*Applying GPS Data to Understand Travel Behavior* Jean Louise Wolf, William H. Bachman, Marcelo Simas Oliveira, Joshua A. Auld, Abolfazl Mohammadian, Petr Samuilovich Vovsha, 2014 TRB's National Cooperative Highway Research Program (NCHRP) Report 775: Applying GPS Data to Understand Travel Behavior, Volume I: Background, Methods, and Tests describes the research process that was used to develop guidelines on the use of multiple sources of Global Positioning System (GPS) data to understand travel behavior and activity. The guidelines, which are included in NCHRP Report 775, Volume II are intended to provide a jump-start for processing GPS data for travel behavior purposes and provide key information elements that practitioners should consider when using GPS data. -- Publisher's note.

Hacking GPS Kathie Kingsley-Hughes, 2005-03-25 \* This is the user manual that didn't come with any of the 30 million GPS receivers currently in use, showing readers how to modify, tweak, and hack their GPS to take it to new levels! \* Crazy-cool modifications include exploiting secret keycodes, revealing hidden features, building power cords and cables, hacking the battery and antenna, protecting a GPS from impact and falls, making a screen protector, and solar-powering a GPS \* Potential power users will take the function and performance of their GPS to a whole new level by hacking into the firmware and hacking into a PC connection with a GPS \* Fear not! Any potentially dangerous mod (to the device) is clearly labeled, with precautions listed that should be taken \* Game time! Readers can check out GPS games, check into hacking geocaching, and even use a GPS as a metal detector

**Androids** Chet Haase, 2022-07-19 The fascinating inside story of how the Android operating system came to be. In 2004, Android was two people who wanted to build camera software but couldn't get investors interested. Today, Android is a large team at Google, delivering an operating system (including camera software) to over 3 billion devices worldwide. This is the inside story, told by the people who made it happen. *Androids: The Team that Built the Android Operating System* is a first-hand chronological account of how the startup began, how the team came together, and how they all built an operating system from the kernel level to its applications and everything in between. It describes the tenuous beginnings of this ambitious project as a tiny startup, then as a small acquisition by Google that took on an industry with strong, entrenched competition. Author Chet Haase joined the Android team at Google in May 2010 and later recorded conversations with team members to preserve the early days of Android's history leading to the launch of 1.0. This engaging and accessible book captures the developers' stories in their own voices to answer the question: How did Android succeed?

**Making Things Talk** Tom Igoe, 2011-09-15 Provides instructions for building thirty-three projects that interact with the physical world, including a

The Environmental Impact of COVID-19 Deepak Rawtani, Chaudhery Mustansar Hussain, 2023-11-13 Discover the wider environmental effects of the COVID-19 pandemic with this timely and up to date resource Environmental Impact of COVID-19 delivers an insightful analysis of various environmental aspects of the COVID-19 pandemic that have caused global concern. The book discusses the transmission of COVID-19 in the environment, the evaluation and analysis of COVID-19, the socio-economic implications of COVID-19, its environmental impact, risk mitigation and management, waste management, and the environmental implications of the virus. It also considers the socio-economic implications of COVID-19's spread, including the effects of international lockdowns on different strata of society and various industries, including the biomedical industry, the environmental industry, and the pharmaceutical industry. An entire section of the text is devoted to a discussion about the waste generated due to COVID-19 and the effect of that waste on different environmental bodies. Another is dedicated to the impact of COVID-19 on the environment in the short- and long-term, including its effect on climate and climate change. Readers will also benefit from the inclusion of: A thorough introduction to the transmission of COVID-19 in the environment, including its viability in different environmental media and the effect of environmental factors in its transmission An evaluation and analysis of COVID-19, including traditional analytical techniques, sampling for COVID-19, and modern sensor-based techniques for identification An exploration of the socio-economic implications of COVID-19, including its effect on a variety of industries A treatment of the environmental impact of COVID-19 in the context of risk mitigation and management Perfect for academics and industry professionals whose work requires them to understand the wider environmental implications of the SARS-Cov-2 pandemic, Environmental Impact of COVID-19 will also earn a place in the libraries of private sector professionals working on products and services that promise to reduce the environmental impact of the coronavirus.

Smart Internet of Things Projects Agus Kurniawan, 2016-09-30 Discover how to build your own smart Internet of Things projects and bring a new degree of interconnectivity to your world About This Book Learn how to extract and analyse data from physical devices and build smart IoT projects Master the skills of building enticing projects such as a neural network autonomous car, computer vision through a camera, and cloud-based IoT applications This project-based guide leverages revolutionary computing chips such as Raspberry Pi, Arduino, and so on Who This Book Is For If you are hobbyist who is keen on making smart IoT projects, then this book is for you. You should have a basic knowledge of Python. What You Will Learn Implement data science in your IoT projects and build a smart temperature controller Create a simple machine learning application and implement decision system concepts Develop a vision machine using OpenCV Build a robot car with manual and automatic control Implement speech modules with your own voice commands for IoT projects Connect IoT to a cloud-based server In Detail Internet of Things (IoT) is a groundbreaking technology that involves connecting numerous physical devices to the Internet and controlling them. Creating basic IoT projects is common, but imagine building

