**Weight Loss: Eat Well, Eat Clean, Eat Right** Pat White, 2018-11-27 Metabolic rate slows down significantly as you get older. Of course the older you get the less activity you engage in. With your present weight, you can determine your body mass index (BMI). BMI is a useful measure of overweight and obesity. It is calculated using your height and weight. BMI is usually the estimate of your body fat and a good gauge of your risk for diseases that occur with more body fat. It is known that the higher your BMI, the higher your risk for heart diseases, high blood pressure, type 2 diabetes, gallstones, apnea and other breathing problems, and certain cancers. It is estimated that over 7 million deaths worldwide are as a result of heart disease. Nearly 10 million deaths were due to cancer. In a few years, it is estimated that cancer will claim 11 million lives every year going forward. It gets worse. It is estimated that by the year 2031—a little over a decade from now—over 336 million people worldwide will be diabetic. Presently, over sixty-six percent of Americans over the age of 20 are debilitatingly obese. Are you obese? Are you overweight? What is your BMI? With weight loss, you must not successfully be living in discomfort to lose it all. It will be miserable and you will spend all the hours you are awake thinking about food. That is punishing and even an enemy must not be allowed to suffer such. Lose the weight the right way without the discomfort. Eat well, eat clean, eat right and watch the pounds melt away.

**Eat, Live, Thrive Diet** Danna Demetre, Robyn Thomson, 2019-03-26 A sustainable lifestyle diet for women of faith that unravels the mystery of why we gain weight as we age and includes a practical, God-centered, science-based plan to change your habits from the inside out—from two veteran health and lifestyle coaches Eat, Live, Thrive Diet shows women how they can not only lose excess body fat permanently—before, during, and after menopause—but also improve their overall health in critical areas such as brain function, resistance to disease, slowing down external aging, and increasing energy. This highly effective plan that addresses body, soul, and spirit is presented in a compassionate voice by two experienced

health coaches who share personal experiences of battling weight and emotional eating issues and how they came to celebrate lasting victory. Whereas most diets are short-lived or require substantial upkeep to maintain, Eat, Live, Thrive Diet is a cyclic and easy to follow eating plan that women can embrace indefinitely. The first phase of the plan helps women discover their carbohydrate thresholds and the specific foods holding them back from weight loss. The lifestyle phase of the plan is easily customizable to promote ongoing weight loss or maintenance. The diet is not Paleo, Keto, or low carbohydrate but rather “carbohydrate controlled” based on each woman’s personal response. The authors also emphasize the importance of getting to the root cause of unhealthy eating habits and the value of short-term intermittent fasting--a simple lifestyle change that makes it easier and more effective for many mature women to reach their health and weight loss goals. They also offer virtual coaching support through their Eat Live Thrive Academy.

*Fat Kid Got Fit* Bill Baroni, 2012-01-10 When Bill Baroni was just twenty years old, he was convinced he was dying. He thought he was having a heart attack because it felt like he had an elephant sitting on his chest. It turned out to be only indigestion, but more than that, it was the wake up call he needed to save his life. Bill weighed 320 pounds and was hooked on junk food. He set about to change his life forever, and now, in *Fat Kid Gets Fit*, he tells you everything you need to know to lose weight and more importantly, keep it off for the rest of your life. No, he’s not a doctor. Not a trainer. Not a salesman hawking gym equipment, vitamin supplements, or workout videos. He did not have gastric bypass surgery and he didn’t subscribe to the slimming grapefruit enema regimes used by Hollywood stars. He lost his weight using common sense. It took dedication, and even some gumption. But it worked! He lost 120 pounds and, more importantly, he has kept it off! He has maintained a healthy 185 pounds for fifteen years. At 6’5”, he is trim, handsome, and healthy. Bill is a man on a mission—to help get everyone fit, no matter what their story is.

*In Defense of Processed Food* Robert L. Shewfelt, 2016-11-23 It has become popular to blame the American obesity epidemic and many other health-related problems on processed food. Many of these criticisms are valid for some processed-food items, but many statements are overgeneralizations that unfairly target a wide range of products that contribute to our health and well-being. In addition, many of the proposed dangers allegedly posed by eating processed food are exaggerations based on highly selective views of experimental studies. We crave simple answers to our questions about food, but the science behind the proclamations of food pundits is not nearly as clear as they would have you believe. This book presents a more nuanced view of the benefits and limitations of food processing and exposes some of the tricks both Big Food and its critics use to manipulate us to adopt their point of view. Food is a source of enjoyment, a part of our cultural heritage, a vital ingredient in maintaining health, and an expression of personal choice. We need to make those choices based on credible information and not be beguiled by the sophisticated marketing tools of Big Food nor the ideological appeals and gut feelings of self-appointed food gurus who have little or no background in nutrition.
