that proved to be both friend and foe--the Bellefonte Central played an important role in developing the region's renowned limestone and hot-blast ironmaking industries and was Penn State University's economic lifeline for generations.

Technology-focused Acquisitions Jan Paul Stein, 2017-07-24 Technology-focused acquisitions are an important complement to the firm's internal product development efforts. There is considerable heterogeneity when comparing individual technology-focused acquisitions – especially with respect to acquisition timing and the deal value. To resolve some of this heterogeneity the author introduces the novel distinction between performance- and functionality-focused acquisitions. He characterizes this distinction based on a theoretical analysis, a qualitative study, and turns to a sample of acquisitions in the field of artificial intelligence for the quantitative study. There are two key findings. First, performance-focused acquisitions take place earlier in a target's life cycle than functionality-focused ones. Second, the deal value is – at a comparable stage in a target's life cycle – higher for performance-focused acquisitions. This thesis is relevant for management scholars and managers alike: Scholars learn about the implications of the distinction between performance- and functionality-focused acquisitions on markets for technology. Managers gain insights into how this distinction may guide their strategic decision making.