smart IoT projects that can extract data from physical devices, thereby making decisions by themselves. Our book overcomes the challenge of analyzing data from physical devices and accomplishes all that your imagination can dream up by teaching you how to build smart IoT projects. Basic statistics and various applied algorithms in data science and machine learning are introduced to accelerate your knowledge of how to integrate a decision system into a physical device. This book contains IoT projects such as building a smart temperature controller, creating your own vision machine project, building an autonomous mobile robot car, controlling IoT projects through voice commands, building IoT applications utilizing cloud technology and data science, and many more. We will also leverage a small yet powerful IoT chip, Raspberry Pi with Arduino, in order to integrate a smart decision-making system in the IoT projects. Style and approach The book follows a project-based approach to building smart IoT projects using powerful boards such as the Raspberry Pi, Arduino, and the IoT chip.

Intelligent Data Engineering and Automated Learning - IDEAL 2007 Hujun Yin,Xin Yao,Peter Tino,Emilio Corchado,Will Byrne,2007-12-06 This book constitutes the refereed proceedings of the 8th International Conference on Intelligent Data Engineering and Automated Learning, IDEAL 2007, held in Birmingham, UK, in December 2007. The papers include topical sections on learning and information processing, data mining and information management, bioinformatics and neuroinformatics, agents and distributed systems, financial engineering and modeling, and agent-based approach to service sciences.

*Intelligent Transportation and Planning: Breakthroughs in Research and Practice* Management Association, Information Resources,2018-02-02 From driverless cars to vehicular networks, recent technological advances are being employed to increase road safety and improve driver satisfaction. As with any newly developed technology, researchers must take care to address all concerns, limitations, and dangers before widespread public adoption. *Intelligent Transportation and Planning: Breakthroughs in Research and Practice* is an innovative reference source for the latest academic material on the applications, management, and planning of intelligent transportation systems. Highlighting a range of topics, such as automatic control, infrastructure systems, and system architecture, this publication is ideally designed for engineers, academics, professionals, and practitioners actively involved in the transportation planning sector.

Local Positioning Systems Krzysztof W. Kolodziej,Johan Hjelm,2017-12-19 Local Positioning Systems: LBS Applications and Services explores the possible approaches and technologies to location problems including people and asset tracking, mobile resource management, public safety, and handset location-based services. The book examines several indoor positioning systems, providing detailed case studies of existing applications and their requirements, and shows how to set them up. Other chapters are dedicated to position computation algorithms using different signal metrics and determination methods, 2D/3D indoor map data and location models, indoor navigation, system components and how they work, privacy, deployment issues, and standards. In detail, the book explains the steps for deploying a location-enabled network, including doing a site-survey, creating a positioning model and floor maps, and access point placement and configuration. Also presented is a classification for network-based and ad-hoc positioning systems, and a framework for developing indoor LBS services. This comprehensive guide will be invaluable to students and lecturers in the area of wireless computing. It will also be an enabling resource to developers and researchers seeking to expand their knowledge in this field.

**Aging Friendly Technology for Health and Independence** Yeunsook Lee,Z. Zenn Bien,Mounir Mokhtari,Jeong Tai Kim,Mignon Park,Jongbae Kim,Heyoung Lee,Ismail Khalil,2010-06-17 We are living in a world full of innovations for the elderly and people with special needs to use smart assistive technologies and smart homes to more easily perform activities of daily living, to continue in social participation, to engage in entertainment and leisure activities, and to enjoy living independently. These innovations are inspired by new technologies leveraging all aspects of ambient and pervasive intelligence with related theories, technologies, methods, applications, and services on ubiquitous, pervasive, Aml, universal, mobile, embedded, wearable, augmented, invisible, hidden, context-aware, calm, amorphous, sentient, proactive, post-PC, everyday, autonomic computing from the engineering, business and organizational perspectives. In the field of smart homes and health telematics, significant research is underway to enable aging and disabled people to use smart assistive technologies and smart homes to foster independent living and to offer them an enhanced quality of life. A smart home is a vision of the future where computers and computing devices will be available naturally and unobtrusively anywhere, anytime, and by different means in our daily living, working, learning, business, and infotainment environments. Such a vision opens tremendous opportunities for numerous novel services/applications that are more immersive, more intelligent, and more interactive in both real and cyber spaces.

**Managing the Smart Revolution in Tourism Firms** Francisco J. Navarro-Meneses,2023-03-31 Smart technologies are revolutionizing tourism, as they are having a profound impact on the way tourists behave and on how firms interact with them and create value. The increasing availability of real-time Big Data and the advances made in data analytics techniques, artificial intelligence, and IoT, has begun to transform tourism organizations in ways not previously considered, and in a lasting manner. This book delivers the latest and most relevant advances in the field of smart transformation and the management practices that can be put into practice to continue creating value in the years to come. Divided into four main parts and 23 chapters, it highlights the challenges that the Smart Revolution brings to tourism firms by providing updated knowledge on the literature, research, and experiences of the author. The book will also provide a guide for action to business leaders and those approaching the fundamentals of the Smart Revolution for the first time. It will also serve as a valuable text for undergraduate and graduate students on specialized courses in tourism, technology, and business transformation.
