System Center Opalis Integration Server 6.3 Unleashed Charles Joy, Mark Gosson, Kerrie Meyler, Pete Zerger, David T. Allen, Marcus Oh,2012 By using Microsoft's new Opalis IT process

automation software, your IT organization can dramatically reduce operational costs and improve efficiency by replacing resource-intensive, error-prone manual activities with standardized, automated processes. Microsoft doesn't sell Opalis as a separately licensed product: thousands of customers who've licensed Microsoft System Center with SMSE/D already have the rights to use it. They simply have to learn how. If this sounds like you, System Center Opalis Integration Server 6.3 Unleashed will help you do so. This book's expert author team offers you start-to-finish, step-by-step coverage of implementing key Opalis 6.3 features for maximum business value. Drawing on their extensive experience, they bring together coverage of related topics and techniques in ways that enable you and IT professionals to deploy Opalis more quickly and apply it more successfully. The authors begin with a high-level overview of Opalis 6.3 and the potential value it offers to your IT organization. Next, it guides you through architecture, installation, policy basics and design, foundation objects and integration packs, the SDK, and best practices based on real-world implementations.

XML-Based Data Management and Multimedia Engineering - EDBT 2002 Workshops

Akmal B. Chaudhri, Chabane Djeraba, Rainer Unland, Wolfgang Lindner, 2003-08-02 This volume comprises papers from the following three workshops that were part of the complete program for the International Conference on Extending Database Technology (EDBT) held in Prague, Czech Republic, in March 2002: XML-Based Data Management (XMLDM) Second International Workshop on Multimedia Data and Document Engineering (MDDE) Young Researchers Workshop (YRWS) Together, the three workshops featured 48 high-quality papers selected from approximately 130 submissions. It was, therefore, difficult to decide on the papers that were to be accepted for presentation. We believe that the accepted papers substantially contribute to their particular fields of research. The workshops were an excellent basis for intense and highly fruitful discussions. The quality and quantity of papers show that the areas of interest for the workshops are highly active. A large number of excellent researchers are working in relevant fields producing research output that is not only of interest to other researchers but also for industry. The organizers and participants of the workshops were highly satisfied with the output. The high quality of the presenters and workshop participants contributed to the success of each workshop. The amazing environment of Prague and the location of the EDBT conference also contributed to the overall success. Last, but not least, our sincere thanks to the conference organizers – the organizing team was always willing to help and if there were things that did not work, assistance was quickly available.
